NOTE:
The distance from the railroad crossing marking to the nearest track will vary according to the approach speed and the sight distance of the vehicular traffic approaching, but probably should be not less than 50 feet.

A three lane roadway should be marked with a center lane for two-lane approach operation on the approach to a crossing.

On multi-lane roads, the transverse bands should extend across all approach lanes, and individual RR symbols should be used in each approach lane.

Refer to Standard Alphabets for Highway Signs and Markings for RR symbols details.
