May 29, 2018

Mr. Peter Jilek  
Acting Division Administrator  
Federal Highway Administration  
700 West Capitol, Room 3130  
Little Rock, Arkansas 72201-3298

Re: Job Number 050321  
FAP Number NHPP-0033(22)  
Strawberry River Str. & Apprs.  
Route 56, Section 2  
Bridge Number 03219  
Izard County  
Tier 3 Categorical Exclusion

Dear Mr. Jilek:

The Environmental Division has reviewed the referenced project and it falls within the definition of the Tier 3 Categorical Exclusion as defined by the ArDOT/FHWA Memorandum of Agreement on the processing of Categorical Exclusions. The following information is included for your review and, if acceptable, approval as the environmental documentation for this project.

The purpose of this project is to replace a structurally deficient bridge and reconstruct its approaches on Highway 56 in Izard County. The project will include replacing the bridge, reconstructing its approaches, and the relocation of one driveway and a portion of a minor farm road. Total length of the project is 0.473 mile. A project location map is enclosed.

The existing Strawberry River Bridge (Bridge Number 03219) is a 28.5 foot wide by 332 foot long structure with three 45 foot I-beam spans and three 65 foot standard composite I-beams supported by a combination of multi-column piers, concrete wall bents, and abutments on spread footings. The structure has a sufficiency rating of 51.3. The existing roadway consists of two 10-foot wide paved travel lanes with 3-foot wide paved shoulders. The existing right of way width is 91.5 feet.
The proposed bridge will consist of a 337 foot long by 37 foot wide continuous composite plate girder bridge having two 100 foot spans and one 135 foot span over the main channel. The supporting substructure will consist of single column intermediate bents on drilled shafts, with abutments on steel H-piles. Reconstructed approaches will provide two 11-foot wide paved travel lanes with 6-foot wide paved shoulders. The average right of way width will be 150 feet. Approximately 3.61 acres of additional right of way will be required for this project.

Design data for this project is as follows:

<table>
<thead>
<tr>
<th>Design Year</th>
<th>Average Daily Traffic</th>
<th>Percent Trucks</th>
<th>Design Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>2019</td>
<td>1,200</td>
<td>10</td>
<td>55 mph</td>
</tr>
<tr>
<td>2039</td>
<td>1,500</td>
<td>10</td>
<td>55 mph</td>
</tr>
</tbody>
</table>

There are no relocations, Section 4(f)/6(f) properties, environmental justice issues, or wetlands associated with this project. Field inspections found no evidence of existing underground storage tanks or hazardous waste deposits. No impacts to cultural resources are anticipated; concurrence from the State Historic Preservation Officer is enclosed. Approximately 2.84 acres of prime farmland will be converted to highway right of way. Form NRCS-CPA-106 is enclosed. Noise predictions have been made for this project utilizing the Federal Highway Administration’s Traffic Noise Model 2.5 procedures. A Noise Analysis is enclosed.

The official species list was obtained through the US Fish and Wildlife Service (USFWS) Information for Planning and Consultation website. The website lists the gray bat (Myotis grisescens), Indiana bat (Myotis sodalis), northern long-eared bat (Myotis septentrionalis), Rabbitsfoot (Theliderma cylindrica) and its critical habitat, Scaleshell (Leptodea leptodon), Snuffbox (Epioblasma triquetra), and Missouri bladderpod (Physaria filiformis) as species potentially affected by the proposed project. The project may affect, but is not likely to adversely affect these listed species. USFWS concurrence with this determination was received on April 4, 2018. This project will not affect the Missouri bladderpod due to lack of suitable habitat.

The project will have a discharge of dredged or fill material into waters of the United States; therefore, a Section 404 permit will be required. Two piers and
two temporary work pads will be placed below the ordinary high-water mark impacting 100 linear feet of the Strawberry River. The project should be authorized by a Nationwide Permit 14 for Linear Transportation Projects as defined in Federal Register 82(4):1860-2008. The Strawberry River has the following special water resource designations: Natural and Scenic Waterbody, Extraordinary Resource Waterbody, and Ecologically Sensitive Waterbody, and is on the National Rivers Inventory. Correspondence to the National Park Service is enclosed. No response was received.

