## Acknowledgements

ARDOT thanks the following for participating in the TAM plan development:

- Greg Nation, Arkansas Department of Transportation
- Danny Chidester, Arkansas Department of Transportation
- Rhonda Ahrent, Black River Area Development Corporation
- Randy Morris, Central Arkansas Development Council
- Kenneth "Smitty" Smith, Eureka Springs Transit
- Dejuan Locke, Mid-Delta Transit
- Jack Chisum, North Arkansas Transportation Service
- Jennifer L. Johnson, North East Arkansas Transit
- Stephanie J. Bradshaw, Southeast Arkansas Transportation
- David Joplin, Western Transit System

### NOTICE OF NONDISCRIMINATION

The Arkansas Department of Transportation (ARDOT) complies with all civil rights provisions of federal statutes and related authorities that prohibit discrimination in programs and activities receiving federal financial assistance. Therefore, the ARDOT does not discriminate on the basis of race, sex, color, age, national origin, disability, religion (not applicable as a protected group under the FMCSA Title VI Program), LEP, or low-income status in the admission, access to and treatment in ARDOT's programs and activities, as well as the ARDOT's hiring or employment practices. Complaints of alleged discrimination and inquiries regarding the ARDOT's nondiscrimination policies may be directed to Joanna P. McFadden, EEO/DBE Officer (ADA/504/Title VI Coordinator), P. O. Box 2261, Little Rock, AR 72203, (501) 569-2298, (Voice/TTY 711), or the following email address: [joanna.mcfadden@ardot.gov](mailto:joanna.mcfadden@ardot.gov).

Free language assistance for Limited English Proficiency individuals is available upon request.

This notice is available from the ADA/504/Title VI Coordinator in large print, on audiotape and in Braille.

Prepared on behalf of ARDOT by:

## Definitions

**Accountable Executive:** The individual in charge of developing and managing the TAM plan, in accordance with 49 U.S.C. 5329(d).

**Asset Category:** A classification of assets. Typically, there are four main categories: equipment, rolling stock, infrastructure, and facilities.

**Asset Class:** A secondary classification of assets within each asset category. For example, an asset class within the rolling stock asset category would be vans.

**Asset Inventory:** A record of all assets and their information, which could include the asset's category, class, age, and useful life benchmark.

**Capital Asset:** Any asset used to provide or support public transportation.

**Decision Support Tool:** An analytics process or tool that helps providers prioritize investments and/or estimate future capital needs. A decision support tool does not necessarily mean software.

**Disposal Strategy:** The provider's method of discarding an asset that has come to the inevitable end of its useful life.

**Equipment:** Property that is tangible and has at least one year of remaining useful life.

**Facility:** A building or structure used to provide or support public transportation.

**Federal Transit Administration (FTA):** The agency within the United States Department of Transportation that provides assistance to local communities through financial and technical support.

**Fixing America's Surface Transportation (FAST) Act:** The legislation Congress passed in 2015 that allocated 305 billion dollars towards a variety of transportation projects with an emphasis on safety, maintenance, and research for surface transportation infrastructure planning.

**Full Level of Performance:** The objective standard established by FTA for determining whether a capital asset is in a state of good repair.

**Horizon Period:** The four-year period of time for which each provider evaluates their TAM plan and its implementation.

**Infrastructure:** A public transportation network's underlying framework.

**Investment Prioritization:** The ranking of future projects based on several factors, including need, safety risks, accessibility, and financial prudence. Investments are typically ranked and then ordered by their scheduled start date.

**Maintenance Strategy:** A transportation agency's ordered manner of caring for their capital assets in a way that prevents assets from dilapidating before the end of their Useful Life Benchmark.

**Metropolitan Planning Organization (MPO):** A federally funded, regional transportation agency composed of local community representatives.

**Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21) Act:** A bill that authorized funding for national federal surface transportation repairs. The bill was passed by Congress in 2012 and subsequently signed into law by President Barack Obama.

**Participant:** A Tier II provider who opted into a group TAM plan.

**Performance Target:** A level of performance that is quantifiable and scheduled to be met by a certain date.

**Provider:** An FTA-funded entity who conducts public transportation operations or owns property being used for public transportation.

