WRONG-WAY CRASH STUDY
INTERSTATES AND FREEWAYS
CALENDAR YEAR 2014

September 2016
Wrong-Way Crash Study
Calendar Year 2014

Act 641 of the 87th Arkansas General Assembly requires the Arkansas State Highway and Transportation Department (AHTD) to analyze all wrong-way crashes on the Interstates and other freeways with full control of access and to prepare an annual report. Furthermore, the Act requires that based on the findings in the report, the AHTD is to implement appropriate countermeasures when warranted to reduce the possibility of wrong-way crashes. Accordingly, Minute Order 2009-035 was adopted by the Arkansas State Highway Commission on February 25, 2009. This Minute Order authorized an annual analysis of wrong-way crashes on these routes to determine if additional traffic control devices are warranted. Copies of Act 641 and Minute Order 2009-035 are shown in Appendices A and B respectively.

An annual analysis of wrong-way crashes identifies the locations to be investigated. The investigation consists of reviewing the signing and striping for compliance with the minimum requirements of the Manual on Uniform Traffic Control Devices (MUTCD) as well as compliance with current AHTD signing practices. The minimum requirements as specified in Section 2B.41 of the MUTCD 2009 Edition include the following:

1. At least one “ONE WAY” sign for each direction of travel on the crossroad shall be placed where the exit ramp intersects the crossroad.
2. At least one “DO NOT ENTER” sign shall be conspicuously placed near the downstream end of the exit ramp in positions appropriate for full view of a road user starting to enter wrongly from the crossroad.
3. At least one “WRONG WAY” sign shall be placed on the exit ramp facing a road user traveling in the wrong direction.

Current AHTD practice is to install the minimum required signs and markings from the MUTCD plus additional optional signs and markings (see Figure 1). Current AHTD practice also includes the installation of oversized signs as shown in Table 2B-1 in the MUTCD. This practice enhances the conspicuity of the signage and provides added protection to ensure that the minimum required signage is in place should one of the sign assemblies be damaged or destroyed.

The analysis of 2014 crash data showed that eight wrong-way crashes occurred on the Interstates and other freeways with full control of access in 2014 (see Figure 2). The crash analysis was conducted on only those crashes that involved a vehicle entering or traveling in the wrong direction on the controlled access facility. Crossover crashes were not included. These crashes are summarized in Table 1 whereas Table 2 shows a comparison of the 2014 wrong-way crashes with 2012 and 2013.

Following the crash analysis, an investigation of the locations where the wrong-way crashes occurred was completed in August 2016.

Consequently, a total of 10 interchange off-ramps were reviewed that resulted in the following findings:

1. Four off-ramps were in compliance with the MUTCD minimum requirements as well as AHTD standards. Six of the ramps (Exit 142, on I-40; Exit 30, on I-30; Exits 39, 41 and 42 on I-530; and Exit 3 on I-540) had the correct type of signs to be in compliance with the MUTCD, but some of the signs were the incorrect size per AHTD standards. One interchange was missing some additional signs needed to be in compliance with current AHTD signing practices.

2. All of the sign corrections are scheduled to be implemented by statewide signing crews as soon as possible.

Findings of this investigation are also summarized in Table 3. Crash location maps, along with diagrams of the interchanges, investigation reports and crash reports are included in Appendix C.

APPENDIX A

Act 641
Stricken language would be deleted from and underlined language would be added to the law as it existed prior to this session of the General Assembly.

**Act 641 of the Regular Session**

**A Bill**

**HOUSE BILL 1961**

By: Representative Pyle

**For An Act To Be Entitled**

AN ACT TO REQUIRE THE ARKANSAS STATE HIGHWAY AND TRANSPORTATION DEPARTMENT TO ANALYZE WRONG-WAY CRASHES ON INTERSTATES AND OTHER FREeways THAT ARE A PART OF THE STATE HIGHWAY SYSTEM; TO IMPLEMENT WARRANTED AND FEASIBLE COUNTERMEASURES THAT MAY REDUCE THE POSSIBILITY OF WRONG-WAY CRASHES; AND FOR OTHER PURPOSES.

**Subtitle**

TO REQUIRE THE ARKANSAS STATE HIGHWAY AND TRANSPORTATION DEPARTMENT TO ANALYZE WRONG-WAY CRASHES ON INTERSTATES AND OTHER FREeways THAT ARE A PART OF THE STATE HIGHWAY SYSTEM.

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

SECTION 1. Arkansas Code Title 27, Chapter 65, Subchapter 1 is amended to add an additional section to read as follows:

27-65-144. Additional annual reporting.

(a) The Arkansas State Highway and Transportation Department shall analyze all reported wrong-way crashes on interstate highways and other freeways that are a part of the state highway system to determine whether the installation of additional traffic control devices is warranted and feasible in order to reduce the possibility of future wrong-way crashes.

(b) Any additional traffic control devices installed under subsection

(c) A person may not file a legal action as a result of the implementation of any recommendations made from studies conducted under this section.

SECTION 2. DO NOT CODIFY. This act shall begin with a reporting period in 2009 and annually thereafter.

