Mr. Angel Correa  
Division Administrator  
Federal Highway Administration  
700 West Capitol, Room 3130  
Little Rock, Arkansas 72201-3298

Re:  Job Number 090434  
     FAP Number NHPP-0004(808)  
     Wolf Creek & Decatur Branch  
     Strs. & Apprs. (S)  
     Bridge Numbers 01999 & M1057  
     Benton County  
     Tier 3 Categorical Exclusion

Dear Mr. Correa:

The Environmental Division has reviewed the referenced project and it falls within the definition of the Tier 3 Categorical Exclusion as defined by the ARDOT/FHWA Memorandum of Agreement on the processing of Categorical Exclusions. The following information is included for your review and, if acceptable, approval as the environmental documentation for this project.

The purpose of this project is to replace two structurally deficient bridges on Highway 59 in Benton County. Combined total length of the projects is 0.147 mile. A project location map is enclosed.

The existing roadway consists of two 12-foot wide paved travel lanes with 3-foot paved shoulders. Information about the right of way and the existing structures is provided in Table 1.

Proposed roadway improvements at Section 1 will include two 12-foot wide paved travel lanes with 8-foot wide paved shoulders. Section 2, within the city limits of Decatur, will consist of two 12-foot travel lanes with an 8-foot paved shoulder on the western edge and 1-foot wide curb and gutter shoulders on the
eastern side of the highway. The new box culvert will replace the existing bridge and pedestrian bridge, crossing Decatur Branch, with a larger width box culvert to accommodate pedestrian traffic. Both bridges will be replaced with reinforced concrete box culverts on existing location with detours to the north of both bridges. Information about the proposed box culverts and right of way is provided in Table 2.

There are no relocations, environmental justice issues, hazardous materials, prime farmland, or cultural resources associated with this project. Concurrency from the State Historic Preservation Officer is enclosed.

The U.S. Fish and Wildlife Service Information for Planning and Consultation (IPaC) web section lists the gray bat (*Myotis grisescens*), Indiana bat (*Myotis sodalis*), northern long-eared bat (*Myotis septentrionalis*), Ozark big-eared bat (*Corynorhinus townsendii ingens*), Piping Plover (*Charadrius melodus*), and Ozark cavefish (*Amblyopsis rosae*) as potentially occurring at or near the project location. With minimal tree clearing, distance to known records proximity to current right of way, inclusion of standard sediment and erosion measures, and time of day construction activity restrictions, the USFWS concurred with "may affect, but not likely to adversely affect" the Indiana bat and gray bat on December 14, 2017. Further, no prohibited take will occur for northern long-eared bats following the guidance of the final 4(d) rule (50 CFR §17.40(o)). The proposed project area does not contain habitat for the Ozark big-eared bat, Piping Plover, or the Ozark cavefish and a 'no effect' determination was made. The official species list and USFWS concurrence letter are enclosed.

Stream impacts include the replacement of both bridges with box culverts and the widening of roadway width. Impacts are estimated to be less than 0.1 acre for each crossing. Construction of the proposed project should be allowed under the terms of a Nationwide Permit 14 for Linear Transportation Projects as defined in Federal Register 82 (4):1860-2008.

Decatur Branch and Wolf Creek are both located within a Zone A Special Flood Hazard Area as designated by the National Flood Insurance Program. The final
project design will be reviewed to confirm that the design is adequate and that the potential risk to life and property are minimized. Adjacent properties should not be impacted nor have a greater flood risk than existed before construction of the project. None of the encroachments will constitute a significant floodplain encroachment or a significant risk to property or life.

Based upon the ARDOT’s *Policy on Highway Traffic Noise Abatement*, a noise analysis is not required for this project. This project does not involve added capacity, construction of new through lanes or auxiliary lanes, changes in the horizontal or vertical alignment of the roadway or exposure of noise sensitive land uses to a new or existing highway noise source.

If you have any questions, please contact the Environmental Division at (501) 569-2281.

