NEILL BOHLINGER
GENERAL COUNSEL

LITTLE ROCK, ARK.
December 1, 1946

To the Governor and Members of the 56th General Assembly
State of Arkansas

We transmit herewith a Report of the Activities of the State Highway Commission covering the two year period ending June 30, 1946.

The purpose of the publication is to present a record of highway maintenance and construction activities, to give an accounting of expenditures made, to show the present physical status of the highway system, and to make an analysis and estimate of highway revenues, which when considered together, will provide some of the information needed for an understanding of the highway problems of the State and allow a correct appraisal of the Commission's responsibilities and accomplishments.

In order to more fully present existing conditions, the information regarding construction activities has been extended beyond June 30th.

We desire to commend the work of the Advisory Committee appointed by your Excellency. A summary of the recommendations of the committee has been included herein.

Respectfully submitted,

Wm H Sadler
Chairman, District 6

Dan Felton
Member, District 1

A. D. Thompson *H. E. Van Dalsen*
Member, District 2 Member, District 8

FOREWORD

The current period has witnessed a rising spiral of prices materially affecting the performance that can be accomplished with a given level of expenditure. It is obvious that the dollar spent at this time will fail to produce the same volume as was possible prior to the late war. The future trend is difficult to predict and it is impossible to foresee whether wage and material prices will remain static, advance, or retreat.

The over-all situation is conducive to serious consideration upon the part of all concerned. A first condition is to return our Highway System to a satisfactory state of maintenance, and a second is to provide the additional modern facilities that our increased traffic demands.

As motor vehicle traffic is not confined to the State Highway System, but has origins on and destinations to both the county road and the city street, the financial problem is further complicated by the necessity of providing an equitable allocation of available revenues to counties and municipalities as well as satisfying the major needs of the State Highway System.

SECTION I

SUMMARY AND REVIEW

ADMINISTRATION

A complete outline of the administrative and organizational structure of the Highway Department was included in the 15th Biennial Report for the years 1941-42. The duties and functions of the Commission, executive officials and departmental divisions were fully explained in that publication and these have not been materially changed. Act 42 of the 1945 General Assembly increased the number of Commissioners from seven to ten, one to be appointed from each maintenance district, and re-defined the 10 districts as set forth in the Review of Legislation shown in the back of this publication. Administrative changes during the biennium were: (1) consolidating the position of Assistant Director and Secretary to the Commission with that of General Counsel, (2) abolishing the Division of Traffic and Safety, and (3) establishing the Division of Secondary County Roads to serve as a coordinating agency between the counties and the Public Roads Administration on all matters relating to the County road secondary Federal Aid System.

REVIEW OF CONDITIONS

The past biennium may be divided into two distinct periods from the standpoint of highway operations. Although hostilities ceased in the summer of 1945, the 18 months from July 1, 1944, to January 1, 1946, belongs to the war era. This period was characterized by: an acute shortage of men, material and equipment, with highway construction suspended except for war projects; and the directing of all attention toward emergency maintenance on main traveled highways. Only the last six months of the biennium may be classed as Post War Period, and during this time highway operations suffered greatly from the strain of reconversion. Early in 1946 Federal funds, under the 1944 Federal Aid Act, were made available for construction, but on July 1st only 29 Federal Aid jobs had been awarded. Contractors could not get necessary equipment, material deliveries and prices were uncertain, and skilled labor was still scarce; consequently, bid prices submitted were far beyond those anticipated and the Department was forced to curtail the original construction program outlined from the standpoint of the mileage of work involved. The same was true for the maintenance program. The State's low wage scale resulted in a shortage of men skilled in highway repairs, and this fact, together with the lack of State owned equipment, forced the Department to let contracts for much of the maintenance work such as bituminous sealing and regraveling operations. It was mid-summer and the end of the biennium before a full program of maintenance work was under way.

The most encouraging note of the past two years was the immediate upswing of highway revenues upon the relaxation of gasoline rationing and wartime travel restrictions. Highway income for the Bond Year, ending March 31, 1946, was the highest of record with a gross collection of \$17,699,946. Monthly revenues since that time indicates a considerably higher gross figure for 1946-47. See Table 17.

The impact of heavily laden vehicles during the war years resulted in damage to the older surfaces on main traveled highways that in some instances bordered on complete destruction. Since these routes not only carry the majority of traffic but are also the principal revenue producers, repair work was naturally concentrated on such highways, and as an unavoidable result, many miles of light traffic roads had to be neglected—there simply was not enough labor and equipment available to reach all highways at once. As rapidly as facilities are available, all highways are being brought under full maintenance. The Commission is fully aware of the hardships this situation has caused and asks the citizens to bear with them for a few more months.

ACCOMPLISHMENTS

The first year of the biennial period was spent largely on emergency maintenance, war construction projects, and preparation of plans for the Post War Construction program. The personnel of the Department was at the lowest level in many years. The following achievements are worthy of special mention.

1. Inauguration of the Post War Program of highway construction and awarding of contracts totaling almost six million dollars between January 21 and June 30, 1946. This was accomplished under the handicaps of high bid prices and the scarcity of equipment, materials and labor.
2. Revision of the Primary Federal Aid System of roads and reduction of the primary mileage from 5,100 to 3,489 miles.
3. In compliance with the terms of the 1944 Federal Aid Act: (a) a Secondary Federal Aid System comprised of State highways and county roads was designated, (b) urban area boundaries were established for urban highway construction in all cities of 5,000 or more inhabitants, and (c) an Interstate System of 525 miles of highways was designated.
4. Complete revision and reduction of the original program of Post War projects to conform with the exceptionally high construction costs.
5. During the period from January 1, 1944, the date of the last report, to December, 1946, road and bridge contracts were awarded as follows: Federal Aid projects, 43; War Access or Emergency, 7; State Jobs, 28; County Federal Aid Projects, 7. The State projects included 527 miles of maintenance sealing operations.
6. Preparation of a priority list of grade crossings for post war projects.

STATUS OF THE HIGHWAY SYSTEM

Because of the highway construction ban imposed by the war, there is little change in the mileage of the various surface types from that shown in the previous report. It is worthy to note that the present Highway Commission established the policy that no new roads would be added to the present system until existing mileage had been brought to a higher state of improvement. None of the post war projects awarded had been completed and the following figures reflect the status of the system on June 30, 1946, and also show the mileage of surface types upon completion of jobs awarded to November 1, 1946. The mileage by type for each county is shown by Table 21 in the Appendix.

Type	Previous Report Miles	June 30, 1946 Miles	Upon Completion Miles
Concrete and Brick Pavement	1,368	1,370	1,370
Asphaltic Pavement	529	526	513
Bituminous Surfacing	1,685	1,713	1,907
Untreated Gravel	5,699	5,669	5,488
Graded	420	414	414
Unimproved.....	61	61	61
Total.....	9,762	9,753	9,753

THE FEDERAL AID SYSTEM

At the time of the passage of the 1944 Federal Aid Act giving legal authority for establishment of a Secondary System of Federal Aid Routes, the Federal Aid Primary System in Arkansas had grown to a total of 5,100 miles. This mileage was far greater than could possibly be improved to the standards set for primary roads by the Public Roads Administration. In view of this, the Federal Aid Primary System was completely revised to include only the 3,489 miles of major routes shown on the Federal Aid map, Plate 6, in the back of this publication. The Federal Aid Secondary System established includes 6,037 miles of state highways, many of which were originally Primary Federal Aid Routes and 6,487 miles of county roads. The county roads included were selected with the approval of the county judge of each county. The approved mileage of the Federal Aid System of primary and secondary roads, shown by Plate 6, totals 16,013 miles. The approved mileage of primary and secondary highways in each county is shown in Table 21.

SECTION II

HIGHWAY FINANCE

THE FINANCIAL PICTURE

The close of the war found the State's system of roads and streets in the worst condition of the past ten years. The impact of heavy war traffic without the normal replacement construction and repair program had resulted in severe deterioration. Recent studies show that the State Highway System alone is "wearing out" at the rate of about \$6,000,000 annually and a proportionate deterioration is taking place on county roads and city streets. The Commission was faced with the problem of providing state matching funds for the post war Federal Aid program at the rate of approximately \$5,000,000 for the next three years and at the same time increasing the maintenance fund to around \$5,500,000 annually which is the minimum sum needed to maintain our mileage of State highways. The counties and cities were also facing the fact that they did not have funds to match the share of Federal Aid Funds allotted them.

Realizing the importance of adequate highway transportation service in the development of the State and the magnitude of the problem to be met in providing the necessary facilities, early in 1946 the Governor appointed a 34 member Highway Advisory Committee. This group was requested to determine the highway needs of the State, counties and municipalities, and to recommend ways and means for providing the necessary funds. This committee has put forth much time and effort on the highway problem and the members of the Highway Commission have given full cooperation in the studies made. The Ways and Means Sub-committee of the Highway Advisory Committee has filed two reports which were approved and adopted by the entire committee. Excerpts from these reports and a summary of the recommendations, which have the concurrence of the State Highway Commission, are set forth as follows:

A Summary of the Report of the Highway Advisory Committee

"The Ways and Means Committee is convinced beyond any doubt that streets, roads and highways must be given a high preference for action if the State is to advance rapidly economically. We, your Committee on Ways and Means, submit our conclusions and recommendations in connection with the maintenance and future construction of the highways of our State in line with the request of the Governor in his letters of appointment.

"The ideas and conclusions presented herewith are the result of considerable research from which we have eliminated wishful thinking, personal interest and personal prejudices. We respectfully submit that any conclusions reached by the Committee as a whole must encompass the factors we now present.

