Mr. Angel Correa  
Division Administrator  
Federal Highway Administration  
700 West Capitol, Room 3130  
Little Rock, Arkansas 72201-3298

Re: Job Number 050325  
FAP Number NHPP-0033(24)  
Little Brushy Creek Str. & Apprs. (S)  
Izard County  
Tier 3 Categorical Exclusion

Dear Mr. Correa:

The Environmental Division has reviewed the referenced project and it falls within the definition of the Tier 3 Categorical Exclusion as defined by the ARDOT/FHWA Memorandum of Agreement on the processing of Categorical Exclusions. The following information is included for your review and, if acceptable, approval as the environmental documentation for this project.

The purpose of this project is to replace an existing bridge over Little Brushy Creek with a box culvert on Highway 223 in Izard County. Total length of the project is 0.38 mile. A project location map is enclosed.

The existing roadway consists of two 10-foot wide paved travel lanes with 2-foot wide shoulders. Existing right of way width is 80 feet. The existing structure, Bridge Number M2377, is a single span, steel beam structure with a 29’ x 26’ concrete/asphalt deck. The structure is considered non-qualifying with a sufficiency rating of 49.0.

Proposed improvements include two 12-foot wide paved travel lanes with 8-foot wide shoulders. The existing bridge over Little Brushy Creek will be replaced with a new triple 10’ x 10’ x 94’ concrete box culvert and a smaller 4’ x 2’ x 36’ concrete box culvert. Construction of a temporary detour on the western (upstream) side of Highway 223 will require the placement of three 72” x 78’ corrugated metal pipe culverts within Little Brushy Creek. This temporary detour will require an additional 2.4 acres of a
temporary construction easement. The proposed new average right of way width will be 150 feet. Approximately 3.5 acres of additional right of way will be required for this project.

Design data for this project is as follows:

<table>
<thead>
<tr>
<th>Design Year</th>
<th>Average Daily Traffic</th>
<th>Percent Trucks</th>
<th>Design Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>2020</td>
<td>3,250</td>
<td>10</td>
<td>55 mph</td>
</tr>
<tr>
<td>2040</td>
<td>3,900</td>
<td>10</td>
<td>55 mph</td>
</tr>
</tbody>
</table>

There are no relocations, environmental justice issues, or wellhead protection areas associated with this project. Field inspections found no evidence of existing underground storage tanks or hazardous waste deposits. Approximately 0.41 acre of farmland of statewide importance will be converted to highway right of way. Form NRCS-CPA-106 is enclosed.

The construction of this project will impact waters of the United States in an area estimated at 0.1 acre. The construction of this project should be covered under the terms of Nationwide 14 for Linear Transportation Crossings as defined in Federal Register 82(4):1860-2008.

The official species list obtained from the US Fish and Wildlife Service (USFWS) for the project identified three threatened and three endangered species as potentially occurring within the project boundaries. The gray bat (*Myotis grisescens*), Indiana bat (*Myotis sodalis*), northern long-eared bat (*Myotis septentrionalis*), pink mucket (*Lampsilis abrupta*), rabbitsfoot (*Quadrula cylindrica*) and Missouri bladderpod (*Physaria filiformis*) were identified as listed species that may occur within the project area.

The Department has determined that the project meets the criteria and conditions of a may affect, likely to adversely affect determination as outlined in the Range-wide Programmatic Consultation for Indiana bat. The Department will adhere to the required avoidance and minimization measures identified in the enclosed Project Submittal Form including the preservation of 1.35 acres of forested habitat at the Departments Kings River Falls Site. A determination of may affect, but not likely to adversely affect determination was made for the northern long-eared bat as outlined in the enclosed Northern Long-Eared Bat 4(d) Rule Streamlined Consultation Form. A determination of may affect, but not likely to adversely affect was made for the gray bat based on the commitment to halt construction activities 1 hour prior to dusk until 1 hour after sunrise. An Off-site Restraining Conditions for Bats special provision will be included in the job.
The pink mucket, rabbitsfoot, and Missouri bladderpod were also identified as possibly occurring within the project area. Based on the lack of habitat and distance to known species it is our determination that the proposed project will have no effect on these species. The USFWS concurred with the determinations on August 23, 2017 (letter enclosed).