Sincerely,

John Fleming
Division Head

Mr. John Fleming  
c/o Ben Thesing  
Arkansas Department of Transportation (ArDOT)  
10324 Interstate 30  
Little Rock, Arkansas  72209

Dear Mr. Fleming,

The U.S. Fish and Wildlife Service (Service) is responding to your request dated December 11, 2017, regarding ArDot 090434 Wolf Creek & Spring Branch Strs. & Apprs. in Benton County, Arkansas. The project was described and assessed as follows (abbreviated and revised on):

Two bridges on highway 59 crossing Wolf Creek & Spring Branch in Benton County are scheduled to be replaced with box culverts. Both bridges will be replaced on existing location with detour roads for traffic during construction. The Information for Planning and Consultation project planning tool identified Gray Bat (Myotis grisescens), Indiana Bat (Myotis sodalis), Northern Long-eared Bat (Myotis septentrionalis)(NLEB), Ozark Big-eared Bat (Corynorhinus (=Plecotus) townsendii ingens), Piping Plover (Charadrius melodus), and Ozark Cavefish (Amblyopsis rosae) as potentially occurring near the project area.

Due to habitat and proximity to known records, Ozark Big-eared Bat, Piping Plover, and Ozark Cavefish are not being considered for concurrence. Any technical support contradicting this decision that may warrant consideration would be welcome.

Minor clearing of trees to allow for temporary detour road and safe slopes on shoulders will occur at the Wolf Creek portion of the job. The total amount to be cleared is less than 0.25 acres of approximately 4-5 single trees. The closest known records for Indiana Bat are guano and staining on the bridge abutment present at a field inspection during the Summer of 2017 which indicated use by bats. Further inspection by AGFC Biologist Blake Sasse noted no fresh droppings nor sounds of bats.

The Spring Branch crossing will also have a wider overall foot print due to the detour, shoulders, and sidewalk, but will not require tree clearing due to the project location being entirely within the city of Decatur.

With the minimal tree clearing, distance to known records, proximity to current right-of-way, and inclusion of standard sediment and erosion measures, we seek
concurrence that the project "may affect, but not likely to adversely affect" the Gray Bat and Indiana Bat. Further, we do not believe any prohibited take will occur for NLEB following the guidance of the final 4(d) rule (50 CFR §17.40(o)). NLEB (Checklist was attached.).

Due to the limited scope of the action (i.e., occurring mostly in existing roadway/right-of-ways), small amount of disturbance to habitat, previously disturbed roadway environment, minimal adjacent/indirect habitat effects anticipated, distance to known species locations, time of day construction restrictions, the standard BMPs for sediment and erosions control, and cave discovery and off-site restriction special provisions, the Service concurs with the determination of "may affect, not likely to adversely affect" for Gray Bat and Indiana Bat. There is no data indicating the presence of other listed species occurrence in the vicinity of this action or their associated habitat types within the affected area of this action. No further consultation regarding these species is necessary at this time.

The Service has reviewed your determination that the proposed action will not result in any prohibited incidental take for Norther Long-eared Bat. This project may affect the Northern Long-eared Bat (*Myotis septentrionalis*); however, there are no effects beyond those previously disclosed in the Service’s programmatic biological opinion for the final 4(d) rule dated January 5, 2016. Any take that may occur incidental to this project is not prohibited under the final 4(d) rule (50 CFR §17.40(o)). This project is consistent with the description of the proposed action in the programmatic biological opinion, and the 4(d) rule does not prohibit incidental take of the Northern Long-eared Bat that may occur as a result of this project. Therefore, the programmatic biological opinion satisfies the "action agency" responsibilities under ESA section 7(a)(2) relative to the Northern Long-eared Bat for this project.

Please keep in mind that you must report any departures from the plans submitted; results of any surveys conducted; or any dead, injured, or sick Northern Long-eared Bats that are found to this office. If this project is not completed within one year of this letter, you must update your determination and resubmit the required information.

If you have any questions regarding our response or if you need additional information, please contact Lindsey Lewis at (501) 513-4489 or lindsey_lewis@fws.gov.

