Question:

Why are sheets 14 & 15 included in the plans? They both say "for information only".

Answer:

These sheets have been included for information purposes only. This project is designed to accommodate possible future widening. The intent is to convey that the box is slightly oversized for the existing condition so that it can accommodate the design criteria of the ultimate design in the future. If this design intent was not clarified, the future designer or contractor may unnecessarily replace the box to meet the criteria of the ultimate design when the road is eventually widened.