Izard County participates in the National Flood Insurance Program. The project lies within the Zone A, Special Flood Hazard Area. The final project design will be reviewed to confirm that the design is adequate and that the potential risk to life and property are minimized. Adjacent properties should not be impacted nor have a greater flood risk than existed before construction of the project. None of the encroachments will constitute a significant floodplain encroachment or a significant risk to property or life.

If you have any questions, please contact the Environmental Division at 501-569-2281.

Sincerely,

John Fleming
Division Head

RE: Izard County – General  
Section 106 Review – FHWA  
ARDOT Job Number 050321  
Strawberry River Str. & Apprs (S)  
Route 56, Section 2  
AHPP Tracking Number 100815

Dear Mr. Fleming:

This letter is written in response to your inquiry regarding properties of architectural or historical significance in the area of the proposed referenced project. The staff of the Arkansas Historic Preservation Program (AHPP) has reviewed the documents for the structure included in your letter of March 29, 2018, and has determined that the bridge (ARDOT Bridge Number 3219) is not eligible for inclusion in the National Register of Historic Places. Therefore, this undertaking will have no effect to historic properties.

Tribes that have expressed an interest in the area include the Cherokee Nation (Ms. Elizabeth Toombs), the Eastern Shawnee Tribe of Oklahoma (Ms. Robin Dushane), the Osage Nation (Dr. Andrea Hunter), the Quapaw Tribe of Oklahoma (Mr. Everett Bandy), and the Shawnee Tribe of Oklahoma (Ms. Kim Jumper). We recommend that they be consulted in accordance with 36 CFR § 800.2 (c) (2).

Thank you for your interest and concern for the cultural heritage of Arkansas. Please refer to the AHPP Tracking Number listed above in all correspondence. If you have any questions, please call Theresa Russell of my staff at (501)-324-9357.

Sincerely,

Scott Kaufman  
Director, AHPP

cc: Mr. Randal Looney, Federal Highway Administration  
Dr. Andrea Hunter, Osage Nation

Fundamentals of Sound and Noise

“Noise” is defined as an unwanted sound. Sounds are described as noise if they interfere with an activity or disturb the person hearing them. Sound is measured in a logarithmic unit called a decibel (dB). The human ear is more sensitive to middle and high frequency sounds than it is to low frequency sounds, so sound levels are weighted to more closely reflect human perceptions. These “A-weighted” sounds are measured using the decibel unit dB(A). Because the dB(A) is based on a logarithmic scale, a 10 dB(A) increase in sound level is generally perceived as twice as loud while a 3 dB(A) increase is just barely perceptible to the human ear.

Sound levels fluctuate with time depending on the sources of the sound audible at a specific location. In addition, the degree of annoyance associated with certain sounds varies by time of day, depending on other ambient sounds affecting the listener and the activities of the listener. The time-varying fluctuations in sound levels at a fixed location can be quite complex, so they are typically reported using statistical or mathematical descriptors that are a function of sound intensity and time. A commonly used descriptor of the equivalent sound level is Leq, which represents the equivalent of a steady, unvarying level over a defined period of time containing the same level of sound energy as the time varying noise environment. Leq(h) is a sound level averaged over one hour. For highway projects, the Leq(h) is commonly used to describe traffic-generated sound levels at locations of outdoor human use and activity (such as residences).

Noise Impact Criteria

Traffic noise impacts take place when the predicted traffic noise levels approach or exceed the noise abatement standard, or when the predicted traffic noise levels exceed the existing noise level by ten dB(A) (decibels on the A-scale). The noise abatement standard of 67 dB(A) is used for sensitive noise receptors such as residences, schools, churches, and parks. The term “approach” is considered to be one dB(A) less than the noise abatement standard.