Sincerely,

Melvin L. Tobin
Field Supervisor

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies endangered, threatened, proposed, and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 et seq.). This letter only provides an official species list and technical assistance; if you determine that listed species and/or designated critical habitat may be affected in any way by the proposed project, even if the effect is wholly beneficial, consultation with the Service will be necessary.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found on our website.

Please visit our website at http://www.fws.gov/arkansas-es/IPaC/home.html for species-specific guidance to avoid and minimize adverse effects to federally endangered, threatened, proposed, and candidate species. Our website also contains additional information on species life history and habitat requirements that may be useful in project planning.

If your project involves in-stream construction activities, oil and natural gas infrastructure, road construction, transmission lines, or communication towers, please review our project

The karst region of Arkansas is a unique region that covers the **northern third of Arkansas** and we have specific guidance to conserve sensitive cave-obligate and bat species. **Please visit [http://www.fws.gov/arkansas-es/IPaC/Karst.html](http://www.fws.gov/arkansas-es/IPaC/Karst.html) to determine if your project occurs in the karst region and to view karst specific-guidance.** Proper implementation and maintenance of best management practices specified in these guidance documents is necessary to avoid adverse effects to federally protected species and often avoids the more lengthy formal consultation process.

**If your species list includes any mussels, Northern Long-eared Bat, Indiana Bat, Yellowcheek Darter, Red-cockaded Woodpecker, or American Burying Beetle, your project may require a presence/absence and/or habitat survey prior to commencing project activities.** Please check the appropriate species-specific guidance on our website to determine if your project requires a survey. We strongly recommend that you contact the appropriate staff species lead biologist (see office directory or species page) prior to conducting presence/absence surveys to ensure the appropriate level of effort and methodology.

**Under the ESA, it is the responsibility of the Federal action agency or its designated representative to determine if a proposed action "may affect" endangered, threatened, or proposed species, or designated critical habitat, and if so, to consult with the Service further.** Similarly, it is the responsibility of the Federal action agency or project proponent, not the Service, to make “no effect” determinations. If you determine that your proposed action will have “no effect” on threatened or endangered species or their respective critical habitat, you do not need to seek concurrence with the Service. Nevertheless, it is a violation of Federal law to harm or harass any federally-listed threatened or endangered fish or wildlife species without the appropriate permit.

Through the consultation process, we will analyze information contained in a biological assessment that you provide. If your proposed action is associated with Federal funding or permitting, consultation will occur with the Federal agency under section 7(a)(2) of the ESA. Otherwise, an incidental take permit pursuant to section 10(a)(1)(B) of the ESA (also known as a habitat conservation plan) is necessary to harm or harass federally listed threatened or endangered fish or wildlife species. In either case, there is no mechanism for authorizing incidental take “after-the-fact.” For more information regarding formal consultation and HCPs, please see the Service's Consultation Handbook and Habitat Conservation Plans at [www.fws.gov/endangered/esa-library/index.html#consultations](http://www.fws.gov/endangered/esa-library/index.html#consultations).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the **accuracy of this species list should be verified after 90 days.** This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and
implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. **Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.**

Endangered Species Act Species

There is a total of 6 threatened, endangered, or candidate species on this species list. Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies endangered, threatened, proposed, and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 et seq.). This letter only provides an official species list and technical assistance; if you determine that listed species and/or designated critical habitat may be affected in any way by the proposed project, even if the effect is wholly beneficial, consultation with the Service will be necessary.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 et seq.), federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found on our website.

Please visit our website at http://www.fws.gov/arkansas-es/IPaC/home.html for species-specific guidance to avoid and minimize adverse effects to federally endangered, threatened, proposed, and candidate species. Our web site also contains additional information on species life history and habitat requirements that may be useful in project planning.

If your project involves in-stream construction activities, oil and natural gas infrastructure,
road construction, transmission lines, or communication towers, please review our project specific guidance at [http://www.fws.gov/arkansas-es/IPaC/ProjSpec.html](http://www.fws.gov/arkansas-es/IPaC/ProjSpec.html).