APPROVED: 3/27/2009
APPENDIX B

Minute Order 2009-035
MINUTE ORDER

District: Statewide
County: Statewide
Category: Commission Policy

WHEREAS, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users of 2005 (SAFETEA-LU) requires each state to develop and implement a Strategic Highway Safety Plan (SHSP) that involves a comprehensive and collaborative approach to highway safety; and

WHEREAS, Minute Order 2007-091 adopted Arkansas' SHSP as a planning guide for improving highway safety in the State; and

WHEREAS, one emphasis area identified in Arkansas' SHSP is to reduce the number of head-on crashes; and

WHEREAS, head-on crashes occur from time to time on Interstates and other freeways as a result of wrong-way travel on these fully access controlled routes.

NOW THEREFORE, the Director is authorized to conduct an annual analysis, beginning with the 2009 reporting period, of all reported wrong-way crashes on Interstate highways and other freeways that are a part of the state highway system to determine whether the installation of additional traffic control devices is warranted and feasible to reduce the possibility of future wrong-way crashes.

FURTHERMORE, any additional traffic control devices installed as a result of the annual analysis will conform to the Manual on Uniform Traffic Control Devices for Street and Highways, which is approved by the Federal Highway Administrator as the National Standard in accordance with Title 23 U.S. Code, Sections 109(d), 114(a), 217, 315, and 402(s), 23 CFR 655, and 49 CFR 1.48(b)(8), 1.48(b)(33), and 1.48(c)(2), and is the manual adopted by the Arkansas Highway Commission pursuant to Arkansas Code Annotated Section 27-52-104.

FEB 25 2009
APPENDIX C

Crash Location Maps, Photos of Interchanges, and Crash Reports
Maintenance Review
The driver accessed Northbound I-540 the wrong way from Springhill Rd. at Exit 3. The driver proceeded southbound until the Arkansas River Bridge and was involved in a head on serious injury collision.

Maintenance Review Results
The northbound interchange at Exit 3 (Springhill Rd.) was reviewed which consists of a slip ramp over to a two-way frontage road. Pavement markings and signs were in place and in conformance with MUTCD standards. The 24X30 Wrong Way signs will be replaced with 30X42 and additional One-Way signs will be added with other modifications to be in compliance with AHTD standards. These modifications will be implemented by statewide crews as soon as possible.
**Maintenance Review**
The driver accessed the I-40 westbound lanes at Exit 278 along the one-way frontage road. The driver proceeded eastbound in the westbound lanes and was involved in a sideswipe opposite direction crash with a westbound vehicle at the 277.87 mile marker.

**Maintenance Review Results**
The westbound interchange at Exit 278 was reviewed. The pavement markings and signs were in place and in compliance with MUTCD as well as AHTD standards. However, additional One-Way signs and Do Not Enter signs will be added. These modifications will be implemented by statewide forces as soon as possible.
**Maintenance Review**
The driver accessed I-30 westbound and travelled east at Exit 30. The driver was involved in a serious injury head on crash in Hempstead County at Log Mile 30.

**Maintenance Review Results**
All interchanges at Exit 30 were reviewed. All signs and pavement markings were in compliance with MUTCD standards. The Yield and One Way signs will be replaced with larger signs to be in compliance with AHTD standards. All above modifications will be completed by statewide forces as soon as possible.
**Maintenance Review**

The driver accessed I-530 northbound possibly at Exit 39, or Exit 41, or Exit 42, and traveled south in the northbound lanes. The driver was involved in a sideswipe opposite direction crash at the 42.23 log mile.

**Maintenance Review Results**

The interchanges at Exits 39, 41, and 42 were reviewed. All pavement markings and signs were in place and in conformance with MUTCD and AHTD standards. However, Wrong Way signs will be replaced with larger signs and additional signs will be added to these interchanges. These modifications will be performed by statewide crews as soon as possible.
Maintenance Review
The driver accessed I-30 westbound at Exit 126 and traveled east on I-30 in the westbound lanes. The driver was involved in a sideswipe opposite direction collision at log mile 127.34.

Maintenance Review Results
The interchange at Exit 126 was reviewed and pavement markings and signs were in conformance with MUTCD and AHTD standards. However, some signs will be replaced due to age and condition and new signs will be installed due to construction of new driveways on the frontage roads. These modifications will be implemented by statewide forces as soon as possible.
Maintenance Review
The driver accessed I-40 westbound at Exit 142 at the signal and traveled east on I-40 in the westbound lanes. The driver was involved in a sideswipe opposite direction collision at log mile 142.14.

Maintenance Review Results
The interchange at Exit 142 was reviewed and pavement markings and signs were in conformance with MUTCD standards. A few signage modifications and additions will be implemented on the eastbound exit ramp. These modifications will be implemented by statewide forces as soon as possible to be in compliance with AHTD standards.
Maintenance Review
The driver accessed Highway 67 southbound at Exit 3 and traveled north on Highway 67 in the southbound lanes. The driver was involved in a sideswipe opposite direction collision at log mile 3.89. After the collision the driver continued northbound without stopping.

Maintenance Review Results
The interchange at Exit 3 was reviewed and pavement markings and signs were in conformance with MUTCD and AHTD standards. However, some signs will be replaced due to age and condition and some additional signs will be added due to new access driveways that have been added. These modifications will be implemented by statewide forces as soon as possible.
Maintenance Review
The driver accessed I-30 westbound at Exit 123 and traveled east on I-30 in the westbound lanes. The driver was involved in a head on collision at log mile 124.20.

Maintenance Review Results
The interchange at Exit 123 was reviewed and pavement markings and signs were in conformance with MUTCD and AHTD standards. Some signs will be replaced due to age and condition and some new signs will be installed due to construction of some new
access driveways. These modifications will be implemented by statewide forces as soon as possible.