**Public Transportation System:** A provider's comprehensive transportation network and operations, even operations conducted through contracted employees.

**Rolling Stock:** Vehicles used for carrying passengers in a public transportation network.

**Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU):** A bill passed by Congress and signed into law by President George W. Bush in 2005 that allocated money for federal surface transportation spending.

**Service Vehicle:** Equipment used to deliver items or to repair other parts of a transportation system.

**State of Good Repair (SGR):** The quality of a capital asset when the asset functions at its full level of performance.

**Subrecipient:** An organization receiving Federal transit assistance indirectly, typically through the State.

**TERM Scale:** The FTA rating system used for the Transit Economic Requirement Model (TERM) to quantify an asset's condition on a scale of 1 to 5, 5 being Excellent, 4 being Good, 3 being Adequate, 2 being Marginal, and 1 being Poor.

**Tier I Provider:** An FTA-funded owner, operator, or manager of either 1) rail transit or 2) more than 101 vehicles across all fixed-route modes or in any one non-fixed route mode.

**Tier II Provider:** An FTA-funded owner, operator, or manager of 1) a subrecipient under the 5311 Rural Area Formula Program, 2) Native-American tribal assets, or 3) fewer than 100 vehicles across all fixed-route modes or in any one non-fixed route mode.

**Transit Asset Management (TAM):** A business model that uses the condition of transportation assets to predict future needs and find the best, most cost-effective way to fund transit systems, prioritizing investments with the goal of achieving a State of Good Repair.

**Transit Asset Management (TAM) Plan:** A management plan that includes – at a minimum – an inventory of capital assets within a transportation system, an assessment of those assets' conditions, a decision support tool, and a prioritization of investments.

**Transit Asset Management (TAM) Policy:** A written account of a transit provider's commitment to achieving a State of Good Repair. The provider's TAM objectives, roles, and responsibilities come from the provider's TAM policy.

**Transit Asset Management (TAM) System:** An ordered strategy for consistently operating and improving public transportation assets over the course of their useful life.

**Useful Life:** The period of time that a capital asset is usable.

**Useful Life Benchmark (ULB):** The maximum age of an asset, often determined by the default benchmark provided by the FTA.

# Introduction

## What is Transit Asset Management?

On July 6, 2012, the Moving Ahead for Progress in the 21st Century Act (MAP-21) federal transportation bill was signed into law. With the approval of MAP-21 came many changes for transit systems across the nation and introduced Transit Asset Management (TAM). On September 30, 2015, the Federal Transit Administration (FTA) published the TAM Notice of Proposed Rulemaking which ultimately led to agencies being required to develop a transit asset management (TAM) plan if it owns, operates, or manages capital assets used to provide public transportation and receives federal financial assistance under 49 U.S.C. Chapter 53 as a recipient or subrecipient. In November 2021, The Bipartisan Infrastructure Law, enacted as the Infrastructure Investment and Jobs Act (IIJA), continued, without change, FTA's Transit Asset Management (TAM) program.

The TAM program enables transit agencies to implement strategic approaches to monitoring, maintaining, and replacing transit assets. FTA's TAM rule (49 CFR Part 625) requires transit agencies to develop a compliant TAM plan, set performance targets for capital assets, create data and narrative reports on performance measures, and coordinate with their planning partners.

The goal of the TAM plan is to guide the optimal prioritization of funding at transit properties in order to keep transit networks in a State of Good Repair (SGR), the condition in which a capital asset can operate at a full level of performance.

Each TAM plan should:

- Outline how people, processes, and tools come together to address asset management policy and goals.
- Provide accountability and visibility for furthering understanding of leveraging asset management practices.
- Support planning, budgeting, and communications to internal and external stakeholders.

The FTA categorizes transit agencies as Tier I or Tier II providers. Tier I providers are agencies that 1) operate rail, or 2) have 101 or more vehicles across all fixed route modes, or 3) have 101 or more vehicles in one non-fixed route mode. Tier II providers are agencies that 1) are subrecipients of 5311 funds, or 2) American Indian Tribes, 3) have 100 vehicles or less across all fixed route modes, or 3) have 100 vehicles or less in non-fixed route mode.