"Furthermore, after a comprehensive study it is a definite fact that the work needed upon roads, streets and highways cannot be accomplished in a short period of time. It is up to the citizenry to recognize this state of affairs. It will take patience, time and money to give the people of Arkansas the efficient system they so greatly need and desire. We have been unable to find a sound short cut to achieve the objectives necessary for the accomplishment of a comprehensive highway and road system. Furthermore, it is our conclusion that the people themselves should make the decision as to whether or not progress is to be made toward the correcting of the regrettable conditions."

* * * * *

"This Committee feels that the highway needs of our people cannot be viewed entirely through the eyes of the State Highway System, nor of the county roads, nor city streets; but it must be borne in mind that each of these systems is an integral part of our transportation facilities. Each of these facilities produces a per cent of our highway revenue. An accurate allocation of the per cent each system produces is difficult, but according to surveys the State highways carry approximately sixty per cent of the traffic, cities and towns twenty per cent and counties twenty per cent. Further studies may reveal some deviation from these percentages; how-

ever, based on travel studies and usages of the various roads and streets of each division, the percentages given above are equitable and fair."

* * * * *

"At no time has the income of Highway Department, counties or cities been adequate to provide for the highway needs. The State Highway System is deteriorating at the rate of approximately \$6,000,000 per year; city streets at a proportionate rate, and deterioration of county roads is occurring annually much greater than available maintenance and construction funds are provided. We, therefore, conclude that additional funds for all three agencies must be provided."

* * * * *

"In the final analysis it is for the people to say whether they prefer the present highway and street conditions to additional revenues, and whether they deem it the part of sound business policy to jeopardize the investment of millions of dollars represented by our roads and streets in preference to additional funds.

"The people of this State must make a decision; either accept the present situation under the inescapable fact that the highway situation will become worse than it is today, or be willing to provide additional funds in an effort to create a consistent betterment of our highway structure."

* * * * *

The recommendations made are briefed as follows:

1. That the plan adopted be on a "pay as you go" basis, and that expenditure of highway revenues be planned for a ten year period.
2. That a new basic law be redrafted for the Highway Department, streamlined to meet present day needs and which would provide for: (a) staggered terms for the Commissioners, (b) a uniform weight and speed law with adequate enforcement provisions, (c) the Highway Commission to have authority to include or remove roads from the State Highway System as conditions may require.
3. That efficiency and training requirements be established for technical employees of the Department.
4. That maintenance funds be increased to include outlays for equipment and supplies far in excess of any past years.
5. Highway Funds needed:
 - (a) The terms of the present Refunding Law, Act 4 of 1941, are a contract between the State and its bond holders which is inviolate.
 - (b) It is estimated that highway revenue for the bond year 1946-47 will yield \$22,000,000 and \$15,960,000 of this income is specifically committed by the Refunding Law. It is the studied opinion that a minimum of \$17,500,000 should be produced above the specific allocations. This would require the raising of approximately \$12,000,000 over and above the present anticipated income of \$22,000,000.
 - (c) That \$2,400,000 of this additional revenue be allocated to counties in addition to the present county turnback. Such funds to be distributed to the counties on a basis of $\frac{1}{2}$ equal shares, $\frac{1}{8}$ area, $\frac{1}{8}$ rural population, $\frac{1}{8}$ motor vehicle registration and $\frac{1}{8}$ county road mileage.
 - (d) That \$2,400,000 of the additional money raised be returned to towns and cities on the basis of population only.
 - (e) That the remaining added revenue raised go to the State Highway System, this fund to be divided into two equal amounts, one fund to be known as the "State Highway—County Allocation Construction Fund," and the other as the "State Highway Flexible Construction Fund." The first designated to be divided by the Highway Commission among the counties for construction upon State Highways upon the following basis: $\frac{1}{2}$ equal shares, $\frac{1}{8}$ area, $\frac{1}{8}$ total population, $\frac{1}{8}$ motor vehicle registration, and $\frac{1}{8}$ mileage of state highways. The re-

maining 50 per cent or the Flexible Construction Fund, is to be spent as the Highway Commission may find necessary for the benefit of the state system as a whole.

6. Suggested source of revenue:

The committee recommended the following as possible sources of revenue for raising the additional income requirements set forth: gasoline, car, truck and trailer registration fees; use tax; whiskey, wine and beer; soft drinks; chain stores; distillate and diesel fuel; and sales tax.

The Highway Advisory Committee has performed an excellent service for the State in its thorough study of the highway situation as related to all units of government. It is believed that a sound and logical approach to the problem has been made. It is hoped that the members of the General Assembly will give careful consideration to the views and recommendations of the committee. The personnel of the committee is as follows:

GOVERNOR'S HIGHWAY ADVISORY COMMITTEE

Appointed February 10, 1946

FIRST CONGRESSIONAL DISTRICT

Judge Cy Bond, Marion
W. W. Campbell, Forrest City
Chairman
Rufus Branch, Osceola
Nudy Arnof, McCrory

FIFTH CONGRESSIONAL DISTRICT

Judge Olen Fullerton, Morriston
V. D. Hill, Conway
Howard Stebbins, Little Rock
J. T. White, Clarksville

SECOND CONGRESSIONAL DISTRICT

Judge Forrest Jeffrey, Batesville
James Sloan, Black Rock
Jim Bland, Walnut Ridge
Ewing Pyeatt, Searcy

SIXTH CONGRESSIONAL DISTRICT

Judge Charles O. Smithers, Benton
John Ramsey, Malvern
W. R. Alsobrook, Star City
Hugh Benton, Fordyce

THIRD CONGRESSIONAL DISTRICT

Judge Fay Nelson, Mountain Home
Newt Hailey, Rogers
J. E. Gregson, Berryville
Joe Steele, Springdale

SEVENTH CONGRESSIONAL DISTRICT

Judge Carneal Warfield, Lake Village
Louis Hurley, El Dorado
Vice-Chairman
O. A. Graves, Hope
Jim Hurley, Warren

FOURTH CONGRESSIONAL DISTRICT

Judge R. P. Strozier, Fort Smith
Glenn Wallace, Nashville
Abe Collins, DeQueen
W. A. McKeown, Forester

EX OFFICIO MEMBERS

Wm. H. Sadler, Highway Commission

Hendrix Lackey, Resources and Develop. Comm.
Frank Storey, Fiscal Control Board
J. C. Baker, Highway Department
Neill Bohlinger, Highway Department

MOTOR VEHICLE IMPOSTS COLLECTED IN ARKANSAS
BY BOND YEARS, 1937-38 THROUGH 1946-47
INDICATING
GROSS AMOUNTS REQUIRED TO PROVIDE
NET AMOUNTS ALLOCATED BY ACT N° 4, ACTS OF 1941