Based upon the ARDOT’s Policy on Highway Traffic Noise Abatement, a noise analysis is not required for this project. This project does not involve added capacity, construction of new through lanes or auxiliary lanes, changes in the horizontal or vertical alignment of the roadway or exposure of noise sensitive land uses to a new or existing highway noise source.

If you have any questions, please contact the Environmental Division at 569-2281.

Sincerely,

John Fleming  
Division Head

# FARMLAND CONVERSION IMPACT RATING FOR CORRIDOR TYPE PROJECTS

## PART I (To be completed by Federal Agency)
- **Job:** 050325
- **Date of Land Evaluation Request:** 9/26/17
- **Federal Agency Involved:** FHWA

## PART II (To be completed by NRCS)
1. **Date Request Received by NRCS:**
2. **Person Completing Form:**
3. **Does the corridor contain prime, unique statewide or local important farmland?**
   - **YES**
   - **NO**
4. **Acres Irrigated**
5. **Average Farm Size:**
6. **Farmable Land in Government Jurisdiction**
   - **Acres:**
   - **%**
7. **Amount of Farmland As Defined In FPPA**
   - **Acres:**
   - **%**
8. **Name Of Land Evaluation System Used**
9. **Name of Local Site Assessment System**
10. **Date Land Evaluation Returned by NRCS**

## PART III (To be completed by Federal Agency)
- **Total Acres To Be Converted Directly**
- **Total Acres To Be Converted Indirectly, Or To Receive Services**
- **Total Acres In Corridor**

## PART IV (To be completed by NRCS) Land Evaluation Information
- **Total Acres Prime And Unique Farmland**
- **Total Acres Statewide And Local important Farmland**
- **Percentage Of Farmland in County Or Local Govt. Unit To Be Converted**
- **Percentage Of Farmland in Govt. Jurisdiction With Same Or Higher Relative Value**

## PART V (To be completed by NRCS) Land Evaluation Information Criterion Relative value of Farmland to Be Serviced or Converted (Scale of 0 - 100 Points)

### PART VI (To be completed by Federal Agency) Corridor Assessment Criteria (These criteria are explained in 7 CFR 658.5(c))

Mr. John Fleming  
c/o Clint Hutcheson  
Arkansas Highway & Transportation Department  
10324 Interstate 30  
Little Rock, Arkansas 72209  

RE: Brushy Creek Str. and Apprs. (Job 050325)  

Dear Mr. Fleming,  

The U.S. Fish and Wildlife Service (Service) is responding to your request dated August 22, 2017, to verify that the proposed Brushy Creek Str. and Apprs. (the Project) may rely on the December 15, 2016, Programmatic Biological Opinion (BO) for federally funded or approved transportation projects that may affect the Indiana Bat (Myotis sodalis) and/or Northern Long-eared Bat (NLEB) (Myotis septentrionalis). We received your request and the associated Project Submittal Form on August 22, 2017.  

This letter provides the Service’s response as to whether the Project may rely on the BO to comply with Section 7(a)(2) of the Endangered Species Act of 1973 (ESA) (87 Stat. 884, as amended; 16 U.S.C. 1531 et seq.) for its effects to the Indiana Bat and/or NLEB. This letter also responds to your request for Service concurrence that the Project may affect, but is not likely to adversely affect (NLAA) ESA-listed species and/or designated critical habitats other than the Indiana Bat and NLEB.  

The Arkansas Department of Transportation has determined that the Project is likely to adversely affect (LAA) the Indiana Bat. Additionally, the Arkansas Department of Transportation has also determined that the Project is not likely to adversely affect (NLAA) Gray Bat (Myotis grisescens).  

The Service concurs with these determination(s), because of the proximity of known species sites and foraging range to the project location and the occurrence of suitable foraging habitat for both species that exists on the site. A determination of LAA is appropriate based on the amount and distance from the existing roadway of suitable habitat being lost, the conservation measures being proposed, Winter Clearing (non-reproductive season), and the proposed implementation of all required AMMs. Furthermore, the distance to known Gray Bat roosting and hibernacula sites, time of day restrictions, Winter Clearing, Off-site Restraining Conditions, and standard sediment controls warrants a NLAA determination for this species. This concurrence concludes your ESA Section 7 responsibilities relative to Indiana Bat and Gray Bat for this Project, subject to the Reinitiation Notice below.
Conclusion

The Service has reviewed the effects of the proposed Project, which includes the Arkansas Department of Transportation’s commitment to implement any applicable mitigation measures as indicated on the Project Submittal Form. We confirm that the proposed Project’s effects are consistent with those analyzed in the BO. The Service has determined that projects consistent with the conservation measures and scope of the program analyzed in the BO are not likely to jeopardize the continued existence of the Indiana Bat and/or the NLEB. In coordination with your agency and the other sponsoring Federal Transportation Agencies, the Service will reevaluate this conclusion annually in light of any new pertinent information under the adaptive management provisions of the BO.