The required elements for the TAM plan are the following:

Element	
1. Inventory of Capital Assets	Tier I and Tier II Providers
2. Condition Assessment	
3. Decision Support Tools	
4. Investment Prioritization	
5. TAM and SGR Policy	Tier I Providers
6. Implementation Strategy	
7. List of Key Annual Activities	
8. Identification of Resources	
9. Evaluation of Plan	

While all transit providers receiving FTA funding used for public transportation are required to have a TAM plan, Tier II transit providers are eligible to participate in a Group TAM plan. Group plans are compiled by a sponsor but providers have their own Accountable Executive who is responsible for executing the TAM plan. The Arkansas Department of Transportation (ARDOT) will be sponsoring this TAM plan for rural public transportation providers in the state. The participating agencies are:

- Black River Area Development (BRAD)
- Central Arkansas Development Council (CADC) / South Central Arkansas Transit (SCAT)
- Eureka Springs Transit (EST)
- Mid-Delta Transit (MDT)
- North Arkansas Transportation Service (NATS)
- Northeast Arkansas Transit (NEAT)
- Southeast Arkansas Transit (SEAT)
- Western Transit System (WTS)

This TAM plan provides an outline of how ARDOT will assess, monitor, and report the physical condition of assets utilized in the operation of the public transportation system. ARDOT's approach to accomplish a SGR includes the strategic and systematic process of monitoring, overseeing and providing funding for the improvement of physical assets to identify a structured sequence of maintenance, preservation, repair, rehabilitation, and replacement actions that will achieve and sustain a desired state of good repair over the lifecycle of the assets at a minimum practicable cost. This document shall cover a "horizon period" of time from October 1, 2022 to September 30, 2026. This TAM shall be amended during the four-year horizon period when there is a significant change to staff, assets, and/or operations occurring at the ARDOT group plan agencies, as well as an annual update for each of the four years of the plan.

As part of the TAM process, each agency must designate an Accountable Executive. The role of the Accountable Executive is defined as:

"a single, identifiable person who has ultimate responsibility for carrying out the safety management system of a public transportation agency; responsibility for carrying out transit asset management practices; and control or direction over the human and capital resources needed to develop and maintain both the agency's public transportation agency safety plan, in accordance with 49 U.S.C. 5329(d), and the agency's transit asset management plan in accordance with 49 U.S.C. 5326."

In addition, the TAM rule requires that each of the transit provider's accountable executives approves the ARDOT group TAM plan. The accountable executives for each of the group plan agencies are listed in Table 1.

**Table 1: ARDOT TAM Plan Group Agencies' Accountable Executives**

Agency Name	Accountable Executive
Black River Area Development (BRAD)	Rhonda Ahrent
Central Arkansas Development Council (CADC)/South Central Arkansas Transit (SCAT)	Randy Morris
Eureka Springs Transit (EST)	Kenneth "Smitty" Smith
Mid-Delta Transit (MDT)	Dejuan Locke
North Arkansas Transportation Service (NATS)	Jack Chisum
North East Arkansas Transit (NEAT)	Jennifer L. Johnson
Southeast Arkansas Transportation (SEAT)	Stephanie J. Bradshaw
Western Transit System (WTS)	David Joplin

## Asset Inventory

The asset inventory records the number and type of capital assets. According to 49 CFR § 625.45, the TAM plan asset inventory must include all capital assets that a provider owns, except non-vehicle equipment with an acquisition value under \$50,000. An inventory also must include third-party owned or jointly procured exclusive-use maintenance facilities, passenger station facilities, administrative facilities, rolling stock, and guideway infrastructure used by a provider in the provision of public transportation. The capital asset items included in the TAM inventory, which ARDOT and ARDOT's group plan agencies own, operate, and have a direct capital responsibility for are as follows: Rolling Stock, Equipment, and Facilities.

Table 2 provides a summary of all three inventory types for all participants of the ARDOT group plan. Complete tables may be found in the appendix.