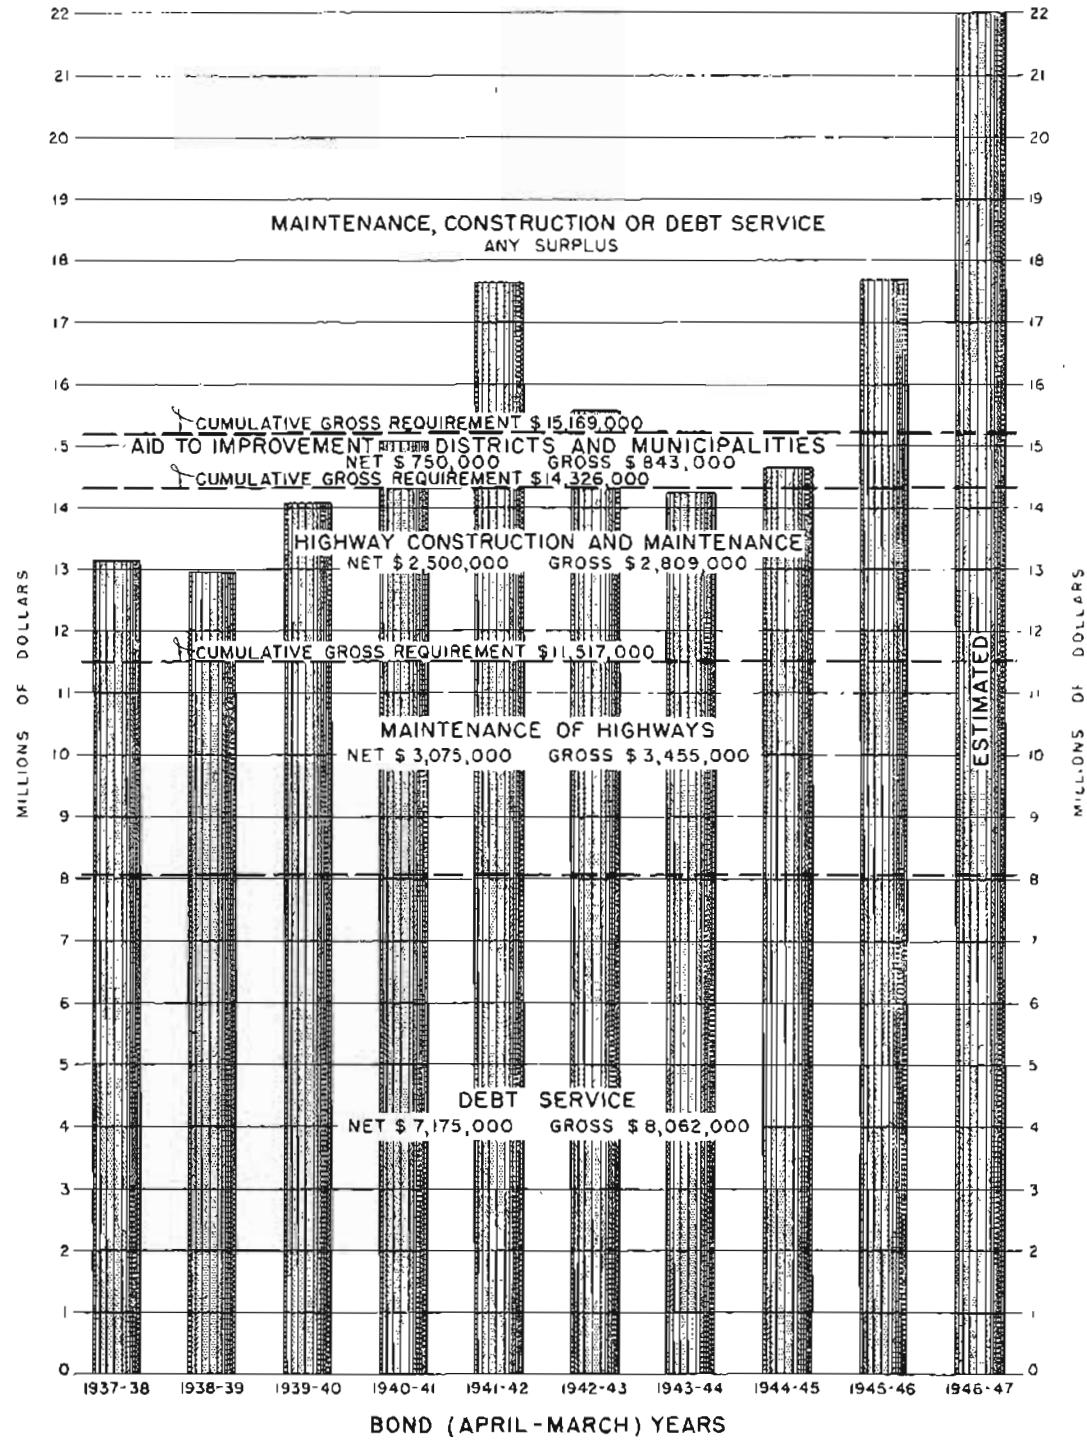

PLATE I

DISTRIBUTION OF HIGHWAY REVENUE

Income for highway purposes is derived from motor vehicle and motor fuel taxes. Under authority of various legislative enactments, these revenues are distributed as follows:

1. **Gross Revenues:** All collections by the Revenue Department are deposited in the State Treasury to the credit of the State Apportionment Fund.

2. **Charges:** Handling or collection cost has first priority. Under the stabilization law, Act 311 of 1945, all previous charges are consolidated and deducted in a lump sum from the State Apportionment Fund.

Cost of Collection and Auditing	This averaged 2.30 per cent for the past fiscal year as compared with 3.15 per cent under the former plan of handling.
------------------------------------	--

3. **County Highway Fund:** Turnback to the County Highway Fund has second priority.

A. 7.7 per cent of Net Fuel tax	
B. Net Revenue from $\frac{1}{4}$ c on each gallon of Motor Fuel taxed.	This allocation varies from year to year, but averaged 8.61 per cent of the gross income for the past seven Fiscal Years.

THE REMAINING 89 CENTS OF EACH DOLLAR COLLECTED CAN BE USED TO MEET THE STATE HIGHWAY FUND ALLOCATIONS, OR IN ORDER TO PROVIDE ONE DOLLAR FOR HIGHWAY PURPOSES ONE DOLLAR AND ELEVEN CENTS MUST BE COLLECTED. THE CHART MARKED PLATE 1 SHOWS BY HEAVY DASHED LINES THE GROSS AMOUNT FOR EACH PRIORITY. VERTICAL BARS INDICATE THE GROSS INCOME BY YEARS.

Gross income required to satisfy net allocations:

All Allocations	Net \$13,500,000	Gross \$15,169,000
-----------------	------------------	--------------------

4. **State Highway Fund:** After the above priorities have been satisfied, the balance is allocated from the State Apportionment Fund in accordance with the provisions of Act 4 of 1941, known as the Refunding Law. Over a period of seven fiscal years the net amount available has averaged 89.09 per cent of the gross collections.

Allocations

A. Debt Service.....	\$7,175,000	
Highway Maintenance.....	3,075,000	10,250,000
B. Highway Construction.....		2,500,000
C. Aid to Improvement Districts and Cities.....		750,000
		<u>\$13,500,000</u>
D. Construction, Maintenance or Debt Service.....		Surplus

FISCAL OPERATIONS

Fund Balances—The Department has operated under the 1941 Refunding law for five fiscal years and its advantages have been clearly demonstrated. State highway bonds have continued to gain favor as an excellent investment in the bond market. Because of the slow start on the Post War Construction program, a considerable balance of construction funds was on hand at the close of the biennium. However, over three million dollars of the balance shown below was obligated by road contracts as of June 30, 1946. The following cash fund balances are shown by Table 8-B as of June 30, 1946:

Debt Service Reserve Fund (Cash).....	\$ 967,971
Highway Construction Fund.....	7,012,947
Highway Fund (Surplus Unapprop.)	2,196,945

The debt Service Reserve Fund represents a contingent reserve established under the 1941 Refunding law, to be used only in the event current revenues are insufficient to meet the annual debt service requirements. That portion of the balance invested in State and U. S. Bonds, which amounts to \$4,470,200, is not included in the financial tables.

The Highway Construction Fund is derived from the regular allocation of \$2,500,000 from the 1941 Refunding Law plus any additional appropriations made from the Surplus Fund. During the biennium the appropriations totaled \$7,155,780.

The Highway Fund carries the unapportioned surplus over and above the specified allocations contained in Act 4 of 1941. The bond year ending March 31, 1946, was the first period since 1943 that the income exceeded the stipulated allocations of the Refunding Law.

TABLE 1
RECEIPTS AND DISBURSEMENTS OF THE STATE HIGHWAY DEPARTMENT
July 1, 1944 Through June 30, 1946

Balance, June 30, 1946.....			7,632,236.73
Total accounted for.....			\$19,019,792.33

Financial Statements—Table 1 is a condensed statement of the biennial receipts and disbursements of the Highway Department for all purposes from State funds. This table takes no account of the motor user revenues allocated and expended for (1) debt service, (2) aids and grants, or (3) miscellaneous expenditures; such information will be found in Tables 3 and 4. During the two year period the sum of \$10,654,957.54 was expended from State funds for all activities of the Department. The balance of \$7,632,236.73 represents the balances in the Maintenance and Construction Funds. The balance in the Highway Fund Surplus (See Table 8-B) is not included as this fund has not been appropriated.

Expenditures—State Funds	30,762,072.81
Purchase of Securities (not par value)	4,279,109.60
Disbursements State Funds	35,041,182.41
Disbursements Federal Funds	1,768,561.93
Total Disbursed	36,809,744.34
Balance, All Accounts	15,291,559.98
Total Accounted for	\$52,101,304.32

Table 2 is a condensed statement which accounts for all motor user revenues, miscellaneous income and Federal Aids for the biennium. This tabulation includes the receipts and disbursements shown in Table 1 and all other expenditures made for highway purposes. The balance of more than 15 million dollars is available for highway purposes but only \$9,829,000 was available for construction and maintenance as of that date, and 4½ million of this amount was encumbered by contracts as of December 1, 1946.

Analysis of Highway Income—Table 3 shows the revenue for highway purposes derived from each of the various sources for each year of the biennium. A detailed tabulation of the income by months is included in Table 10 of the appendix.

TABLE 3

4.	Drivers License Fees—Gross	189,140.67	243,734.33	432,875.00
5.	Auto In-Transit Fees—Gross	32,418.00	84,315.00	116,733.00
6.	Oil Inspection Fees—Gross	129,748.28	167,238.18	296,986.46
	Total Motor Users Imposts (Table 10)	15,398,060.79	19,650,062.76	35,048,123.55
7.	Miscellaneous Receipts	29,334.89	24,710.87	54,045.76
8.	Other Revenue—State Police (Unapportioned Fd.)	79,823.13	79,823.13
9.	Interest on Investments	53,247.32	69,573.27	122,820.59
10.	Sale of Securities (Debt Service Res. Fd.)	2,337,200.00	1,759,200.00	4,096,400.00
11.	From General Revenue Fund	107,757.05	107,757.05
	Total State Funds	\$18,005,423.18	\$21,503,546.90	\$39,508,970.08
FEDERAL FUNDS				
12.	Regular Federal Aid Fund	\$ 675,493.21	\$ 647,027.73	\$ 1,322,520.94
13.	Toll Bridge Reimbursement Fund	2,185.00	10,631.00	12,816.00
14.	Defense Highway Fund	150,254.86	282,183.10	432,437.96
	Total Federal Funds	\$ 827,933.07	\$ 939,841.83	\$ 1,767,774.90
	Total Receipts All Funds	\$18,833,356.25	\$22,443,388.73	\$41,276,744.98

Item 1, indicates the gross amount collected each fiscal year from the 6½ cent per gallon tax levied on motor vehicle fuel. The amount shown represents the total received by the State Treasurer from this source and deposited in the State Apportionment Fund.

Item 2, Auto License Fees, shows the gross amount collected for the registration of all classes of motor vehicles and trailers.

Item 3, Auto Division Fees, represents the gross income derived from chauffeurs' and extra dealers' licenses, transfers of title, duplication of lost license plates, duplicate registration cards and penalties.

Item 4, Drivers' License Fees, indicates the gross receipts from the sale of operators' licenses. The income is for the support of State Police and is considered as revenue for highway purposes.

