TIER 3 CATEGORICAL EXCLUSION

ARDOT JOB NUMBER 040774
FAP NUMBER NHPP-0072(57)
BENTON CO. LINE - BUTTERFIELD COACH RD. (S)
HIGHWAY 412, SECTION 2
WASHINGTON COUNTY

Submitted Pursuant to 42 U.S.C. 4332(2)
By the
U.S. Department of Transportation
Federal Highway Administration
And the
Arkansas Department of Transportation

February 2019

3/4/2019
Date of Approval

Randal Looney
Environmental Coordinator
Federal Highway Administration
The Environmental Division reviewed the referenced project and has determined it falls within the definition of the Tier 3 Categorical Exclusion as defined by the ARDOT/FHWA Memorandum of Agreement on the processing of Categorical Exclusions. The following information is included for your review and, if acceptable, approval as the environmental documentation for this project.

The purpose of this project is to rehabilitate Highway 412 in Washington County. The scope of the work consists of milling and overlaying/inlaying some sections with hot mix asphalt. Other sections are to receive an ultra-thin bonded wearing course. Total length of the project is 14.03 miles. It extends from the Benton County Line to Butterfield Coach Road in Washington County. All work will be completed within the existing right of way. A project location map is enclosed.

There are no relocations, wetlands, or cultural resources associated with this project. Field inspections found no evidence of existing underground storage tanks or hazardous waste deposits. The State Historic Preservation Officer clearance is enclosed.

Based upon the ARDOT'S Policy on Highway Traffic Noise Abatement, a noise analysis is not required for this project. The project does not involve the construction of new through or auxiliary lanes, or expose noise sensitive land uses to a new noise source. In compliance with federal guidelines, local authorities will not require notification.

The official species list obtained through the US Fish and Wildlife Service’s (USFWS) Information for Planning and Consultation website lists 10 species potentially affected by the proposed project. The project should have no effect on the following species due to limited scope of the project (mill and inlay of existing roadway), lack of habitat, and distance to known populations; gray bat (Myotis grisescens), northern long-eared bat (Myotis septentrionalis), Indiana bat (Myotis sodalis), Ozark big-eared bat (Corynorhinus townsendii ingens), Piping Plover (Charadrius melodus) and Missouri bladderpod (Physaria filiformis).

ARDOT has determined the mill and inlay may affect, but is not likely to adversely affect, the following species; Ozark cavefish (Amblyopsis rosae), cave crayfish (Cambarus aculabrum), Neosho Mucket (Lampsilis rafinesqueana), and Rabbitsfoot (Theliderma cylindrica). USFWS concurrence was received on February 4, 2019.

The project will not have a discharge of dredged or fill material into waters of the United States, therefore no Section 404 permit will be required.

This project has been determined to generate minimal air quality impacts for Clean Air Act criteria pollutants and has not been linked with any special mobile source
air toxic (MSAT) concerns. As such, this project will not result in changes in traffic volumes, vehicle mix, basic project location, or any other factor that would cause a meaningful increase in MSAT impacts of the project from that of the no-build alternative.

No other adverse environmental impacts were identified. The checklist used to verify consideration of potential environmental impacts is enclosed.
February 6, 2019

Ms. Stacy Hurst
Arkansas Historic Preservation Program
1100 North Street
Little Rock, Arkansas 72201

RE: Job Number 040774
Benton Co. Line – Butterfield
Coach Rd. (S)
Route 412, Section 2
Jackson County

Dear Ms. Hurst:

A Project Identification Form (PIF) for the referenced project is enclosed. Please review for concurrence with the findings of my staff. If you have any questions or require additional information, contact Scott Smallwood of my staff at (501) 569-2038.