**Table 2: Asset Inventory Summary**

Asset Category	Total Number	Average Age	Average Mileage
Revenue Vehicles	454	6.5	158,644.85
AO - Automobile	2	8.5	111,659.50
CU - Cutaway Bus	183	5.8	176,762.59
MV - Minivan	93	5.3	148,266.28
Other	4	8.8	33,461.00
RT - Rubber-Tire Vintage Trolley	9	5.9	73,736.33
VN - Van	163	7.9	152,562.29
Equipment	13	8.1	56,633.31
AO - Automobile	2	0.5	1,255.50
MT- Maintenance Truck	11	9.5	66,702.00
Facilities	15	N/A	N/A
Admin/Maintenance	12	N/A	N/A
Parking	3	N/A	N/A

### Rolling Stock

Rolling stock includes all owned and operated revenue service vehicles used to primarily transport passengers. The TAM rule also stipulates that any leased vehicles used in the provision of providing public transportation and includes vehicles used to primarily transport passengers. The TAM rule also stipulates that any leased vehicles used in the provision of providing public transportation must also be inventoried (but not part of the condition assessment). At the time of this writing, all agencies in the ARDOT group TAM plan have full ownership of their rolling stock assets.

Figure 1 provides a breakdown of how rolling stock vehicles are distributed among the group plan agencies.