Item 5, Auto Intransit Fees, represents the gross revenue derived from licenses issued for motor vehicles passing over State highways in the course of delivery from manufacturer to dealer. This income is credited to the Bridge Bond Retirement fund.

Item 6, Oil Inspection Fees, shows the gross amount collected for the inspection of petroleum products. This income is credited to the General Revenue Fund from which \$100,000 is paid to the County Aid Fund.

Item 7, Miscellaneous Receipts, includes such items as sales, bond forfeitures, motor carrier permits, testing charges and delinquent taxes from road and bridge improvement districts.

Item 8, Other Revenue, State Police. The income derived from drivers' license fees is insufficient for the operation of the State Police and all revenues credited to the Unapportioned Fund may be charged with a pro rata share of the additional amount needed for the operation of this agency. The amount shown for 1944-45 is the amount transferred to the State Police fund during that period from taxes other than motor vehicle imposts. After July 1, 1945, when Act 311 of 1945 became effective, this method of operation was no longer necessary.

Item 9, Interest on Investments, represents the interest from Debt Service funds invested in U. S. Government and State bonds.

Item 10, Sale of Securities. The Bond Refunding Board, from time to time, sells securities held as investment in order to reinvest the funds to better advantage; this is non-revenue income.

Item 11. Because of the low income during the war period, it was necessary to borrow from the General Revenue fund to meet part of the allocation to local improvement districts set out in the 1941 Refunding Law. This loan was repaid during 1945-1946.

Items 12, 13 and 14 represent the cash receipts remitted to the State Treasurer on reimbursement vouchers submitted for payment by the Department on the various types of Federal funds under agreement, together with any monies classed as revolving or trust funds. Each receipt is credited to the proper paying account for disbursement by the Highway Department.

Analysis of Disbursements—During the period covered by this report, expenditures for highway purposes from State and Federal funds totaled \$32,530,634.74; this figure excludes disbursements made for investment purposes from the Debt Service Reserve Fund. Expenditures under the term "highway purposes" include the seven general headings set out in Table 4 which is prepared to show the disposition of all motor users imposts. The expenditure from State Funds amounted to \$30,762,072.81 and of this amount only \$10,654,957.54 or 34.6 per cent was disbursed by the Highway Department. Debt service on highway bonds required 46.8 per cent of the total State funds spent. Local government units including counties, cities, and improvement districts received payments amounting to 13.5 per cent and the remainder of 5.1 per cent was expended for collection, auditing, State Police, and other miscellaneous allotments. The following analysis is given for each of the main headings of Table 4, and detailed tabulations of the disbursements are included in the appendix.

Item I, Collection, Auditing and Miscellaneous Charges.—Prior to the passage of Act 311 of 1945, the amount required for each of the items shown under this heading was deducted separately from the gross collection of motor users imposts monthly. This plan operated during the first year of the biennium. After the passage of the Revenue Stabilization Act, a pro rata share was deducted from all taxes collected and used for general governmental expense. Collection and other handling charges have dropped from 3.15 cents per dollar in 1944 to 2.30 cents during the past fiscal year.

TABLE 4
DETAILED SCHEDULE OF DISBURSEMENTS
State Highway Department and Affiliated Operations
July 1, 1944 Through June 30, 1946

Item No.	Item	Fiscal Year 1944-45	Fiscal Year 1945-1946	Total Two Years
STATE FUNDS				
I	Collection, Auditing and Miscellaneous Charges Deducted before Apportionment—			
1.	Cost of Collection.....	\$ 442,112.11	\$ 451,796.35	\$ 893,908.46
2.	Auditorial Fund	49,971.36	49,971.36
3.	Claims Paid	10.43	10.43
4.	State Police	45,176.87	45,176.87
	Total Item I (See Table 10).....	537,270.77	451,796.35	989,067.12
II	Miscellaneous			
1.	State Police, less Item I.4 (1944-45).....	219,658.81	302,183.83	521,842.64

FEDERAL FUNDS

VII

1	Regular Federal Aid Account:			
a.	Plans and Surveys	138,897.00	80,057.00	218,954.00
b.	War Emergency Relief	406,808.95	86,540.67	493,349.62
c.	Federal Aid Projects	77,013.76	345,013.54	422,027.30
d.	Ferry Operation (U. S. Eng. Reimb.)	53,523.70	47,133.59	100,657.29
e.	U. S. Engineers	26,392.81	23,037.08	49,429.89
f.	Factual Studies	40,906.77	37,262.53	78,169.30
	Sub-total	743,542.99	619,044.41	1,362,587.40
2.	National Defense Act of 1941			
a.	War Access Projects	142,408.42	251,706.50	394,114.92
3.	Toll Bridge Fund Account			
a.	Federal Aid Projects		11,859.61	11,859.61
	Total Item VII (Tables 8A and 8B)	885,951.41	882,610.52	1,768,561.93
	Total All Funds	\$17,521,651.90	\$19,288,092.44	\$36,809,744.34

Item II, Miscellaneous—Drivers License fees are committed for the support of the State Police, but this income has always proved insufficient and deductions were made in the old Unapportioned Fund to supplement this source. Under the Revenue Stabilization Law, the State Police Fund is derived from the General Revenue Fund, to which the Drivers License Fees and Oil Inspection Fees are now credited. The amount of Oil Inspection Fees credited to the General Revenue Fund in 1945-46 is the net collection less the \$100,000 paid to counties shown under Item IV 1. c. of Table 4.

Item III, Debt Service Operations, shows the amount expended for principal, interest and handling charges on the State Highway bonded indebtedness. During the biennium the principal was reduced \$6,044,000 by retirement of bonds.

Item IV, Aids and Grants to Local Governments. Motor user revenues returned to local governments include the county turnback of 7.7 per cent and $\frac{1}{4}$ cent per gallon of the motor fuel tax and under Act 311 of 1945, a \$100,000 grant from the General Revenue Fund in lieu of Oil Inspection Fees. Other local units receive \$750,000 per year under the terms of Act 4 of 1941, but because of the decline in revenues during the war, this allocation was not fully satisfied and it was necessary to borrow from the Highway Construction Fund and the General Revenue Fund. The aids and grants paid each county are shown by Tables 9-A and 9-B of the Appendix, and are summarized as follows:

Counties	\$2,932,587.04
Municipalities	410,388.62
Bridge Districts	478,394.65
Road Districts	330,414.35
Total	\$4,151,784.66

At the close of business June 30, 1946, the Local Bond and Interest Fund owed the Highway Construction Fund \$171,645.29.

Item V, Highway Department Appropriations. 1. Funds appropriated for construction during the biennium were made available as follows: Acts 363 and 365 of 1943, \$3,455,780.00 for 1944-45 and Acts 174 and 228 of 1945, \$3,700,000 or a total of \$7,155,780.00 for the two year period. A detailed analysis of the expenditures by projects is set out in Table 15 of the Appendix which is summarized in Item V. 1. a. through h. of Table 4. Under Act 4 of 1941 a portion of the Highway Construction fund is allotted for maintenance purposes as a supplement to the regular maintenance fund. Actual cash expenditures for construction were \$2,918,826.85 less than appropriations; this was due primarily to the suspension of construction during the first year of the biennium. 2. Funds appropriated for maintenance during the biennium and for claims actually paid totaled \$6,458,503.34 as compared with actual expenditures of \$6,418,004.39. Maintenance expenditures are summarized in Table 4, Item V. 2. a. through f. and a detail of expenditures by route and section is shown in Table 12.

Item VI, Investments.—This includes the fiscal transactions of the Debt Service Reserve Fund established as a contingent reserve for debt service under the provisions of Act 99 of 1941. The Board of Fiscal Control created by Act 311 of 1945, is authorized to invest monies held in the reserve fund in State Highway Bonds or in U. S. Government Bonds. As bonds retire or are sold, the proceeds are reinvested. The figures shown indicate the disbursements made for investment purposes during the past two years. As of June 30, 1946, the par value of bonds held in this account was \$4,470,200.

Item VII, Federal Funds—All monies received from the Federal Government for road purposes were administered through one of three accounts, and the expenditure from each account is shown under this item. Table 16 in the Appendix indicates the Federal funds spent on individual projects during each fiscal year.

State Highway Debt—At the end of the fiscal year, June 30, 1946, the State Highway bonded indebtedness stood at \$124,618,000. Future interest requirements amount to \$60,150,748.75. The annual debt service requirements are shown by Table 19 in the Appendix. A complete analysis of the highway debt service operations is contained in the biennial report prepared by the State Comptroller and only a brief resume is included in this publication.

THE 1944 FEDERAL AID ACT

Under Public Law 521 of the 78th Congress, approved December 20, 1944, the annual allotment of funds to Arkansas for post war construction is \$7,515,591 or a total allocation of \$22,546,773 for the three post war fiscal years. This money must be matched on a 50-50 basis except that ten per cent of the total allotment may be used for railroad grade crossing elimination without matching. The Public Roads Administration considers the funds obligated if a project agreement is signed within the 24 month period allowed and no funds will lapse if this is accomplished.

Funds allocated under the 1944 Federal Aid Act are divided for use annually as follows:

1. Projects on the Primary Federal Aid System, both urban and rural.....\$3,854,270
2. Projects on the Secondary Federal Aid System, including extensions of the system in towns of less than 5,000 population. Funds to be divided between state highways and county roads which comprise the approved Secondary System 3,103,100
3. Projects on the Federal Aid System in municipalities having a population of 5,000 or more..... 528,221

As of June 30, 1946, approximately \$3,160,000 of the first post war year allotment of Federal Aid Funds has been obligated by actual contract; as of December 1, 1946, this had been increased to a total of \$4,298,000. Table 14 of the Appendix shows the location of individual projects and the Federal and state funds obligated for each.

