Arkansas State Highway & Transportation Department

Arkansas State Highway Commission

The first State Highway Commission was appointed in 1913. Amendment 42 of the Constitution of Arkansas, adopted in 1952, established the present five-member State Highway Commission. Under this authority, the State Highway Commission is vested with powers and duties for administering Arkansas' State Highway System. Act 192 of 1977 created the Arkansas State Highway and Transportation Department (AHTD), adding responsibilities for coordinating public and private transportation activities and implementing a safe and efficient intermodal transportation system.

Organization and Personnel

The Central Office is in Little Rock. Ten district headquarters, 85 county area maintenance headquarters, and 31 resident engineer offices are located statewide providing consistent control over maintenance and construction activities. Streamlining efforts have reduced the AHTD's full time workforce from approximately 4,000 in 1993 to 3,606 as of June 30, 2011.

Safety

The State Highway Commission adopted the Arkansas Strategic Highway Safety Plan in July 2007 as a planning guide for improving highway safety in the State. The Plan identified six emphasis areas and recommended strategies for each emphasis area to reduce the number of fatal and serious injury crashes on the State’s roadways. A goal was established to reduce the State’s fatality rate to 1.8 fatalities per 100 million vehicle miles (MVM) traveled by the year 2010. In 2010, the State fatality rate decreased 15 percent to a rate of 1.70 fatalities per 100 MVM traveled, compared to 2.01 fatalities in 2007.

State Highway System

As of January 1, 2011, the state-administered highway system totaled 16,416 miles, or 16.4%, of the 100,068 miles of public roads in Arkansas. Nationally, the State Highway System ranks 12th in mileage and the State ranks 41st in total revenues per mile. During State Fiscal Year 2011, projects totaling approximately $583 million were let to contract for state highways.

Bridges

As of July 2011, the AHTD is responsible for maintenance, inspections and load analysis for 7,225 state-owned bridges as well as inspections and load analysis of 4,314 county-owned bridges and 954 city-owned bridges. Bridges are inspected every two years unless they have weight restrictions and/or poor conditions. These bridges are inspected at least annually and sometimes more often. Only 7% of bridges in Arkansas and 4% of the bridges on Arkansas state highways are structurally deficient compared to 7% of the nation’s bridges.

Public Transit

AHTD administers five Federal Transit Administration formula programs totaling $15 million annually and one discretionary program. These programs are supported by the Mass Transit Account that is funded by a 2.86¢ per gallon federal fuel tax and Federal General Revenues. Act 949 of 2001 established the Arkansas Public Transit Fund, to be funded from a 5% tax on car rental rates, which generates approximately $3.5 million yearly for transit activities. The funds generated by the tax on rental cars are used to match federal funds for the purchase of public transportation vehicles, public transit equipment or facilities, and for the operation of the U.S. Department of Transportation Federal Transit Administration Assistance programs.
State Funding

Road-user revenues are generated under tax laws governing motor fuels, special motor fuels, and motor vehicle registrations. After deductions for other programs, the AHTD receives 70%, and 30% is divided equally between cities and counties. Net State Highway Department funds, including interest, in State Fiscal Year 2011 amounted to $437 million. Cities and counties divided approximately $88 million. Alternative fuels are assessed by a graduated scale based on annual registered vehicle users. House Joint Resolution (HJR) 1001 was passed by the 2011 Arkansas General Assembly to provide, if approved by the vote of the people, a ½¢ temporary sales tax, a State Aid City Street Program, and the expansion of the Department’s bonding capacity. In November 2011, the Arkansas Interstate Highway Financing Act of 2007 as Amended was passed by a vote of the people by a 4:1 margin. This action will extend the Arkansas Highway Commission’s authority to issue up to $575 million in Grant Anticipation Revenue Vehicle (GARVEE) bonds to help the continued modernization of our Interstate highway system.

Federal Funding

On August 10, 2005, the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) was enacted and established highway and transit programs and funding for a five year period (2005-2009). Arkansas has received an estimated average annual amount of $505 million for highway programs under the act. SAFETEA-LU has been extended through continuing resolutions. Taxes are levied on motor fuels per gallon with the revenues deposited in the Federal Highway Trust Fund-Federal aid Highway Account, Mass Transit Account, and the Regulated Storage Tank Trust Fund (RSTTF).

State Aid County Road and City Street Program

The State Aid Division, authorized under Act 445 of 1973, administers the State Aid County Road Program. The Division also administers Federal-aid highway funds available for county roads. In State Fiscal Year 2011, 71 projects on 199.5 miles and 2 bridges were contracted at a total cost of $22.5 million. In the 2011 Arkansas General Assembly, HJR 1001 was adopted. If approved by the vote of the people, this legislation will create a State Aid City Street program funded by an existing 1¢ motor fuel tax.

American Recovery and Reinvestment Act

The American Recovery and Reinvestment Act of 2009 provided $379.8M to the state of Arkansas for transportation (includes funds for Transit). The funds were distributed as follows.