**Figure 1: Revenue Vehicle Type by Group Plan Agency**

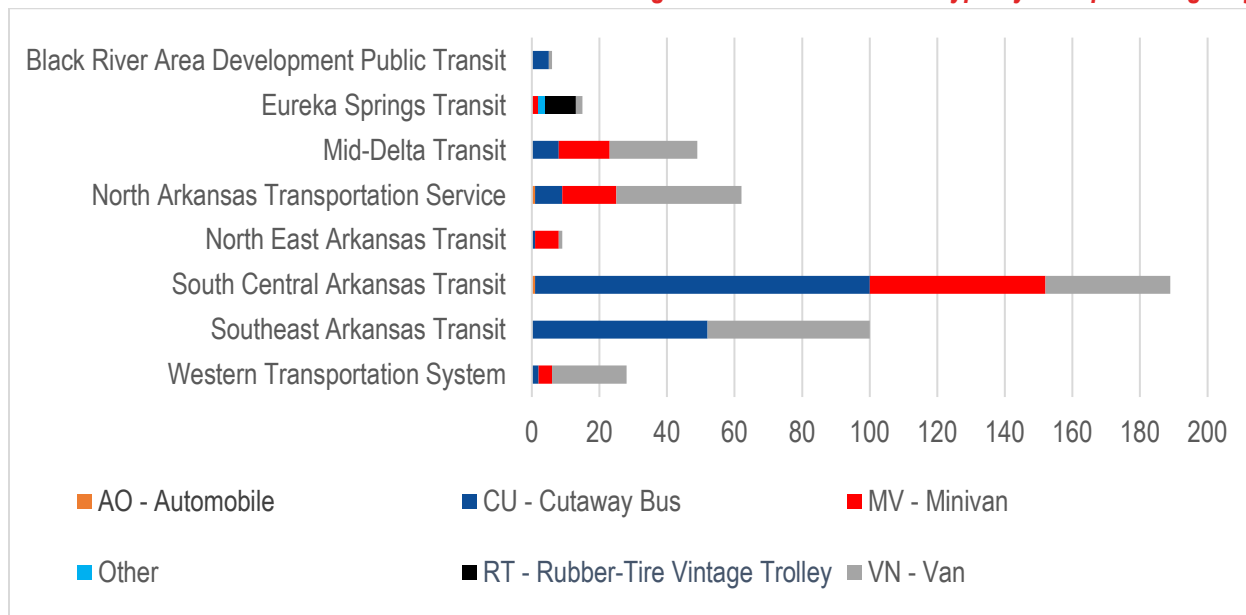

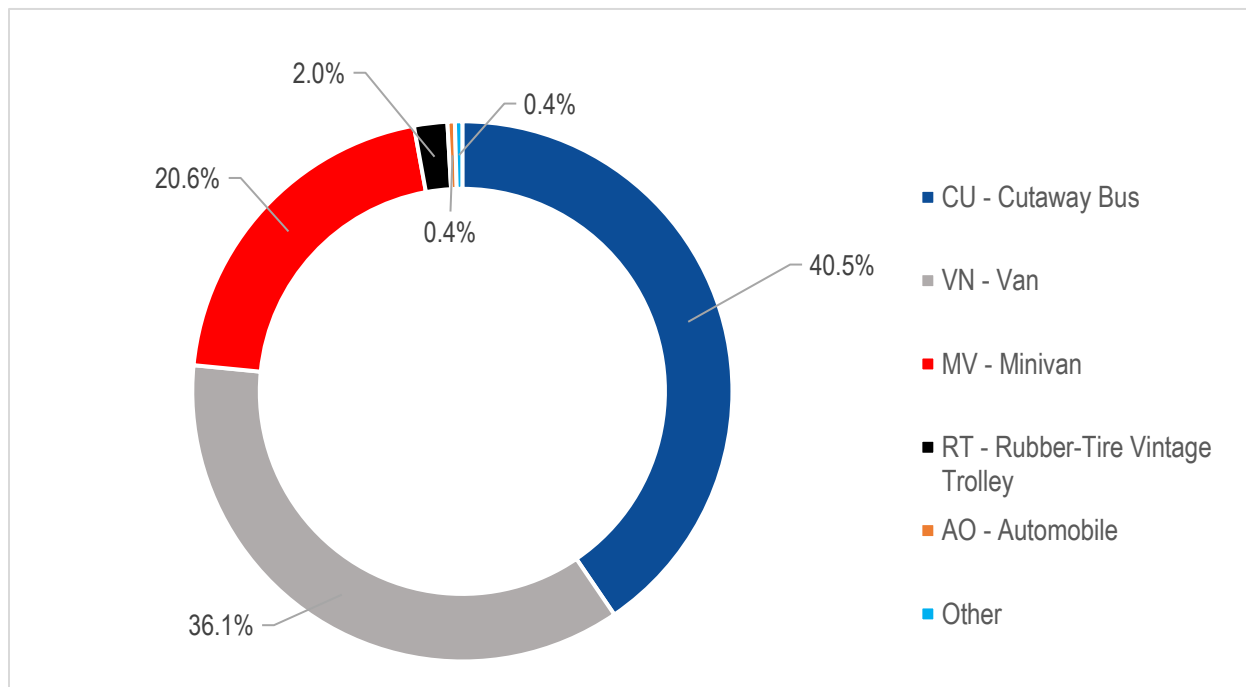

Figure 2 shows the breakdown of which types of rolling stock are operated by group plan agencies. Assets are primarily cutaway buses, vans, and minivans.

**Figure 2: All Revenue Vehicle Types**

## Equipment

Equipment includes all non-revenue service vehicles regardless of value and any ARDOT group plan agencies owned equipment with a cost of over \$50,000 in acquisition value, including non-revenue service vehicles that are primarily used to support maintenance and repair work for a public transportation system, supervisory work, or for the delivery of materials, equipment, or tools. None of the agencies in the group plan utilize or operate any third-party non-revenue service vehicle equipment assets, nor do they have any equipment with an acquisition cost over \$50,000.

Figure 3 shows how equipment/service vehicles are distributed among the group plan agencies.