SECTION III OPERATIONS

DESIGN

*/ *
Surveys and Plans—The rigid requirements of modern highway construction necessitate far more detailed and technical surveys and plans than was necessary in the earlier years of highway construction. In line with the increased responsibilities, and to afford better supervision of the work, the Division of Surveys and Plans was divided during the biennium into the Surveys Division and the Plans Division. The two Divisions work together for the purpose of securing the best location possible for the highways, and then preparing plans for their construction in conformity with the volume and type of traffic which will use the facilities.

During 1943 and 1944 the Highway Commission, anticipating a post war construction program, adopted a Federal Aid Program of Surveys and Plans. This program was approved by the Public Roads Administration, and work on this project continued until the adoption and approval of the initial program for post war construction on December 17, 1945. Since that date, work has been concentrated on the completion of surveys and plans for the 1946 and 1947 construction programs. Although it has been necessary to make minor changes in surveys and alterations in plans to conform to stage construction or change in job length, it was possible to utilize a large part of the work done on the surveys and plans program during the war. The following work has been performed during 1945-46:

Type	Projects	Length
Surveys	115	748.6
Preliminary Plans	45	266.7
Completed Plans	80	633.9

The present status of the original Surveys and Plans program set up in 1943 is as follows:

Status	Projects	Miles	Estimated Cost
Preliminary Plans	65	512.7	\$17,500,000
Completed Plans	112	928.1	27,000,000

Upon approval of the county Federal Aid Secondary System, the Highway Department has been making the surveys and preparing the plans for county projects at actual cost where a county does not have an adequate engineering staff. Design standards for County Secondary Construction were drawn up and adopted during the biennium.

Testing of Materials—The performance of our highways during the past few years under the wear and tear of heavier wheel loads has emphasized the importance of testing operations in the design of highway projects. Soil surveys are made on each proposed construction project and laboratory tests are made on all the soils encountered on the project. The soil test data and recommendations as to the selection of soils or corrective measures required to improve sub-grade conditions are submitted to the Plans Division. During 1945 and 1946 soil surveys were made on 58 projects totaling 540 miles.

Recent developments in the use of soil stabilization for highway construction have broadened the use of such methods in this state. This type of work involves mixing asphalt or portland cement with the natural soil in the sub-grade and has decided economic advantages in those sections of the state where materials such as stone or gravel must be transported for long distances. Such work requires extensive soils investigation and detailed laboratory testing to determine whether or not soils are suitable for stabilization, and if suitable, the quantity of stabilizing agent to be used. During the two years complete preliminary work was done on three soil stabilization projects totaling 33.4 miles.

Local materials are available in many sections of the state and economy demands that these materials be utilized to as great extent as possible. Prior to the completion of plans the surrounding country near each project is scouted, test holes dug, samples taken for test, and agreements

are made with the owners of suitable deposits for the use of the material. This information is all given to the Plans Division where it is used for design purposes and shown on the plans for the information of bidders.

In addition to the above activities, the Division of Materials and Tests samples, inspects, and tests all materials which go into the construction of road and bridge projects. Field inspectors are stationed on all large projects with small portable laboratories. Materials that require extensive laboratory tests are sampled and these samples forwarded to the central laboratory. The following testing operations were performed by the central laboratory during the period covered by this report:

Type of Material	Number of Tests	Type of Material	Number of Tests
Asphalt Mixtures	80	Gravel	425
Asphalt.....	712	Paint	35
Cement	92	Sand	48
Concrete Culvert Pipe.....	9017 Lin. Ft.	Soil	2125
Concrete Cylinders	235	Steel	48
Creosote Oils	8	Stone	100
Culvert Metal	19	Water	3

CONSTRUCTION

Road Construction—The Highway Department organization places the administration of highway construction under a central organization called the Construction Division, which is charged with the responsibility of supervising the manner of performance and rate of progress on all highway construction projects, from the time work order is issued until final completion and acceptance of the project.

During the first year of this biennium, a large part of the personnel normally engaged in construction work was assigned to other divisions of the Department and were engaged primarily in work connected with preparation for the post-war construction program. Construction projects undertaken in 1945 consisted of two access roads to the Shumaker Ordnance plant near Camden, the placing of bituminous surface on two miles of State Highway No. 60 west of Conway, and the placing of traffic service gravel on 765 miles of roads on six highway routes at locations where the additional gravel was considered necessary to keep the roads serviceable through the winter months.

The post-war program began to reach the construction stage early in 1946 in spite of innumerable obstacles, difficulties and delays. At the close of the biennium, June 30, 1946, twenty-four road contracts had been awarded from the post-war Construction Funds, and by December 1, 1946, the total had increased to forty-three projects for a total contract cost of \$7,362,582. This work was performed in thirty-two counties on thirty-three different state highway routes in an effort to carry out the announced policy of connecting the gaps in the most heavily traveled highways as rapidly as possible. A full description of each job awarded, its location and contract cost is shown by Table 20, and the total amount of Federal and State funds committed for each project is shown in Table 14; therefore, only a brief description of construction types, mileage and construction costs is given herein:

	Miles	Cost
Grading, Gravel Type Base and Bituminous Surface.....	102	\$3,336,780
Grading and Gravel Base.....	75	1,519,170
Gravel Base and Bituminous Surface.....	63	1,131,180
Grading and Minor Drainage Structures.....	22	348,625
Grading, Soil Cement Stab. Base and Surface Treatment.....	17	391,265
Gravel Base, Sand-Cement Surface.....	12	333,930
Grading, Bituminous Stab. Base Surface Treatment.....	17	225,140
County Secondary Projects (6 Contracts).....	10	76,492
		\$7,362,582

PRICE TRENDS IN HIGHWAY CONSTRUCTION

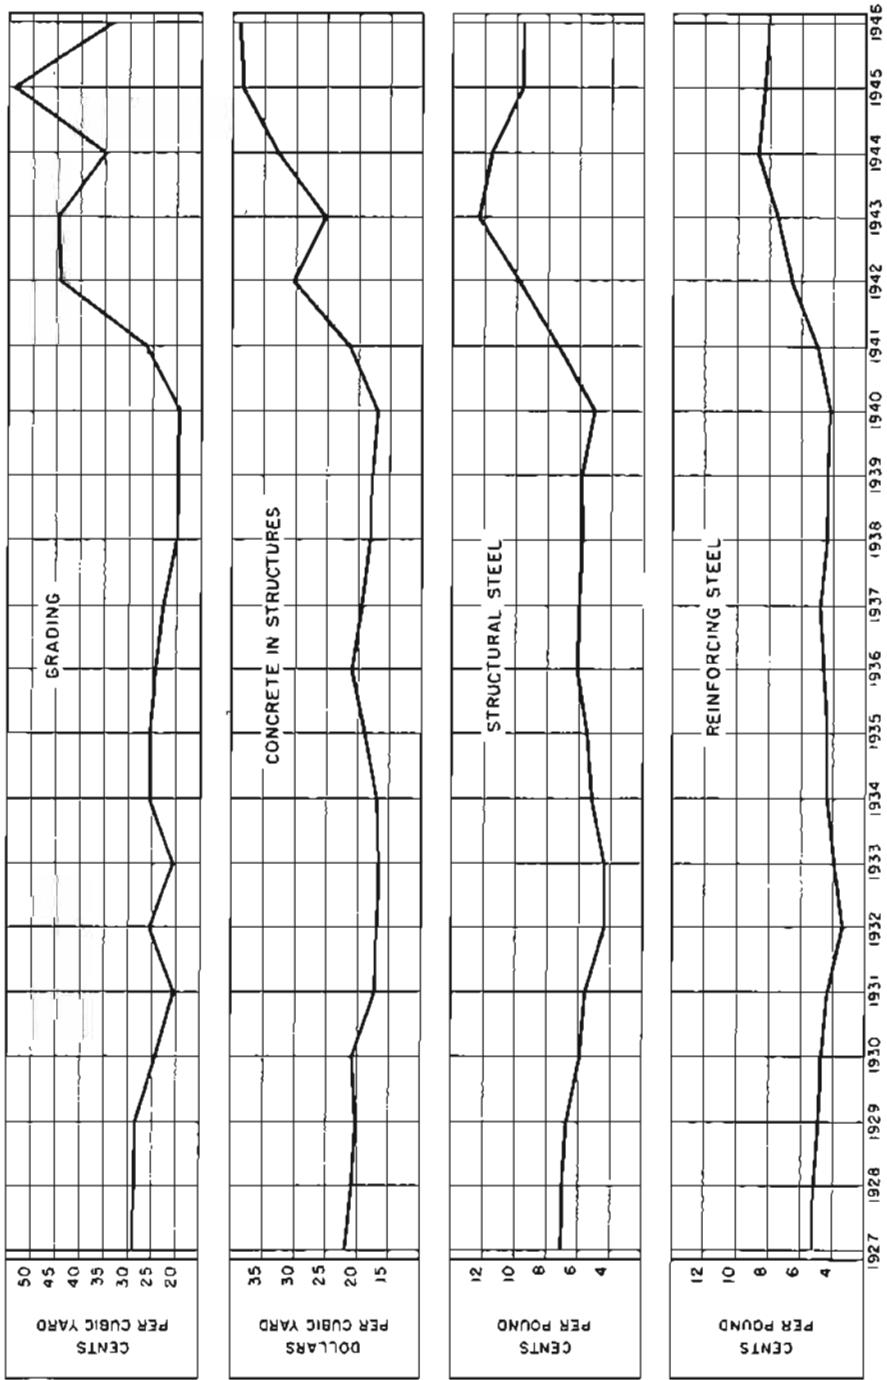

PLATE 2

Some of the projects included in the foregoing summary will not be completed during this 1946 construction season; most of the uncompleted work is bituminous surfacing on which operations will be suspended with the advent of rainy, cold and generally unfavorable weather.