The number of noise receptors was estimated for this project utilizing the Federal Highway Administration’s Traffic Noise Model 2.5, existing and proposed roadway information, existing traffic information, and projected traffic levels for 2039.
Traffic noise analyses

Traffic noise analyses were performed for the project utilizing a roadway cross-section for Highway 56 consisting of two 11-foot paved travel lanes and 6-foot wide paved shoulders.

Effects of Project

The traffic noise estimates for the project resulted in a noise abatement distance of 55 feet from the centerline of Highway 56. Even though noise levels are above the noise abatement standard outside of the proposed right of way, no sensitive receptors located along the proposed project location are predicted to experience noise impacts resulting from noise levels that approach or exceed 67 dB(A) during the design year.

To avoid noise levels in excess of design levels, any future receptors should be located a minimum of 10 feet beyond the distance that the noise abatement standard is projected to occur. This distance should be used as a general guide and not a specific rule since the noise will vary depending upon the roadway grades and other noise contributions.

Any excessive project noise, due to construction operations, should be of short duration and have a minimum adverse effect on land uses or activities associated with this project area.

In compliance with Federal guidelines, a copy of this analysis will be transmitted to the White River Planning and Development District for possible use in present and future land use planning.
Mr. John Fleming

c/o Mickey Matthews

Arkansas Department of Transportation

10324 Interstate 30

Little Rock, AR 72209

Dear Mr. Fleming,

The Service has reviewed your assessment and determinations for Arkansas Department of Transportation (ArDOT) Job Number 050321, Izard County, Arkansas. The project was described and assessed as follows (abbreviated):

The Arkansas Department of Transportation (ArDOT) is proposing plans to replace the Hwy 56 Bridge over the Strawberry River with a new bridge adjacent upstream. IPaC identified gray bat (*Myotis grisescens*), Indiana bat (*Myotis sodalis*), northern long-eared bat (*Myotis septentrionalis*), Rabbitsfoot (*Theliderma cylindrica*) and its critical habitat, Scaleshell (*Leptodea leptodon*), Snuffbox (*Epioblasma triquetra*), and Missouri bladderpod (*Physaria filiformis*) as potentially occurring at or near the project location.

Technical assistance from the service identified this project as one within an area of insufficient data and indicated a bat presence/absence survey would be beneficial. The department will be surveying this project are later this summer. No prohibited take will occur for northern long-eared bats or Indian Bats following the guidance of the Programmatic Biological Opinion. A Concurrence Verification Letter is attached. Inactive season clearing and time of day construction restriction special provisions will be included in the contract.

This project is within the known gray bat range and a records search of ANHC databases identified a gray bat cave (Blagg Cave) approximately 14 miles east/southeast of the project location. Special provisions for time of day work restrictions will be included in the contract. Temporary sedimentation and construction activities associated with bridge replacement may temporary decrease forage availability for gray bats. Sedimentation will be limited with the use of best management practices. With the use of best management practices and special provisions outlined above we seek concurrence that this project may effect, but will not likely adversely affect gray bats.

A freshwater mussel survey was conducted on 8 August 2017 by ARDOT personnel (See attached data sheet). Temporary and limited quantities of
sedimentation during construction activities will be present in the Strawberry River. Sedimentation will be limited with the use of best management practices. As a result, we seek concurrence that the construction of this project may effect, but will not likely adversely affect Rabbitsfoot, Scaleshell, and Snuffbox. The existing bridge is the upstream extent of Rabbitsfoot Critical Habitat Unit 11, the new bridge will be upstream of the existing bridge and the temporary work pads will be upstream of the new bridge (see attached conceptual work plan). The construction activities will result in temporary sedimentation to a minimal portion of Critical Habitat. As a result, we seek concurrence that this project will not result in an adverse modification of Critical Habitat.

The project area doesn’t contain suitable habitat and will have no effect on Missouri Bladderpod.