**Figure 3: Service Vehicle Type by Group Plan Agency**

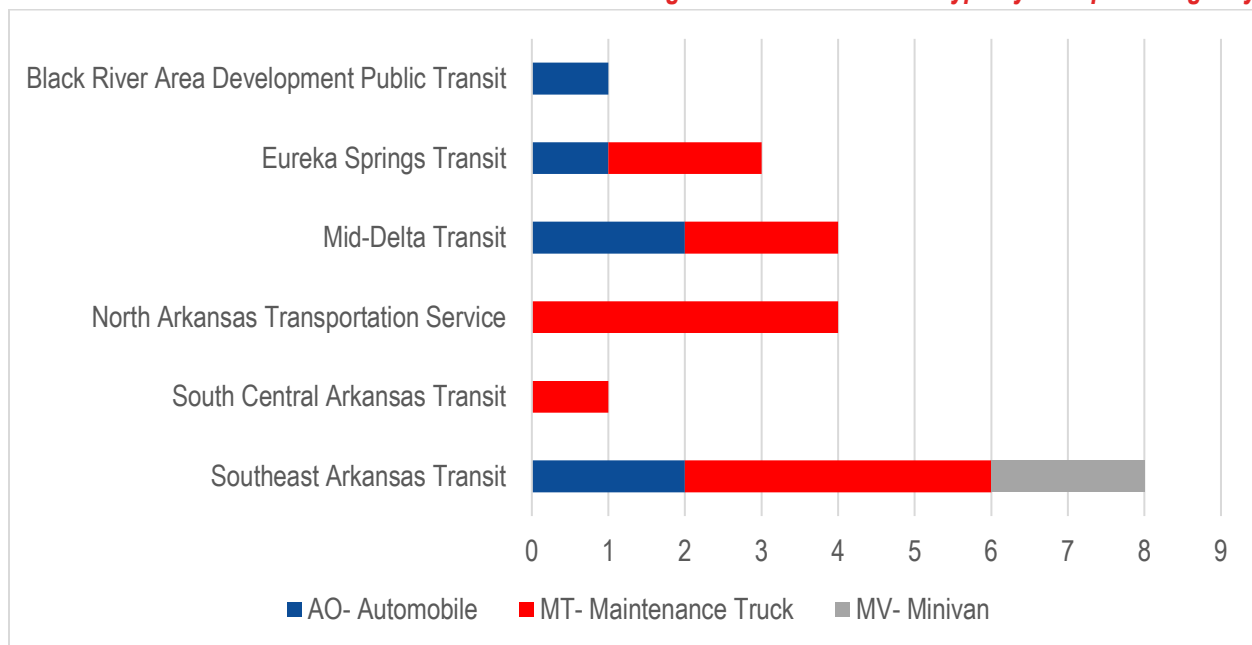

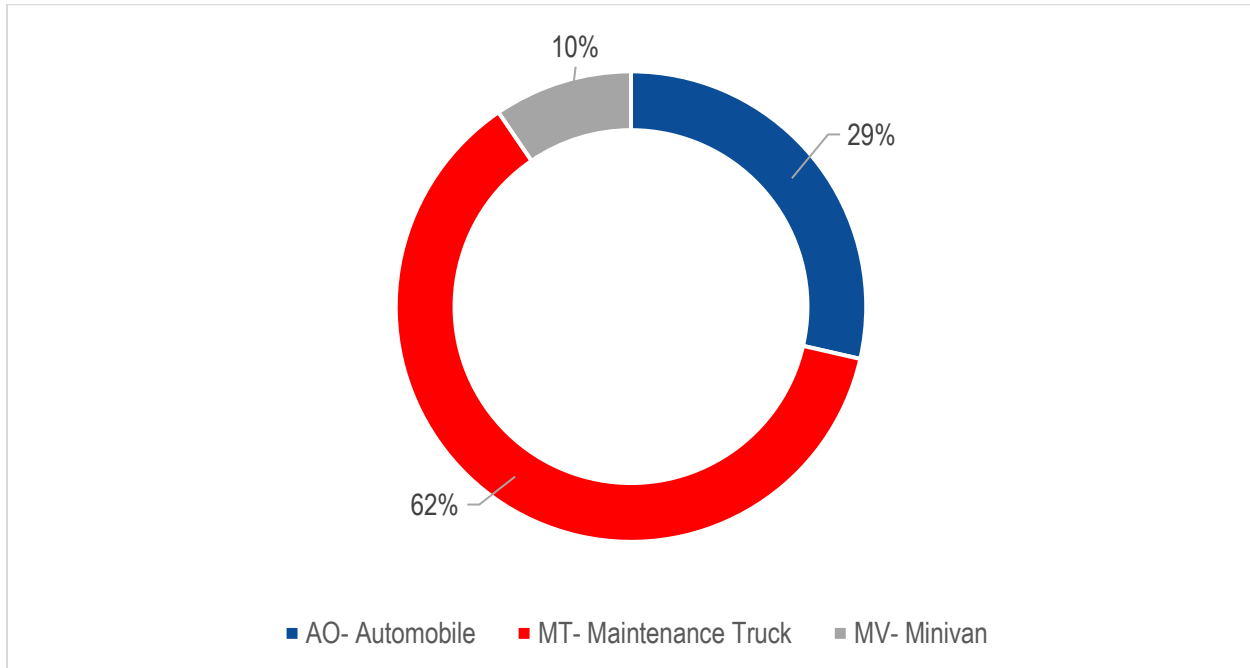

Figure 4 shows the breakdown of which types of non-revenue vehicles are operated by group plan agencies. The majority of non-revenue vehicles are maintenance trucks.