The estimated amount of highway construction work that can be done with available appropriations has been sharply reduced, owing to increased costs involved in this type of construction work. The general conditions prevailing in the highway construction field are, in a large measure, common to the problems of all who have been engaged in any line of business during this two year period. To set out the matter of increased costs more clearly, a chart, marked Plate 2, has been prepared which indicates the rise in cost of certain construction items.

The Construction Division is also faced with a problem that is readily understood by every business man or organization that has been operating during this biennium—that of obtaining and keeping capable personnel. Many of the most efficient and dependable employees with years of service with the Department, have returned from the war and drifted to other fields where better salaries were offered and more security for the future was visualized. Every effort is being made to keep as many competent men as possible and to prepare them for the acceptance of heavier duties and greater responsibilities that lie ahead in the carrying out of what seems certain to be a substantially large highway construction program.

Bridge Construction—The State Highway System includes some 3,400 bridges of 20 feet or more with an aggregate length of 431,000 feet or almost 82 miles. One half of this number are 20 years old or older, and 680 located on rural highways are less than 16 feet wide. Almost 2100 of our bridges with a total length of 46 miles need to be replaced, rebuilt or widened at a total estimated cost of \$30,500,000. The magnitude of our investment in bridges can be better visualized when it is stated that the highway system averages 44 feet of bridge for each mile of highway.

In spite of the need for replacing obsolete and hazardous structures, the amount of bridge work placed under contract and constructed during this period has been very limited. Bid prices on this class of work have practically doubled due to increased wages, shortage and inefficiency of labor, increased prices of materials, and uncertainty in deliveries. The reluctance of contractors to bid on certain types of bridge work is shown by the fact that on six projects advertised no bids were received; also, all bids were rejected on three jobs because of excessive cost. For these same reasons, construction progress has been very slow on those contracts which have been awarded.

The State Highway Commission has continued to cooperate with the Tennessee Department of Highways and Public Works and the Public Roads Administration in the construction of a bridge across the Mississippi River at Memphis. Contract for Part No. 1 of this project was awarded in July, 1945. This consists of the construction of the seven main river piers and the abutment at the Memphis end. This contract is about 85 per cent complete. In October, 1946, bids were received and contracts awarded for Part No. 2, which consists of the substructure of the Arkansas approach, and for Part No. 5 which consists of earthwork at the end of the Arkansas approach. This work is well under way. Shortage of structural steel has prevented the awarding of contracts and the beginning of construction of the steel superstructure.

The Bridge Division has made good progress in the preparation of plans for proposed structures. The following summary shows the status of plans and surveys:

Status	Number	Length
Surveys Completed	85	19,158 Feet or 3.63 Miles
Plans completed	91	17,707 Feet or 3.35 Miles
Plans completed before the war and revised	9	6,707 Feet or 1.27 Miles

The total estimated cost of bridges for which plans have been completed and the projects ready to award is \$4,238,000.00.

The following tabulation indicates the bridges constructed or placed under contract from July 1, 1944 through June 30, 1946:

Route	Location	Type	Length Feet	Width Feet	Cost
Jobs suspended during the war period, now completed in 1946					
65	Lake Village to Eudora	Concrete-Steel	487.25	28.0	\$ 88,000.00
45	White River and Richland Creek	Concrete-Steel	875.42	28.0	127,510.00
Contracts Awarded					
70	DeQueen-West	Concrete and Steel	692.75	26.0	147,230.00
79	Temporary Ouachita River Bridge	Timber	589.17	19.0	51,296.00
79	Permanent Ouachita River Bridge	Concrete and Steel	1000.22	26.0	178,750.00
67	Little Missouri River Relief	Concrete	1040.42	26.0	81,262.00
143	Rivervale Bridge	Timber	692.33	19.0	32,272.00
134	Main Line Ditch	Timber	199.80	15.0	9,620.32
1-E	Paragould-Marmaduke	Concrete and Steel	244.50	26.0	47,568.00
79	L'Anguille River, Deck	Concrete and Steel	571.25	28.0	92,388.00
85	Elaine-Snow Lake	Timber	697.00	15.0	32,587.00
				7,090.11	\$888,483.32

MAINTENANCE

Operations—During the fiscal year of 1945-46 the Department spent for maintaining the 9,753 miles of highways on the state system \$2,996,423 exclusive of administrative cost, claims paid, tire stocks and bridge material stock on hand, as shown in Table 12. The above amount represents an annual average maintenance expenditure of \$307 per mile or about one dollar per mile for each working day. This figure represents an increase of \$11 over the \$296 per mile spent for maintenance during the calendar year of 1945. The latest available figure for the U. S. average for all states was \$631 per mile; more than twice the Arkansas average. On the basis of the National average, the annual maintenance appropriation for our highway system would be \$6,154,000.

At the end of the war almost every route on the highway system was in need of extensive maintenance work. The maintenance Division had anticipated that upon cessation of hostilities there would be an immediate improvement in the facilities for maintenance, but this was not the case. Competent labor, materials and equipment all still continue to be difficult to obtain, and then only at a greatly increased cost. As an example, the average hourly wage paid maintenance workers in 1941 was 33 cents, while in October 1946 this average figure had increased to 62 cents; the cost of many material items has increased proportionately. Under our fixed maintenance appropriation of approximately \$3,075,000 annually these increased costs necessarily reduce the amount of labor and material that can be used in the maintenance of the highway system.

Thirty-four per cent (34%) or 3132 miles of state highways lying outside municipal boundaries is paved, but this pavement includes 162 miles 20 years old or older, 1332 miles 13 to 19 years old and 1638 miles 12 years old or less. The deterioration of many miles of our older concrete highways has become a serious problem to the Maintenance Division. Heavy loads on concrete roads, with poor sub-grade soil have started expansion joints to "pumping" and unless corrected, this pumping action soon results in broken slabs. In order to help remedy this trouble the Maintenance Division has purchased nine new mud-jack machines this year to add to the three formerly used. In addition to mud-jack work, extensive repairs have been made to concrete pavements by cutting out broken slabs, rebuilding the sub-grade and replacing with new concrete. Several sections of highway have received this treatment, but much of this type of work remains to be done.

Considerable improvement has been made to bituminous surfaced highways during 1946. About seventy miles have been resurfaced and approximately 600 miles have been sealed, most of which was done by contract.

At the end of the war the signs and markers on the State Highways were in very poor condition. Between August 1945 and November 1946, the Maintenance Division placed 11,000 signs and markers of various kinds at a total expense of almost \$50,000. A majority of this replacement work was necessary because of deliberate and wanton destruction of signs and markers. It is estimated that the annual sign cost from vandalism alone would construct one mile of low type bituminous surfacing each year. Even after the extensive sign program of the past 18 months many of our highways are far from adequately marked.

The following tabulation shows the mileage of highways maintained in each of the 10 districts, and the expenditures actually charged to routes and sections for each year of the biennium:

TABLE 5

District	Highway Mileage	1944-1945	1945-1946	Total
1	870.08	\$ 246,179.91	\$ 276,410.06	\$ 522,589.97
2	997.44	277,310.41	268,359.79	545,670.20
3	831.87	246,585.86	234,616.43	481,202.29
4	759.64	212,510.43	217,139.57	429,650.00
5	1,099.53	312,303.98	302,840.15	615,144.13
6	1,047.59	258,849.28	288,116.54	546,965.82
7	945.79	216,463.59	276,238.27	492,701.86
8	887.71	218,066.73	202,378.06	420,444.79
9	1,222.52	237,276.82	269,569.64	506,846.46
10	1,090.91	275,264.66	327,574.05	602,838.71
Totals	9,753.08	\$2,500,811.67	\$2,653,242.56	\$5,164,054.23

Equipment—The lack of sufficient equipment and equipment repair parts has been the greatest handicap in getting a full maintenance program in operation. All possible new equipment has been purchased, and all available items allocated to the Department under its priority have been purchased from war surplus stock; yet, at the close of the biennium June 30th, 1946 there remained a back log of \$175,000 in unfulfilled equipment orders. Repair parts are actually harder to obtain at the present time than during the war period and the price of such parts has increased 25 per cent over 1941 figures. Much time and ingenuity have been required to keep equipment in operation.

The inventory of equipment on hand as of June 30, 1946 and its estimated value at the beginning and close of the period are shown by the following table:

TABLE 6

Items	On Hand July, 1944	Purchased 1945-1946	Retired 1945-1946	On Hand July 1, 1946	ESTIMATED VALUE	
					1944	1946
Graders—Pull Type.....	86	0	23	63	\$ 19,125.00	\$ 13,915.00
Pickup Trucks.....	74	20	10	84	18,971.00	29,199.00

					\$ 813,486.00	\$1,156,875.00

Other Work—Although the Division of Traffic and Safety was discontinued at the beginning of the biennium, the collection and analyses of accident statistics was continued until March 1946 as a function of the Maintenance Division. This work is now under the supervision of the State Police Department. Table 7 has been included to give a summary of the fatal accident records to June 30, 1946.

ECONOMIC STUDIES

During the last year of the war and the days that followed, the work of the Division of Statistics and Analyses has again assumed a peace time pattern. Although handicapped by inability to secure skilled personnel, the Division has continued the compilation of the regular monthly and annual statistical reports on highway income, vehicle registration, motor fuel consumption and road mileage. The number of traffic counts made on roads in all areas of the State have been increased and seasonal counts on the streets of many cities have been added to the list. Repeat loadometer surveys were made in 1945 and 1946, and the information obtained added to our knowledge of peace time loading practices.