The Service has received your concurrence verification letter and request to verify that the Proposed Action may rely on the concurrence provided in the February 5, 2018, FHWA, FRA, FTA Programmatic Biological Opinion for Transportation Projects within the Range of the Indiana Bat and Northern Long-eared Bat (PBO) to satisfy requirements under Section 7(a)(2) of the Endangered Species Act of 1973 (ESA) (87 Stat. 884, as amended; 16 U.S.C 1531 et seq.).

Based on the information you provided, you have determined that the Proposed Action is within the scope and adheres to the criteria of the PBO, including the adoption of applicable avoidance and minimization measures, may affect, but is not likely to adversely affect (NLAA) the endangered Indiana Bat (Myotis sodalis) and/or the threatened Northern Long-eared Bat (Myotis septentrionalis).

The Service concurs that this action may rely on the PBO. Furthermore, due to the limited size of the area being cleared off existing roadway and adjacent to existing right-of-way, mussel survey results, habitat types, distance to known species locations, proposed bat survey, and the special provisions for winter clearing bat avoidance and stream sediment control and water quality conservation measures, the Service agrees with your assessment and determinations for all species identified. No further consultation is necessary at this time.

For Proposed Actions that include bridge/structure removal, replacement, and/or maintenance activities: If your initial bridge/structure assessments failed to detect Indiana bats, but you later detect bats during construction, please submit the Post Assessment Discovery of Bats at Bridge/Structure Form (User Guide Appendix E) to this Service Office. In these instances, potential incidental take of Indiana Bats may be exempted provided that the take is reported to the Service.

If the Proposed Action is modified, or new information reveals that it may affect the Indiana Bat and/or Northern Long-eared Bat in a manner or to an extent not considered in the PBO, further review to conclude the requirements of ESA Section 7(a)(2) may be required. If the Proposed
Mr. John Fleming

Action may affect any other federally-listed or proposed species, and/or any designated critical habitat, additional consultation is required. If the Proposed Action has the potential to take Bald or Golden Eagles, additional coordination with the Service under the Bald and Golden Eagle Protection Act may also be required. In either of these circumstances, please contact this Service Office.

For further assistance or if you have any questions, please contact Lindsey Lewis at (501) 513-4489 or lindsey_lewis@fws.gov.

Sincerely,

[Signature]

Project Name: 050321

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies endangered, threatened, proposed, and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 et seq.). This letter only provides an official species list and technical assistance; if you determine that listed species and/or designated critical habitat may be affected in any way by the proposed project, even if the effect is wholly beneficial, consultation with the Service will be necessary.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found on our website.

Please visit our website at http://www.fws.gov/arkansas-es/IPaC/home.html for species-specific guidance to avoid and minimize adverse effects to federally endangered, threatened, proposed, and candidate species. Our web site also contains additional information on species life history and habitat requirements that may be useful in project planning.
If your project involves in-stream construction activities, oil and natural gas infrastructure, road construction, transmission lines, or communication towers, please review our project specific guidance at [http://www.fws.gov/arkansas-es/IPaC/ProjSpec.html](http://www.fws.gov/arkansas-es/IPaC/ProjSpec.html).

The karst region of Arkansas is a unique region that covers the northern third of Arkansas and we have specific guidance to conserve sensitive cave-obligate and bat species. Please visit [http://www.fws.gov/arkansas-es/IPaC/Karst.html](http://www.fws.gov/arkansas-es/IPaC/Karst.html) to determine if your project occurs in the karst region and to view karst specific-guidance. Proper implementation and maintenance of best management practices specified in these guidance documents is necessary to avoid adverse effects to federally protected species and often avoids the more lengthy formal consultation process.

If your species list includes any mussels, Northern Long-eared Bat, Indiana Bat, Yellowcheek Darter, Red-cockaded Woodpecker, or American Burying Beetle, your project may require a presence/absence and/or habitat survey prior to commencing project activities. Please check the appropriate species-specific guidance on our website to determine if your project requires a survey. We strongly recommend that you contact the appropriate staff species lead biologist (see office directory or species page) prior to conducting presence/absence surveys to ensure the appropriate level of effort and methodology.

