

Title: Senior Asset Management and Pavement Data Analyst	Effective Date: June 19, 2021	Grade: XVI	Job Category: Professional
Prior Title: Initial Distribution	Prior Effective Date:	Grade:	Page: 1 of 2

CHARACTERISTICS OF WORK

Under direct supervision of the Section Head or team leader, this position is responsible for developing and/or maintaining databases used within the System Information and Research (SIR) Division/Asset Management Section. This position will also be responsible for maintaining the Department’s Asset Management analysis software, along with all current inputs and variables, and producing reports as necessary for the software output.

EXAMPLES OF WORK

The following examples are intended only as illustrations of various types of work performed. No attempt is made to be exhaustive. Related, similar, or other logical duties are performed as assigned. The Department may require employees to perform functions beyond those contained in job descriptions. The Department may modify job descriptions based on Department needs. The Arkansas Department of Transportation is an "at will" employer.

- Responsible for updating, maintaining and running the Department’s Pavement Management software.
- Establish and or maintain databases for pavement condition data and pavement structural data.
- Establish, coordinate, and maintain links to Department databases required within various SIR Division databases.
- Ensure all pavement data is correctly referenced to the Department’s Location Referencing System.
- Ensure all databases conform to the data reporting guidelines established within the SIR Division and Department Data Governance procedures.
- Establish and maintain a data Quality Assurance/Quality Control program for all database elements to ensure data integrity and compliance with the Department’s Data Quality Management plan.
- Perform queries or analysis on the State Highway system using various SIR Division databases.
- Design programs as necessary, including the writing of code, compiling, testing, and implementation to aid in the development and enhancement of SIR Division databases.
- Train and provide direct assistance to SIR Division staff.

MINIMUM REQUIREMENTS

Education and experience:

The educational equivalent to a bachelor’s degree from an accredited college or university in computer science, information systems, or related field; OR the educational equivalent to a high school diploma plus four years of advanced database or programming experience. Experience writing reports with SQL Reporting Services and Microsoft Access. Experience in database design, development, maintenance, and administration preferred. Experience with standard web page markup languages, C#, .Net, and Python preferred. Experience with Federal Highway Administration’s HPMS reporting procedures and software preferred.

Knowledge, skills and abilities:

Advanced analytical and problem solving skills. Advanced understanding of database structures, theories, principles, and practices. Effective communication skills, and ability to prioritize, execute, and complete tasks in a timely manner. Knowledge of various programming and database querying languages including Visual Basic, SQL and open source. Working knowledge of ArcGIS desired. Advanced knowledge of Microsoft Excel, Word, and Access.