Sincerely,

Brenda Price
Division Head
Environmental Division

Arkansas State Historic Preservation Officer

2/7/2019
Mr. John Fleming  
c/o Mickey Matthews  
Arkansas Department of Transportation  
10324 Interstate 30  
Little Rock, Arkansas  72209

Dear Mr. Fleming:

The U.S. Fish and Wildlife Service (Service) is responding to your request dated January 31, 2019, regarding Arkansas Department of Transportation (ArDOT) Job 040774, mill and inlay of Hwy 412 in Washington County, Arkansas. The project was described and assessed as follows (abbreviated):

The project is a mill and inlay of Hwy 412 in Washington County from approximately the Benton County Line to Springdale. The project will involve the existing road surface. (The IPAC list and the FHWA Programmatic BO consistency letter was attached.) The project should have no effect on the following species due to limited scope of the project, lack of habitat, and distance to known populations; Gray Bat (Myotis grisescens), Northern Long-eared Bat (Myotis septentrionalis), Indiana Bat (Myotis sodalis), Piping Plover (Charadrius melodus), and Missouri Bladderpod (Physaric filiformis).

Implementation of Best Management Practices and the addition of the attached special provision will minimize potential effects to the aquatic and karst species. ArDot has determined the mill and inlay may affect, but is not likely to adversely affect, the following species; Ozark Cavefish (Amblyopsis rosae), Cave Crayfish (Cambarus aculabrum), Neosho Mucket (Lampsilis rafinesqueana), and Rabbitsfoot (Theliderma cylindrica).

Due to the limited scope of the action (i.e., mill and inlay/paving existing roadway), minimal to no adjacent habitat effect, distance to known species locations, the standard special provision for sediment control, and the special provision for water pollution control, the Service concurs with the determination of "may affect, not likely to adversely affect" for Cave Crayfish, Ozark Cavefish, Neosho Mucket, and Rabbitsfoot. No further consultation regarding these species or any of the species identified within the assessment is necessary at this time.

If you have any questions regarding our response or if you need additional information, please contact Lindsey Lewis at (501) 513-4489 or lindsey_lewis@fws.gov.

Sincerely,

[Signature]

Melvin L. Tobin  
Field Supervisor
IPaC Record Locator: 347-15110949

January 31, 2019

Subject: Consistency letter for the '040774 Benton Co. Line - Madison Co. Line (Sel. Secs.)’ project (TAILS 04ER1000-2019-R-0351) under the revised February 5, 2018, FHWA, FRA, FTA Programmatic Biological Opinion for Transportation Projects within the Range of the Indiana Bat and Northern Long-eared Bat.

To whom it may concern:

The U.S. Fish and Wildlife Service (Service) has received your request dated to verify that the 040774 Benton Co. Line - Madison Co. Line (Sel. Secs.) (Proposed Action) may rely on the revised February 5, 2018, FHWA, FRA, FTA Programmatic Biological Opinion for Transportation Projects within the Range of the Indiana Bat and Northern Long-eared Bat (PBO) to satisfy requirements under Section 7(a)(2) of the Endangered Species Act of 1973 (ESA) (87 Stat.884, as amended; 16 U.S.C. 1531 et seq.).

Based on the information you provided (Project Description shown below), you have determined that the Proposed Action will have no effect on the endangered Indiana bat (Myotis sodalis) or the threatened Northern long-eared bat (Myotis septentrionalis). If the Proposed Action is not modified, no consultation is required for these two species.

For Proposed Actions that include bridge/structure removal, replacement, and/or maintenance activities: If your initial bridge/structure assessments failed to detect Indiana bats, but you later detect bats during construction, please submit the Post Assessment Discovery of Bats at Bridge/Structure Form (User Guide Appendix E) to this Service Office. In these instances, potential incidental take of Indiana bats may be exempted provided that the take is reported to the Service.