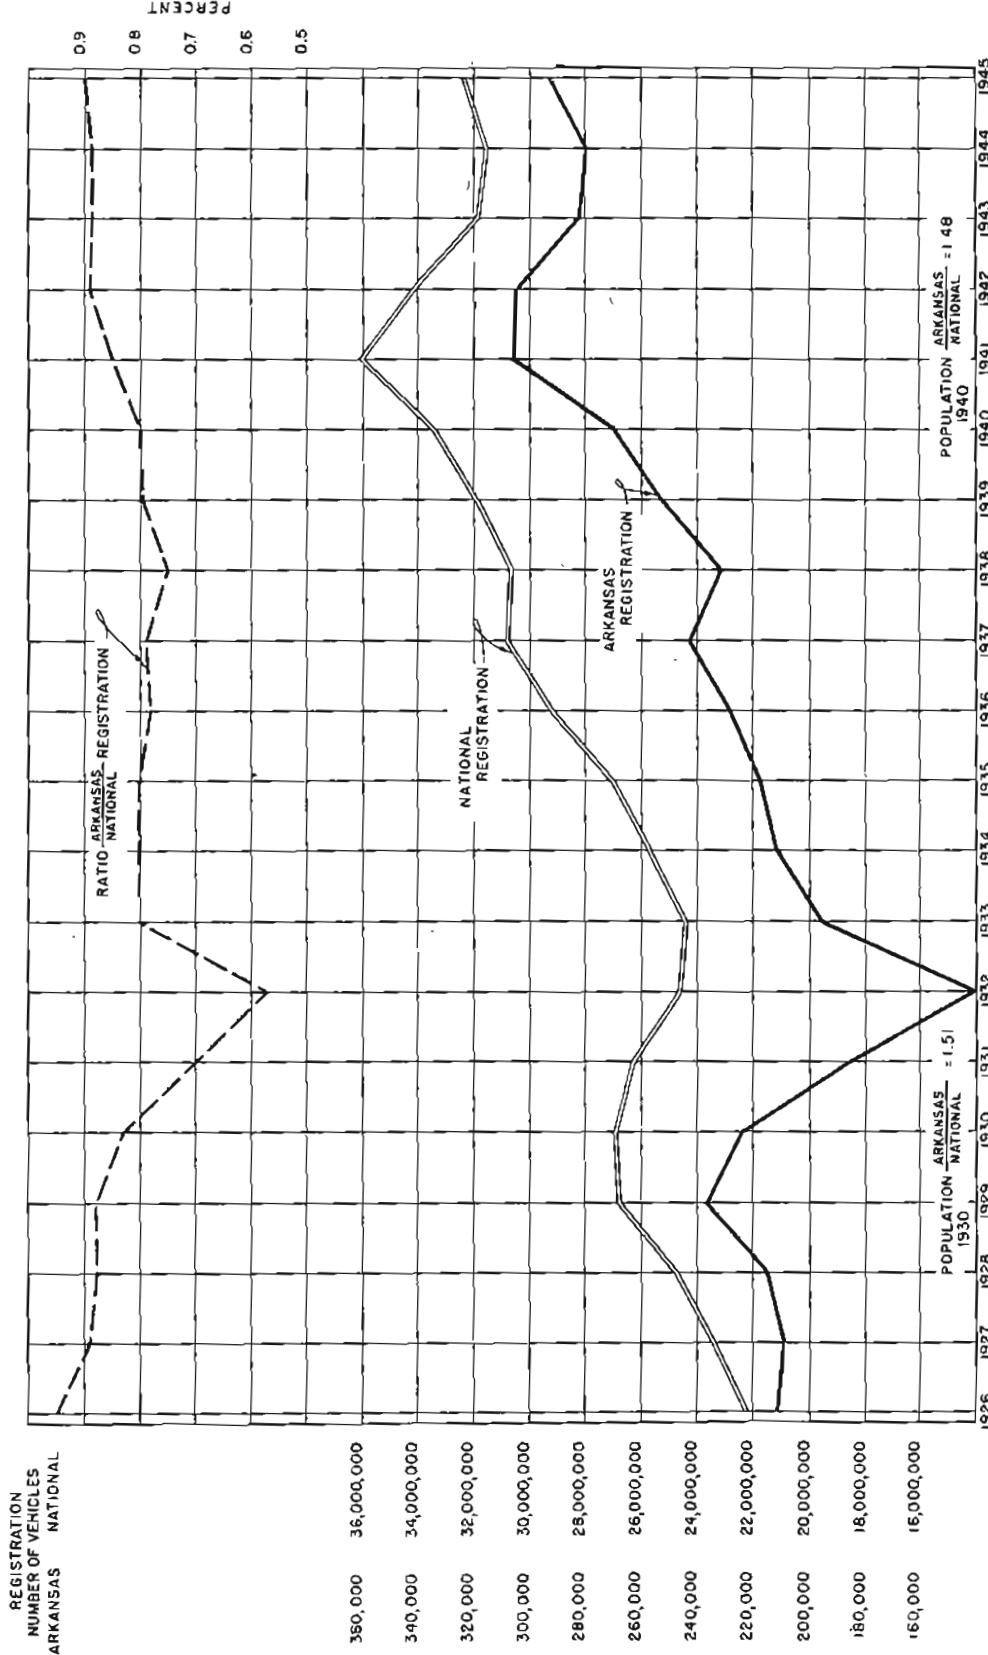

The re-inventory of all highways and rural roads has been resumed with the streets of small towns included and, from the data obtained, new maps have been made for three counties. It is planned to continue this work at an increased tempo until all counties are remapped. The maps of many other counties have been revised and enlarged aerial photographs of a number of cities have been added to the files.

Other accomplishments of the Division during the biennium may be summarized as follows:

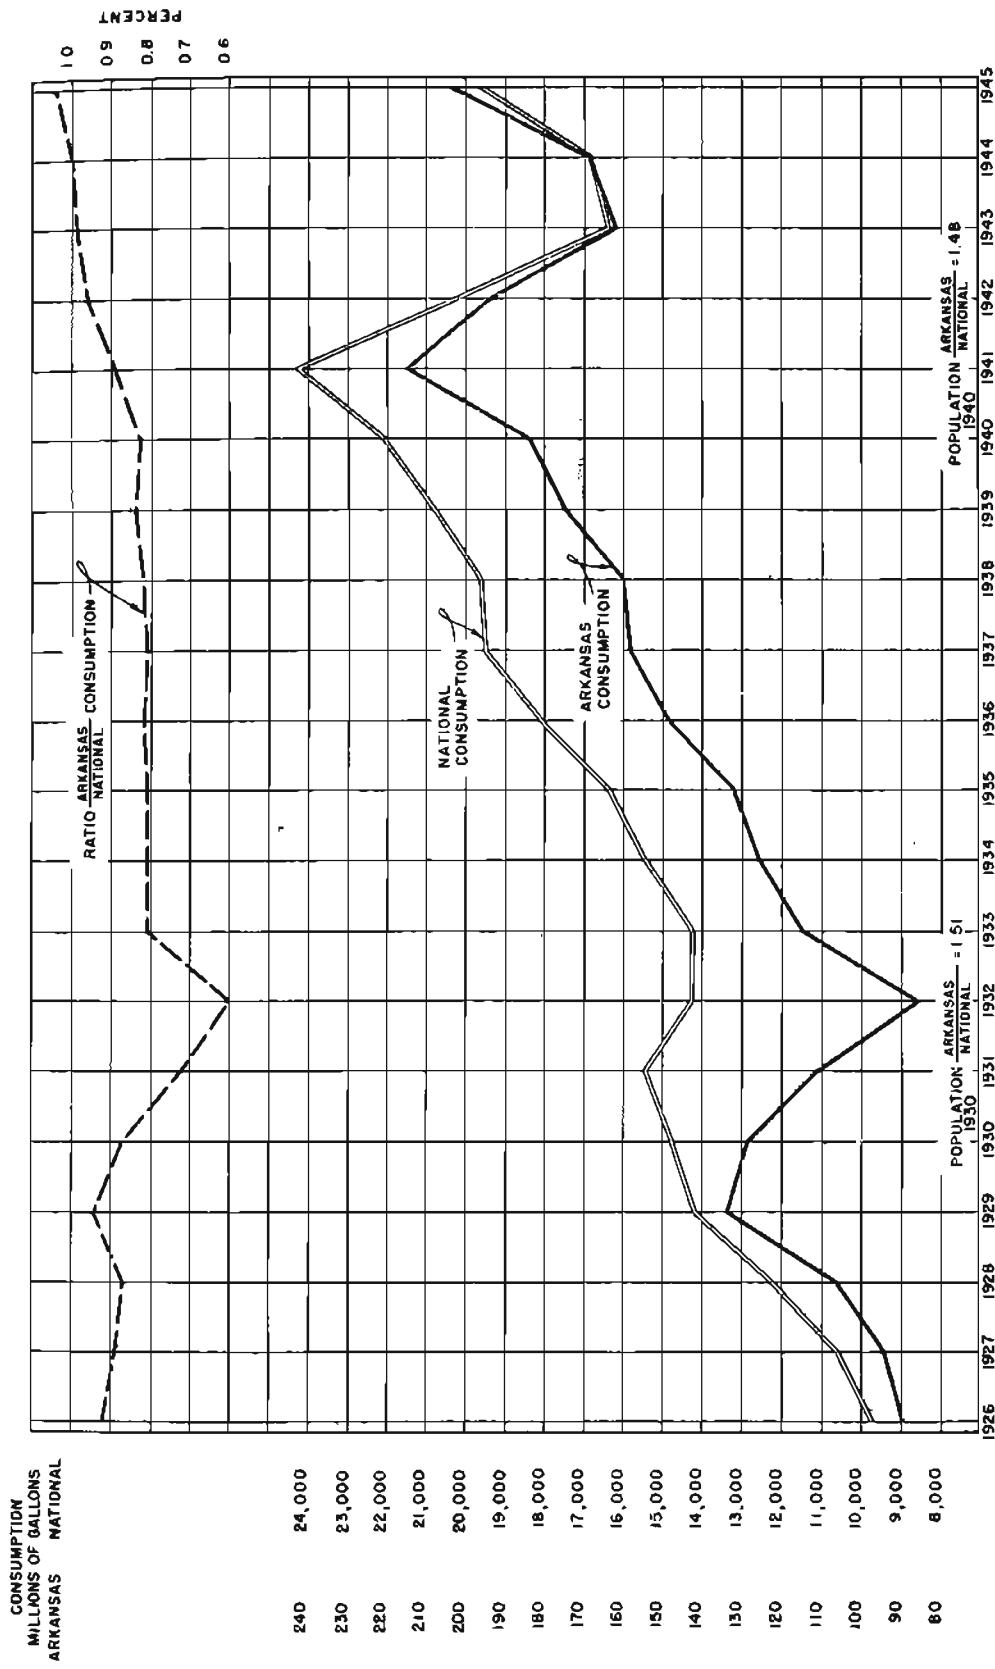

1. Compiled the data and directed the work of revising the Federal Aid Primary and Federal Aid Secondary Systems. This included the preparation of a system map, county maps for each county and complete description of each route.
2. A large amount of special data has been developed for use of the Governor's Highway Advisory Committee. All information in the files of the Department was made available to the Committee, if desired, and a large force was required to summarize, tabulate and assemble such data.
3. During 1946 an entirely new service map was drawn and was printed in colors for general distribution. Over thirty thousand copies of the map have been distributed as of December 1, 1946.
4. Much time and effort has been given to obtaining, analyzing and furnishing up to date traffic data.

It is interesting to note that the traffic volume has been increasing each month since gas rationing was removed in September, 1945. During the latter months of this year, it has exceeded the previous peak found during the army maneuvers in 1941. Traffic on the main highways this fall is 50 to 100 per cent higher than that of 1939 and on the local roads it has increased from 25 to 40 per cent.

SECTION IV

APPENDIX

In order to preserve the continuity of the text, the number of tables included in the narrative portion of the report has been held to the minimum and the majority of the statistical tabulations grouped in this section for ready reference. A summary review of highway legislation enacted by the 55th General Assembly is included at the end of this section.

LIST OF TABLES

- 8-A Schedule of Balances, Receipts and Disbursements by Funds, 1944-45.

* Deducted from County Turnback for Road Improvement Districts—Pulaski County \$21,081.25, Saline \$61,87; total \$21,438.12 Total disbursements through Road Bond Redemption Fund, \$174,223.63, minus \$21,143.12 equals \$163,080.51.

¹ Paid June 19, 1946 Not Due Until July 1, 1946 but paid from 1945-46 Appropriation.

² \$13,536.78 Paid June 19, 1946 but paid from 1945-46 Appropriation.

³ Repayment of loan to General Revenue Fund.

TABLE 12
STATE HIGHWAY MAINTENANCE FUND
Summary of Expenditures for Highway Maintenance and Betterment
July 1, 1944 through June 30, 1946

ITEM	1944-1945	1945-1946	Biennium
Administrative (See Distribution).....	\$ 270,588.21	\$ 289,353.98	\$ 559,942.19
Maintenance			
Districts (See Recapitulation).....	2,500,811.67	2,663,242.56	5,164,054.23
State Wide Operations			
Calcium Chloride.....	1,040.40
Cutter Striping.....	14,648.24	8,347.51
Little Rock Asphalt Plant.....	(—) 762.72 ¹	7,104.71
Magnet Truck Operation.....	2,590.80	381.24
Mud Jacking.....	8,969.90	7,574.10
Bridge Material Stock.....	31,000.00
Sub total.....	26,486.62	54,407.56	80,894.18
Equipment and Upkeep			
Central Shop Equipment			
Repairs.....	101,656.09	114,398.88
Central Shop Stock and Tire Purchases.....	8,662.43	33,062.35
Purchase of New Equipment.....	96,380.55	195,373.71
Repairs and Addition to			
Central Shop Buildings.....	10,756.44
Sub total.....	217,455.51	342,834.94	560,290.45
Total Vouchers Issued.....	3,015,342.01	3,349,839.04	6,365,181.05
Claims Paid by Board of Fiscal Control.....	52,823.34	52,823.34
Total Expenditures.....	\$ 3,015,342.01	\$ 3,402,662.38	\$ 6,418,004.39

¹ Represents value of stock on hand purchased with funds from previous fiscal year and charged as a cash expenditure to the various districts as used.

Note: Maintenance expenditures do not include charges for rental or depreciation on equipment.

DISTRIBUTION OF ADMINISTRATIVE COSTS			
	1944-1945	1945-1946	Biennium
Commission Expenditures and Per Diem.....	\$ 4,161.70	\$ 4,353.28	\$ 8,514.98
Salaries	162,878.65	150,497.68	313,376.33
Travel Expense.....	9,861.49	11,774.39	21,635.88

¹ Approved Federal aid routes in some instances are projected relocations which do not follow existing roads and the route mileage will not agree with existing highway mileage. Primary Federal aid routes as approved March 5, 1946; Secondary Federal aid routes pending.									

**A REVIEW OF HIGHWAY LEGISLATION IN ARKANSAS
DURING THE BIENNIUM, ACTS OF 1945**

Highway Commission

Act 42. Amends Act 349 of 1941 and Section 6479 of Pope's Digest to provide for appointment by the Governor of a 10 member State Highway Commission and a Director of Highways. Redefines the counties comprising the 10 Maintenance Districts.

Motor Vehicles

Act 64. Amends Sec. 3 (e) Act 386, 1941 to provide for the collection of Gross Receipt Taxes on the sale of new and used automobiles.

Act 60. Provides for making reciprocal agreements between Arkansas and other States concerning the operation of Motor Vehicles.

Act 117. Requires proper display of license tags.

Act 221. Provides that the time for collecting motor vehicle license fees shall be from January 1st through January 31st, each year and that in no event shall the time be extended.

Motor Fuel

Act 166. Amends Sec. 7, Act 383 of 1941 as amended by Act 250 of 1943 to provide for licensing dealers in motor fuel.

Act 210. Amends Sections 19 and 20, Act 11 Special Session of 1934 fixing specification for motor fuels.

Road Improvement Districts

Act 198. Amends Act 63, 1931 relative to assessment of lands in road improvement districts.

Debt Service

Act 104. Provides that in event of default in the payments of Bridge and Road Improvement District Bonds, Treasurer shall make advance transfers from State Highway Construction and Maintenance Fund, to be repaid from first revenues received.

Act 307. Provides, under similar conditions, for transfer from the General Revenue Fund to aid Municipal Bond Retirement Fund.

Act 25. Provides for payment from the Bridge Bond Retirement Fund of that part of Outstanding County Funding Bonds representing County Warrants issued for building Bridges on State Highways.

Counties

Act 21. Allocates federal funds received on account of land leased for flood control: 80 per cent to school districts, 20 per cent to county roads.

Miscellaneous

Act 217. Amends Sections 7, 8, 9, Act 124, 1939, regarding methods of licensing contractors.

Act 232. Amends Sec. 1, Act 199 of 1931. Empowers State Boards and Institutions to donate right-of-way for roads and streets.

Act 24. Ratifies acceptance of conveyance of part of Greenville Bridge to State.

Act 52. Segregates the funds received by State for roads destroyed by Norfork Reservoir for purpose of replacing these roads.

Act 311. Revenue Stabilization Law: Provides method of financing all the necessary functions of the State Government without levying new taxes and reallocates State Revenues on an Equitable basis. Creates a "State Apportionment Fund," requires that practically all revenues and grants be deposited in this fund; these deposits to be known as "Gross Revenues." Requires Treasurer to deduct \$110,000 monthly, prorated proportionately against each contributory revenue, to be transferred to the General Revenue Fund and used to pay in part the general expenses of the State.

The balances are separated into:

- (1) "General Revenues for allocation" and
- (2) "Special revenues for allocation" depending on their source and previous commitments.

The "general revenues for allocation" are allocated to the various funds itemized in the bill and provision is made for retiring the bonded debt other than highway obligations.

The "special revenues for allocation" are:

(a) Highways Revenues which are distributed as at present. Changes in fund names are: "Highway Refunding Bonds Sinking Fund" to "Highway Bond and Interest," "Highway Construction and Maintenance Fund" to "Highway Construction Fund," "Road Bond Redemption Account" and "Bridge Bond Retirement Fund" to "Local Bond and Interest Fund."

(b) A new fund called "County Aid Fund" receives the proportion of the gasoline tax now distributed to the counties, the severance taxes, land redemptions, nomination fees, the ad valorem taxes on intercounty truck and bus companies and certain general revenues.

(c) Earnings and collections of other named Boards, Commissions and Divisions.

Drivers License fees are classed as general revenues. Oil Inspection fees are credited to the General Revenue Fund, but \$100,000 of the general revenues deposited in the County Aid Fund is provided in lieu of the Oil Inspection fees.