Incidental Take

Indiana Bat

The Service anticipates that tree removal associated with the proposed Project will cause incidental take of Indiana Bats. As described in the Incidental Take Statement (ITS) of the BO, such taking will be difficult to detect. The Service determined that it is appropriate to measure the amount or extent of incidental taking resulting from BO projects using the proposed acreage of tree removal from Indiana Bat suitable habitat as a surrogate for the numbers of individuals taken.

The proposed Project will remove 0.9 acres of trees from habitat that is suitable for the Indiana Bat. All tree removal will occur in winter and comply with all other conservation measures in the BO. Based on the BO, 0.9 acres are anticipated to result in adverse effects and the Arkansas Department of Transportation will provide 1.35 acres (ratio 1.5/1) of forested habitat preservation at the King River Falls Site near Witter, AR.

In addition, the Project may take up to 5 Indiana Bats that were not detected during bridge bat assessments conducted prior to implementing the proposed work on the Brushy Creek Bridge. Although such take is reasonably certain to occur at up to 10 bridge projects per year as included in the scope of the BO, it is a remote possibility for any individual project that is implemented consistent with the conservation measures of the BO.

The Service will add the acreage of Project-related tree removal to the annual total acreage attributed to the BO as a surrogate measure of Indiana Bat take and exempted from the prohibitions against incidental taking. Such exemption is effective as long as your agency implements the reasonable and prudent measure (RPM) and accompanying terms and conditions of the BO’s ITS.
The sole RPM of the BO’s ITS requires the Federal Transportation Agencies to ensure that State/Local transportation agencies, who choose to include eligible projects under the programmatic action, incorporate all applicable conservation measures in the project proposals submitted to the Service for ESA section 7 compliance using the BO. The implementing terms and conditions for this RPM require the Federal Transportation Agencies to offer training to appropriate personnel about using the BO, and about promptly reporting sick, injured, or dead bats (regardless of species) (or any other federally listed species) located in project action areas.

Northern Long-eared Bat

The Service anticipates that tree removal associated with the proposed Project will cause incidental take of NLEBs. However, the Project is consistent with the BO, and such projects will not cause take of NLEB that is prohibited under the ESA section 4(d) rule for this species (50 CFR §17.40(o)). Therefore, the take of NLEBs resulting from this project does not require exemption from the Service.

Reporting Dead or Injured Bats

The Arkansas Department of Transportation, its State/Local cooperators, and any contractors must take care when handling dead or injured Gray Bats, Indiana Bats and/or NLEBs, or any other federally listed species that are found at the Project site to preserve biological material in the best possible condition and to protect the handler from exposure to diseases, such as rabies. Project personnel are responsible for ensuring that any evidence about determining the cause of death or injury is not unnecessarily disturbed. Reporting the discovery of dead or injured listed species is required in all cases to enable the Service to determine whether the level of incidental take exempted by this BO is exceeded, and to ensure that the terms and conditions are appropriate and effective. Parties finding a dead, injured, or sick specimen of any endangered or threatened species must promptly notify this Service Office.

Reinitiation Notice

This letter concludes consultation for the proposed Project, which qualifies for inclusion in the BO issued to the Federal Transportation Agencies. To maintain this inclusion, a reinitiation of this Project-level consultation is required where the Arkansas Department of Transportation’s discretionary involvement or control over the Project has been retained (or is authorized by law) and if:

1. the amount or extent of incidental take of Indiana Bat is exceeded;
2. new information reveals that the Project may affect listed species or critical habitat in a manner or to an extent not considered in the BO or in the Project information that supported Service concurrence with the NLAA determination;
3. the Project is subsequently modified in a manner that causes an effect to listed species or designated critical habitat not considered in the BO or in the Project information that supported Service concurrence with NLAA determination; or
4. a new species is listed or critical habitat designated that the Project may affect.