If the Proposed Action may affect any other federally-listed or proposed species and/or designated critical habitat, additional consultation between the lead Federal action agency and this Service Office is required. If the proposed action has the potential to take bald or golden eagles, additional coordination with the Service under the Bald and Golden Eagle Protection Act may also be required. In either of these circumstances, please advise the lead Federal action agency for the Proposed Action accordingly.
The following species may occur in your project area and are not covered by this determination:

- Cave Crayfish, *Cambarus aculabrum* (Endangered)
- Gray Bat, *Myotis grisescens* (Endangered)
- Missouri Bladderpod, *Physaria filiformis* (Threatened)
- Neosho Mucket, *Lampsilis rafinesqueana* (Endangered)
- Ozark Big-eared Bat, *Corynorhinus (=Plecotus) townsendii ingens* (Endangered)
- Ozark Cavefish, *Amblyopsis roae* (Threatened)
- Piping Plover, *Charadrius melodus* (Threatened)
- Rabbitsfoot, *Quadrula cylindrica cylindrica* (Threatened)
Project Description

The following project name and description was collected in IPaC as part of the endangered species review process.

Name

040774 Benton Co. Line - Madison Co. Line (Sel. Secs.)

Description

Mill and Inlay.
Determination Key Result

Based on the information you provided, you have determined that the Proposed Action will have no effect on the endangered Indiana bat and/or the threatened Northern long-eared bat. Therefore, no consultation with the U.S. Fish and Wildlife Service pursuant to Section 7(a)(2) of the Endangered Species Act of 1973 (ESA) (87 Stat. 884, as amended 16 U.S.C. 1531 et seq.) is required for these two species.

Qualification Interview

1. Is the project within the range of the Indiana bat\([1]\)?

   \[1\] See Indiana bat species profile

   Automatically answered

   Yes

2. Is the project within the range of the Northern long-eared bat\([1]\)?

   \[1\] See Northern long-eared bat species profile

   Automatically answered

   Yes

3. Which Federal Agency is the lead for the action?

   A) Federal Highway Administration (FHWA)

4. Are all project activities limited to non-construction\([1]\) activities only? (examples of non-construction activities include: bridge/abandoned structure assessments, surveys, planning and technical studies, property inspections, and property sales)

   \[1\] Construction refers to activities involving ground disturbance, percussive noise, and/or lighting.

   No

5. Does the project include any activities that are greater than 300 feet from existing road/rail surfaces\([1]\)?

   \[1\] Road surface is defined as the actively used [e.g. motorized vehicles] driving surface and shoulders [may be pavement, gravel, etc.] and rail surface is defined as the edge of the actively used rail ballast.

   No
6. Does the project include *any* activities **within** 0.5 miles of an Indiana bat and/or NLEB hibernaculum\(^1\)?

[1] For the purpose of this consultation, a hibernaculum is a site, most often a cave or mine, where bats hibernate during the winter (see suitable habitat), but could also include bridges and structures if bats are found to be hibernating there during the winter.

*No*

7. Is the project located **within** a karst area?

*Yes*

8. Will the project include *any* type of activity that could impact a **known** hibernaculum\(^1\), or impact a karst feature (e.g., sinkhole, losing stream, or spring) that could result in effects to a **known** hibernaculum?

[1] For the purpose of this consultation, a hibernaculum is a site, most often a cave or mine, where bats hibernate during the winter (see suitable habitat), but could also include bridges and structures if bats are found to be hibernating there during the winter.

*No*

9. Is there *any* suitable\(^1\) summer habitat for Indiana Bat or NLEB **within** the project action area\(^2\)? (includes any trees suitable for maternity, roosting, foraging, or travelling habitat)

[1] See the Service’s [summer survey guidance](#) for our current definitions of suitable habitat.

[2] The action area is defined as all areas to be affected directly or indirectly by the Federal action and not merely the immediate area involved in the action (50 CFR Section 402.02). Further clarification is provided by the [national consultation FAQs](#).

*Yes*

10. Will the project remove *any* suitable summer habitat\(^1\) and/or remove/trim any existing trees **within** suitable summer habitat?

[1] See the Service’s [summer survey guidance](#) for our current definitions of suitable habitat.