Under the ESA, it is the responsibility of the Federal action agency or its designated representative to determine if a proposed action "may affect" endangered, threatened, or proposed species, or designated critical habitat, and if so, to consult with the Service further. Similarly, it is the responsibility of the Federal action agency or project proponent, not the Service, to make “no effect” determinations. If you determine that your proposed action will have “no effect” on threatened or endangered species or their respective critical habitat, you do not need to seek concurrence with the Service. Nevertheless, it is a violation of Federal law to harm or harass any federally-listed threatened or endangered fish or wildlife species without the appropriate permit.

Through the consultation process, we will analyze information contained in a biological assessment that you provide. If your proposed action is associated with Federal funding or permitting, consultation will occur with the Federal agency under section 7(a)(2) of the ESA. Otherwise, an incidental take permit pursuant to section 10(a)(1)(B) of the ESA (also known as a habitat conservation plan) is necessary to harm or harass federally listed threatened or endangered fish or wildlife species. In either case, there is no mechanism for authorizing incidental take “after-the-fact.” For more information regarding formal consultation and HCPs, please see the Service’s Consultation Handbook and Habitat Conservation Plans at [www.fws.gov/endangered/esa-library/index.html#consultations](http://www.fws.gov/endangered/esa-library/index.html#consultations).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be
completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. **Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.**

Project Type: TRANSPORTATION

Project Description: Bridge replacement on new alignment adjacent on the north side of existing.

Project Location:
Approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/place/36.178030491528546N91.7387645497351W

Counties: Izard, AR
Endangered Species Act Species

There is a total of 7 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

1. **NOAA Fisheries**, also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

April 25, 2018

Mr. Hector Santiago, AR NRI Coordinator  
National Park Service  
Midwest Regional Office  
601 Riverside Dr.  
Omaha, Nebraska 68102

Re: Job Number 050321  
Strawberry River Str. & Apprs. (S)  
Izard County

Dear Mr. Santiago:

The Federal Highway Administration requires coordination with the National Park Service on all Arkansas Department of Transportation (ArDOT) projects involving waterbodies on the Nationwide Rivers Inventory (NRI). Enclosed is a project location map for the referenced project.

The ArDOT is proposing to replace a bridge on the Strawberry River on Highway 56, Section 2 in Izard County, Arkansas. The new bridge would be built at the current bridge location.

We believe this project will not affect the river or foreclose it from wild, scenic, or recreational status. If you require further information, you may contact Sarah DeVries of my staff at (501) 569-2553.

Sincerely,

John Fleming  
Division Head

ROADWAY DESIGN REQUEST

Job Number 050321  FAP No. ___________________________  County Izard
Job Name Strawberry River Str. & Apprs. (S)
Design Engineer David W. Baker  Environmental Staff _______________________
Brief Project Description Replacing existing bridge.

A. Existing Conditions:

Roadway Width: 26'-0”  Shoulder Type/Width: 3’ Paved
Number of Lanes and Width: 2-10’  Existing Right-of-Way: 91.5’ Avg.
Sidewalks? N/A  Location: _______  Width: _______
Bike Lanes? _______  Location: _______  Width: _______

B. Proposed Conditions:

Roadway Width: 34'-0”  Shoulder Type/Width: 6’ Paved
Number of Lanes and Width: 2-11’  Proposed Right-of-Way: 150’ Avg.
Sidewalks? N/A  Location: _______  Width: _______
Bike Lanes? _______  Location: _______  Width: _______

C. Construction Information:
If detour: Where: N/A  Length: _________________

D. Design Traffic Data:

\[
\begin{array}{ccc}
2020 & ADT: 1,200 & 2040 & ADT: 1,500 & \% Trucks: 10 \\
Design Speed: 55 m.p.h.
\end{array}
\]