The karst region of Arkansas is a unique region that covers the northern third of Arkansas and we have specific guidance to conserve sensitive cave-obligate and bat species. Please visit [http://www.fws.gov/arkansas-es/IPaC/Karst.html](http://www.fws.gov/arkansas-es/IPaC/Karst.html) to determine if your project occurs in the karst region and to view karst specific-guidance. Proper implementation and maintenance of best management practices specified in these guidance documents is necessary to avoid adverse effects to federally protected species and often avoids the more lengthy formal consultation process.

If your species list includes any mussels, Northern Long-eared Bat, Indiana Bat, Yellowcheek Darter, Red-cockaded Woodpecker, or American Burying Beetle, your project may require a presence/absence and/or habitat survey prior to commencing project activities. Please check the appropriate species-specific guidance on our website to determine if your project requires a survey. We strongly recommend that you contact the appropriate staff species lead biologist (see office directory or species page) prior to conducting presence/absence surveys to ensure the appropriate level of effort and methodology.

Under the ESA, it is the responsibility of the Federal action agency or its designated representative to determine if a proposed action "may affect" endangered, threatened, or proposed species, or designated critical habitat, and if so, to consult with the Service further. Similarly, it is the responsibility of the Federal action agency or project proponent, not the Service, to make “no effect” determinations. If you determine that your proposed action will have “no effect” on threatened or endangered species or their respective critical habitat, you do not need to seek concurrence with the Service. Nevertheless, it is a violation of Federal law to harm or harass any federally-listed threatened or endangered fish or wildlife species without the appropriate permit.

Through the consultation process, we will analyze information contained in a biological assessment that you provide. If your proposed action is associated with Federal funding or permitting, consultation will occur with the Federal agency under section 7(a)(2) of the ESA. Otherwise, an incidental take permit pursuant to section 10(a)(1)(B) of the ESA (also known as a habitat conservation plan) is necessary to harm or harass federally listed threatened or endangered fish or wildlife species. In either case, there is no mechanism for authorizing incidental take “after-the-fact.” For more information regarding formal consultation and HCPs, please see the Service’s Consultation Handbook and Habitat Conservation Plans at [www.fws.gov/endangered/esa-library/index.html#consultations](http://www.fws.gov/endangered/esa-library/index.html#consultations).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be
completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. **Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.**

ROADWAY DESIGN REQUEST

Job Number 090434  FAP No. NHPP-0004 (808)  County Benton

Job Name Wolf Creek & Spring Branch Strs. & Apprs. (S)

Design Engineer Primary Design Environmental Staff

Brief Project Description Replace Bridge at Wolf Creek with a Box Culvert

A. Existing Conditions:

Roadway Width: 30’  Shoulder Type/Width: Paved 3’

Number of Lanes and Width: 2-12’  Existing Right-of-Way: 80’

Sidewalks? No  Location: Width: 

Bike Lanes? No  Location: Width: 

B. Proposed Conditions:

Roadway Width: 40’  Shoulder Type/Width: Paved 8’

Number of Lanes and Width: 2-12’  Proposed Right-of-Way: 225’

Sidewalks? No  Location: Width: 

Bike Lanes? No  Location: Width: 

C. Construction Information:

If detour: Where: 92’ Upstream  Length: 1500’

D. Design Traffic Data:

2019 ADT: 6500  2039 ADT: 7900  % Trucks: 9

Design Speed: 55 m.p.h.

E. Approximate total length of project: 0.043 mile(s)

F. Justification for proposed improvements: Structurally Deficient Bridge

G. Total Relocatees: 0  Residences: 0  Businesses: 0

H. Have you coordinated with any outside agencies (e.g., FHWA, City, County, etc.)?

Regulatory Division

NATIONWIDE PERMIT NO. SWL 2019-00164

Mr. John Fleming
Division Head, Environmental Division
Arkansas Department of Transportation
PO Box 2261
Little Rock, Arkansas  72203-2261

Dear Mr. Fleming:

Please refer to your recent request concerning Department of the Army permit requirements pursuant to Section 404 of the Clean Water Act. You requested authorization for the placement of dredged and fill material in waters of the United States associated with upgrading the approaches and replacing the bridges over Wolf Creek and Decatur Branch at Decatur. The existing roadway consists of two 12-foot-wide lanes with 3-foot-wide shoulders. Upgrades include two 12-foot-wide lanes with 8-foot-wide shoulders. The new bridges will be replaced with reinforced concrete box culverts on existing locations and detour roads will be constructed upstream from the existing bridges. The U.S. Fish and Wildlife Service concurred that the project may affect but is not likely to adversely affect the Gray Bat (Myotis grisescens) and Indiana Bat (Myotis sodalis), and no prohibited take will occur for the Northern Long-eared Bat (Myotis septentrionalis), in accordance with the Programmatic Biological Opinion and Final 4(d) Rule. There are no wetlands or cultural resources impacts. The project was approved as a Tier 3 Categorical Exclusion by the Federal Highway Administration on February 7, 2018. The project is located on State Highway 59, within the City of Decatur, in section 11, T. 19 N., R. 33 W., Benton County, Arkansas. A vicinity map and project location map are enclosed.

The proposed activities are authorized by two Department of the Army Nationwide Permits (NWP’s) No. 14 (copy enclosed), provided that the General Conditions therein are met. For your convenience, we have highlighted the General Conditions of the NWP that are the most pertinent to your project. You should become familiar with the conditions and maintain a copy of the permit at the worksite for ready reference. If changes are proposed in the design or location of the project, you should submit revised plans to this office for approval before construction of the change begins.

Please pay particular attention to General Condition No. 12 which stipulates that appropriate erosion and siltation controls be used during construction and all exposed soil be
permanently stabilized. Erosion control measures must be implemented before, during and after construction.

For your information, we have enclosed a copy of the Arkansas Department of Environmental Quality (ADEQ) Section 401 Water Quality Certification conditions, which are conditions of your permit. If you have any questions concerning compliance with the conditions of the 401 certification, you should contact Ms. Melanie Treat or Mr. Jim Wise at the ADEQ, Water Division, 5301 Northshore Drive, North Little Rock, Arkansas 72118, telephone (501) 682-0040.

Also, in order to fully comply with the conditions of the NWP, you must submit the enclosed compliance certification within 30 days of completion of the project. This is required pursuant to General Condition No. 30 of the permit.

The NWP determination will be valid until March 18, 2022. If NWP No. 14 is modified, suspended, or revoked during this period, your project may not be authorized unless you have begun or are under contract to begin the project. If work has started or the work is under contract, you would then have twelve (12) months to complete the work.

Your cooperation in the Regulatory Program is appreciated. If you have any additional questions about this permit or any of its provisions, please contact Mr. Johnny McLean at (501) 324-5295 and refer to Permit No. SWL 2019-00164, Wolf Creek and Decatur Branch Structures and Approaches on State Highway 59 in Decatur (ArDOT Project No. 090434).

Sincerely,

Sarah Chitwood
Chief, Regulatory Evaluation Branch

PERMITTEE COMPLIANCE CERTIFICATION

PERMIT NO.: SWL 2019-00164, Wolf Creek and Decatur Branch Structures and Approaches on State Highway 59 in Decatur (ArDOT Project No. 090434)

NWP/S NO.: 14

PERMITTEE NAME: ArDOT

DATE OF ISSUANCE: __________

PROJECT MANAGER: Johnny McLean

Upon completion of the activity authorized by this permit and any mitigation required by the permit, sign this certification and return it to the following address:

US Army Corps of Engineers, Little Rock
ATTENTION: CESWL-RD
PO Box 867
Little Rock, Arkansas 72203-0867

Please note that your permitted activity is subject to a compliance inspection by a US Army Corps of Engineers representative. If you fail to comply with this permit, you are subject to permit suspension, modification, or revocation.

I hereby certify that the work authorized by the above referenced permit has been completed in accordance with the terms and conditions of the said permit, and required mitigation was completed in accordance with the permit conditions.

DATE WORK COMPLETED: ________________