*No*
11. Does the project include activities **within documented Indiana bat habitat**\(^{[1][2]}\)?

   \(^{[1]}\) Documented roosting or foraging habitat – for the purposes of this consultation, we are considering documented habitat as that where Indiana bats and/or NLEB have actually been captured and tracked using (1) radio telemetry to roosts; (2) radio telemetry biangulation/triangulation to estimate foraging areas; or (3) foraging areas with repeated use documented using acoustics. Documented roosting habitat is also considered as suitable summer habitat within 0.25 miles of documented roosts.

   \(^{[2]}\) For the purposes of this key, we are considering documented corridors as that where Indiana bats and/or NLEB have actually been captured and tracked to using (1) radio telemetry; or (2) treed corridors located directly between documented roosting and foraging habitat.

   *No*

12. Does the project include activities **within documented NLEB habitat**\(^{[1][2]}\)?

   \(^{[1]}\) Documented roosting or foraging habitat – for the purposes of this consultation, we are considering documented habitat as that where Indiana bats and/or NLEB have actually been captured and tracked using (1) radio telemetry to roosts; (2) radio telemetry biangulation/triangulation to estimate foraging areas; or (3) foraging areas with repeated use documented using acoustics. Documented roosting habitat is also considered as suitable summer habitat within 0.25 miles of documented roosts.

   \(^{[2]}\) For the purposes of this key, we are considering documented corridors as that where Indiana bats and/or NLEB have actually been captured and tracked to using (1) radio telemetry; or (2) treed corridors located directly between documented roosting and foraging habitat.

   *No*

13. Does the project include maintenance of the surrounding landscape at existing facilities (e.g., rest areas, stormwater detention basins)?

   *No*

14. Does the project include wetland or stream protection activities associated with compensatory wetland mitigation?

   *No*

15. Does the project include slash pile burning?

   *No*

16. Does the project include *any* bridge removal, replacement, and/or maintenance activities (e.g., any bridge repair, retrofit, maintenance, and/or rehabilitation work)?

   *No*
17. Does the project include the removal, replacement, and/or maintenance of any structure other than a bridge? (e.g., rest areas, offices, sheds, outbuildings, barns, parking garages, etc.)

   No

18. Will the project involve the use of temporary lighting during the active season?

   No

19. Will the project install new or replace existing permanent lighting?

   No

20. Does the project include percussives or other activities (not including tree removal/trimming or bridge/structure work) that will increase noise levels above existing traffic/background levels?

   No

21. Are all project activities limited to actions that DO NOT cause any stressors to the bat species, including as described in the BA/BO (i.e. activities that do not involve ground disturbance, percussive noise, temporary or permanent lighting, tree removal/trimming, nor bridge/structure activities)?

   Examples: lining roadways, unlighted signage, rail road crossing signals, signal lighting, and minor road repair such as asphalt fill of potholes, etc.

   Yes

22. Will the project raise the road profile above the tree canopy?

   No

23. Are all project activities consistent with a No Effect determination in this key?

   Automatically answered

   Yes, all project activities are limited to actions that DO NOT cause any stressors to the bat species as described in the BA/BO
Determination Key Description: FHW A, FRA, FTA
Programmatic Consultation For Transportation Projects
Affecting NLEB Or Indiana Bat

This key was last updated in IPaC on March 16, 2018. Keys are subject to periodic revision.

This decision key is intended for projects/activities funded or authorized by the Federal Highway Administration (FHWA), Federal Railroad Administration (FRA), and/or Federal Transit Administration (FTA), which require consultation with the U.S. Fish and Wildlife Service (Service) under Section 7 of the Endangered Species Act (ESA) for the endangered Indiana bat (Myotis sodalis) and the threatened Northern long-eared bat (NLEB) (Myotis septentrionalis).