E. Approximate total length of project: 0.473 mile(s)

F. Justification for proposed improvements: Bridge Replacement Required

G. Total Relocatees: N/A  Residences: N/A  Businesses: N/A

H. Have you coordinated with any outside agencies (e.g., FHWA, City, County, etc.)? ________

BRIDGE INFORMATION - PRELIMINARY

Job Number: 050321     FAP Number: NHPP-0033(22)     County: Izard
Job Name: Strawberry River Str. & Apprs. (S)
Design Engineer: Chris Williams     Environmental Staff: Terry Tucker/ R. Jenkins/M. Matthews

A. Description of Existing Bridge:
1. Bridge Number: 03219 over Strawberry River
2. Location: Rte.: 56     Section: 2     Log Mile: 11.91
4. Type Construction: Three 45'-0" standard I-beam spans and three 65'-0" standard composite I-beam spans supported by piles, concrete wall bents and abutment on spread footings.
5. Deficiencies: None.
7. Are any Condition Component Ratings at 3 or less? No

B. Proposed Improvements:
1. Length: 337.2 ft     Br. Rdwy. Width: 34.0 ft     Deck Width (Out-to-Out): 37.2 ft
2. Travel Lanes: Two 11' lanes.
3. Shoulder Width: 6' shoulders on both sides of roadway.
4. Sidewalks? No.     Location: N/A     Width: N/A ft

C. Construction Information:
1. Location in relation to existing bridge: Along existing CL.
2. Superstructure Type: Continuous Composite Plate Girder Unit.
3. Span Lengths: 100'-135'-100'
4. Substructure Type: Single column intermediate bents on drilled shafts, abutments on steel h-piles.
5. Ordinary High Water Elev. (OHW): 519     No. of Bents inside OHW Contours: 2
7. Is Channel Excavation below OHW Required? No.     Surface Area: N/A ft²     Volume: N/A yd³
8. Is Fill below OHW Req'd.? No.     Surface Area: N/A ft²     Volume: N/A yd³
9. Is Riprap below OHW required? No.     Volume: N/A yd³

D. Work Road Information:
1. Is Work Road(s) required? Yes.     Location: TBD     Top Width: TBD ft
2. Is Fill below OHW required? TBD     Surface Area: TBD ft²     Volume: TBD yd³
3. Are Pipes required to meet Backwater Criteria? TBD     Waterway Opening: TBD ft²

E. Detour Information:
1. Is a detour bridge required? No.     Location in relation to Existing Br.: N/A
2. Length: N/A ft     Br. Rdwy. Width: N/A ft     Deck Elevation: N/A
3. Volume of Fill below OHW: N/A yd³     Surface Area: N/A ft²

F. Coordination with Outside Agencies (e.g., FHWA, City, County, C of E, USCG):
Has Bridge Division coordinated with any outside agencies? No.
Regulatory Division

NATIONWIDE PERMIT NO. SWL 2019-00029

Mr. John Fleming  
Division Head, Environmental Division  
Arkansas Department of Transportation  
PO Box 2261  
Little Rock, Arkansas 72203-2261

Dear Mr. Fleming:

Please refer to your recent request concerning Department of the Army permit requirements pursuant to Section 404 of the Clean Water Act. You requested authorization for the placement of dredged and fill material in waters of the United States associated with upgrading the approaches and replacing the bridge over the Strawberry River south of Horseshoe Bend. The existing roadway consists of two 10-foot-wide lanes with 3-foot-wide shoulders. The new bridge will be constructed approximately 40 feet upstream from the existing bridge and the approaches will be upgraded to two 11-foot-wide lanes with 6-foot-wide shoulders. Permanent impacts to the Strawberry River will be less than 300 linear feet and 0.1 acres. Temporary work pads will be constructed on both sides of the bridge during construction and will require the discharge of approximately 1,530 cubic yards of rock fill. The Strawberry River is designated as an Extraordinary Resource Water and Ecologically Sensitive Waterbody; therefore, you must obtain an individual Section 401 water quality certification (WQC) from the Arkansas Department of Environmental Quality (ADEQ). The U.S. Fish and Wildlife Service concurred that the project may affect but is not likely to adversely affect the Gray Bat (Myotis grisescens), Indiana Bat (Myotis sodalis), Northern Long-eared Bat (Myotis septentrionalis), Rabbitsfoot Mussel (Theiderma cylindrical), Scaleshell Mussel (Leptodea leptodon) and Snuffbox Mussel (Epioblasma triquetra). There are no wetlands or cultural resources impacts. The project was approved as a Tier 3 Categorical Exclusion by the Federal Highway Administration on June 6, 2018. The project is located on State Highway 56, approximately one mile south of the Community of Horseshoe Bend in sections 33 and 34, T. 18 N., R. 7 W., Izard County, Arkansas. A vicinity map, project location map and conceptual drawing for the work pads are enclosed.