Per condition #1 above, the anticipated incidental take is exceeded when:
• the Project removes trees from more than 0.9 acres of habitat suitable for the Indiana Bat; or
• the Project takes more than 5 Indiana Bats resulting from work on the Brushy Creek Bridge.

In instances where the amount or extent of incidental take is exceeded, the Arkansas Department of Transportation is required to immediately request a reinitiation of formal consultation. Please note that the Service cannot exempt from the applicable ESA prohibitions any Action-caused take that exceeds the amount or extent specified in the ITS of this BO that may occur before the reinitiated consultation is concluded.

We appreciate your continued efforts to ensure that this Project is fully consistent with all applicable provisions of the BO. If you have any questions regarding our response or if you need additional information, please contact Lindsey Lewis at (501) 513-4489 or lindsey_lewis@fws.gov.

Sincerely,

[Signature]

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies endangered, threatened, proposed, and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 et seq.). This letter only provides an official species list and technical assistance; if you determine that listed species and/or designated critical habitat may be affected in any way by the proposed project, even if the effect is wholly beneficial, consultation with the Service will be necessary.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found on our website.

Please visit our website at http://www.fws.gov/arkansas-es/IPaC/home.html for species-specific guidance to avoid and minimize adverse effects to federally endangered, threatened, proposed, and candidate species. Our web site also contains additional information on species life history and habitat requirements that may be useful in project planning.

If your project involves in-stream construction activities, oil and natural gas infrastructure, road construction, transmission lines, or communication towers, please review our project

The karst region of Arkansas is a unique region that covers the northern third of Arkansas and we have specific guidance to conserve sensitive cave-obligate and bat species. Please visit [http://www.fws.gov/arkansas-es/IPaC/Karst.html](http://www.fws.gov/arkansas-es/IPaC/Karst.html) to determine if your project occurs in the karst region and to view karst specific-guidance. Proper implementation and maintenance of best management practices specified in these guidance documents is necessary to avoid adverse effects to federally protected species and often avoids the more lengthy formal consultation process.

If your species list includes any mussels, Northern Long-eared Bat, Indiana Bat, Yellowcheek Darter, Red-cockaded Woodpecker, or American Burying Beetle, your project may require a presence/absence and/or habitat survey prior to commencing project activities. Please check the appropriate species-specific guidance on our website to determine if your project requires a survey. We strongly recommend that you contact the appropriate staff species lead biologist (see office directory or species page) prior to conducting presence/absence surveys to ensure the appropriate level of effort and methodology.

Under the ESA, it is the responsibility of the Federal action agency or its designated representative to determine if a proposed action "may affect" endangered, threatened, or proposed species, or designated critical habitat, and if so, to consult with the Service further. Similarly, it is the responsibility of the Federal action agency or project proponent, not the Service, to make “no effect” determinations. If you determine that your proposed action will have “no effect” on threatened or endangered species or their respective critical habitat, you do not need to seek concurrence with the Service. Nevertheless, it is a violation of Federal law to harm or harass any federally-listed threatened or endangered fish or wildlife species without the appropriate permit.

Through the consultation process, we will analyze information contained in a biological assessment that you provide. If your proposed action is associated with Federal funding or permitting, consultation will occur with the Federal agency under section 7(a)(2) of the ESA. Otherwise, an incidental take permit pursuant to section 10(a)(1)(B) of the ESA (also known as a habitat conservation plan) is necessary to harm or harass federally listed threatened or endangered fish or wildlife species. In either case, there is no mechanism for authorizing incidental take “after-the-fact.” For more information regarding formal consultation and HCPs, please see the Service's Consultation Handbook and Habitat Conservation Plans at [www.fws.gov/endangered/esa-library/index.html#consultations](http://www.fws.gov/endangered/esa-library/index.html#consultations).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and
implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Project Summary

Consultation Code: 04ER1000-2017-SLI-1064

Event Code: 04ER1000-2017-E-01573

Project Name: Brushy Creek Str. and Apprs. (S)

Project Type: BRIDGE CONSTRUCTION / MAINTENANCE

Project Description: Replacing the existing bridge over Brushy Creek with a new triple box culvert.

Project Location: Approximate location of the project can be viewed in Google Maps: https://www.google.com/maps/place/36.182824743372436N92.183437391812W

Counties: Izard, AR
Endangered Species Act Species

There is a total of 6 threatened, endangered, or candidate species on this species list. Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.