This decision key should only be used to verify project applicability with the Service’s February 5, 2018, FHWA, FRA, FTA Programmatic Biological Opinion for Transportation Projects. The programmatic biological opinion covers limited transportation activities that may affect either bat species, and addresses situations that are both likely and not likely to adversely affect either bat species. This decision key will assist in identifying the effect of a specific project/activity and applicability of the programmatic consultation. The programmatic biological opinion is not intended to cover all types of transportation actions. Activities outside the scope of the programmatic biological opinion, or that may affect ESA-listed species other than the Indiana bat or NLEB, or any designated critical habitat, may require additional ESA Section 7 consultation.

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies endangered, threatened, proposed, and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 et seq.). This letter only provides an official species list and technical assistance; if you determine that listed species and/or designated critical habitat may be affected in any way by the proposed project, even if the effect is wholly beneficial, consultation with the Service will be necessary.

If you determine that this project will have no effect on listed species and their habitat in any way, then you have completed Section 7 consultation with the Service and may use this letter in your project file or application.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found on our website.

Please visit our website at http://www.fws.gov/arkansas-es/IPaC/home.html for species-specific guidance to avoid and minimize adverse effects to federally endangered.
threatened, proposed, and candidate species. Our web site also contains additional information on species life history and habitat requirements that may be useful in project planning.

If your project involves in-stream construction activities, oil and natural gas infrastructure, road construction, transmission lines, or communication towers, please review our project specific guidance at [http://www.fws.gov/arkansas-es/IPaC/ProjSpec.html](http://www.fws.gov/arkansas-es/IPaC/ProjSpec.html).

The karst region of Arkansas is a unique region that covers the northern third of Arkansas and we have specific guidance to conserve sensitive cave-obligate and bat species. Please visit [http://www.fws.gov/arkansas-es/IPaC/Karst.html](http://www.fws.gov/arkansas-es/IPaC/Karst.html) to determine if your project occurs in the karst region and to view karst specific-guidance. Proper implementation and maintenance of best management practices specified in these guidance documents is necessary to avoid adverse effects to federally protected species and often avoids the more lengthy formal consultation process.

If your species list includes any mussels, Northern Long-eared Bat, Indiana Bat, Yellowcheek Darter, Red-cockaded Woodpecker, or American Burying Beetle, your project may require a presence/absence and/or habitat survey prior to commencing project activities. Please check the appropriate species-specific guidance on our website to determine if your project requires a survey. We strongly recommend that you contact the appropriate staff species lead biologist (see office directory or species page) prior to conducting presence/absence surveys to ensure the appropriate level of effort and methodology.

Under the ESA, it is the responsibility of the Federal action agency or its designated representative to determine if a proposed action "may affect" endangered, threatened, or proposed species, or designated critical habitat, and if so, to consult with the Service further. Similarly, it is the responsibility of the Federal action agency or project proponent, not the Service, to make “no effect” determinations. If you determine that your proposed action will have “no effect” on threatened or endangered species or their respective critical habitat, you do not need to seek concurrence with the Service. Nevertheless, it is a violation of Federal law to harm or harass any federally-listed threatened or endangered fish or wildlife species without the appropriate permit.

Through the consultation process, we will analyze information contained in a biological assessment that you provide. If your proposed action is associated with Federal funding or permitting, consultation will occur with the Federal agency under section 7(a)(2) of the ESA. Otherwise, an incidental take permit pursuant to section 10(a)(1)(B) of the ESA (also known as a habitat conservation plan) is necessary to harm or harass federally listed threatened or endangered fish or wildlife species. In either case, there is no mechanism for authorizing incidental take “after-the-fact.” For more information regarding formal consultation and HCPs, please see the Service's Consultation Handbook and Habitat Conservation Plans at [www.fws.gov/endangered/esa-library/index.html#consultations](http://www.fws.gov/endangered/esa-library/index.html#consultations).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to
federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Attachment(s):

- Official Species List
Official Species List

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

Endangered Species Act Species

There is a total of 10 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. **NOAA Fisheries**, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.