The proposed activities are authorized by Department of the Army Nationwide Permit (NWP) No. 14 (copy enclosed), provided that the General Conditions therein are met and you obtain the individual WQC. For your convenience, we have highlighted the General Conditions of the NWP that are the most pertinent to your project. You should become familiar with the
conditions and maintain a copy of the permit at the worksite for ready reference. If changes are proposed in the design or location of the project, you should submit revised plans to this office for approval before construction of the change begins.

Please pay particular attention to General Condition No. 12 which stipulates that appropriate erosion and siltation controls be used during construction and all exposed soil be permanently stabilized. Erosion control measures must be implemented before, during and after construction.

If you have any questions concerning compliance with the conditions of the Section 401 WQC, you should contact Ms. Melanie Treat or Mr. Jim Wise at the ADEQ, Water Division, 5301 Northshore Drive, North Little Rock, Arkansas 72118, telephone (501) 682-0040.

Also, in order to fully comply with the conditions of the NWP, you must submit the enclosed compliance certification within 30 days of completion of the project. This is required pursuant to General Condition No. 30 of the permit.

The NWP determination will be valid until March 18, 2022. If NWP No. 14 is modified, suspended, or revoked during this period, your project may not be authorized unless you have begun or are under contract to begin the project. If work has started or the work is under contract, you would then have twelve (12) months to complete the work.

Your cooperation in the Regulatory Program is appreciated. If you have any additional questions about this permit or any of its provisions, please contact Mr. Johnny McLean at (501) 324-5295 and refer to Permit No. SWL 2019-00029, Strawberry River Structure and Approaches on State Highway 56 near Horseshoe Bend (ArDOT Project No. 050321).

Sincerely,

Sarah Chitwood
Chief, Regulatory Evaluation Branch

Enclosures

Copy Furnished:
Ms. Melanie Treat, Arkansas Department of Environmental Quality, w/cy encls.
Mr. Lindsey Lewis, U.S. Fish & Wildlife Service, w/cy encls.
Chief, Regulatory Enforcement, w/cy encls.
The temporary fill to construct the work road(s) shown has been permitted to facilitate construction of the project. The Contractor shall determine and provide temporary culverts of a size and number that will be sufficient to maintain low stream flows and assist passage of aquatic wildlife.

The Contractor may submit an alternative work road plan for approval by the Engineer showing details of and describing the proposed modifications. A primary objective of any proposed modifications should be to minimize the reduction of waterway opening in the floodplain. The top of the alternative work road(s) shall not exceed the elevation shown. A determination will be made by the Engineer within ten (10) business days concerning the necessity or practicability of the request. A modification of the Section 404 Permit and additional review time by the Corps of Engineers may be required if the alternative work road(s) increases the volume of temporary fill that has been permitted for the project. The contract time will not be extended for the time required to consider or approve any alternate work road(s) submittals.

Any additional work or expenses incurred preparing, submitting, or completing the alternate work road plan shall be at no additional cost to the Department.

See SP Job 050321 "Construction in Special Flood Hazard Areas" and Section 110.05(G) in the Standard Specifications for additional information. The Contractor is responsible for maintenance of the work road(s) during the contract period.