**Figure 4: All Equipment Types by Agency**

## Facilities

Facilities are any structure used in providing or supporting public transportation where the ARDOT group plan sponsored agency owns and has a direct capital responsibility. The types of facilities that are required to be included in the TAM are administrative, maintenance, parking, and passenger facilities that have an acquisition cost greater than \$50,000. Facilities utilized, owned, and operated by the ARDOT group plan sponsored agencies include maintenance buildings, administrative buildings, and passenger stations.

Table 3 summarizes the count and type of facilities used by ARDOT group plan agencies.

**Table 3: Facilities Inventory Summary**

Facility Type	Count of Asset Class
Admin/Maintenance	12
Parking	3
<b>Total</b>	<b>15</b>

## Asset Condition

ARDOT assesses the condition of the group plan agencies' assets on an annual basis by utilizing the FTA TERM (Transit Economic Requirements Model) condition rating assessment scale, shown in Table 4. This rating scale assigned a numerical value or rank based on the physical condition(s) presented by each individual asset throughout its life cycle. The rating scale is based on numbers 1 – 5, with 5 being Excellent and 1 being Poor. Assets with a rating of 3 or higher are considered to be in a State of Good Repair.

### State of Good Repair

State of Good Repair (SGR) is defined as the condition in which a capital asset can operate at a full level of performance. An individual capital asset may operate at a full level of performance regardless of whether other capital assets within a public transportation system are in a state of good repair. Due to this, each asset is individually assessed. The SGR policy for ARDOT has determined that an asset is operating at full level of performance if the asset can answer yes to the following questions:

1. Is the asset able to perform its designed function?
2. Does the asset operate without any known unacceptable safety risk?
3. Does the asset have remaining Useful Life?

The purpose of the ARDOT group TAM plan is to keep the agencies' assets in a SGR through setting these targets and optimizing the capital investment plan to achieve these targets. Failure to achieve or maintain a SGR leads to:

- Safety risks for the users of public transit
- Decreased system reliability, more road calls, and shorter distances between failures
- Higher maintenance costs
- Lower system performance and customer satisfaction

### Assessment Methodology

The TAM condition assessments were completed by group plan agencies' staff. Each asset is evaluated on its respective components, and given a score based on the FTA TERM Rating Scale. The rating scale can be seen in Table 4.

**Table 4: TERM Rating System**

FTA TERM Rating Scale		
Rank	Category	Description
4.8 – 5.0	Excellent	New asset; no visible defects
4.0 – 4.7	Good	Asset showing minimal signs of wear; some (slightly) defective or deteriorated component(s)
3.0 – 3.9	Adequate	Asset has reached its mid-life (condition 3.5); some moderately defective or deteriorated component(s)
2.0 – 2.9	Marginal	Asset reaching or just past the end of its use life; increasing number of defective or deteriorated component(s) and increasing maintenance needs
1.0 – 1.9	Poor	Asset is past its useful life and is in need of immediate repair or replacement may have critically damaged components

## Condition Assessment by Asset Category

### Rolling Stock Condition Assessment

The TAM plan rolling stock condition assessments were completed by both sponsor agency inspectors and participating agency personnel. The assessment consists of assigning a condition rating to all rolling stock assets for which the ARDOT group plan agencies own and have a direct capital responsibility. A condition assessment ranking is not conducted in the TAM plan for rolling stock assets for which ARDOT group plan agencies do not own the rolling stock asset, the rolling stock asset is owned by a third party, and/or where ARDOT group plan agencies do not have a direct capital responsibility for the rolling stock asset. At the time of this report, ARDOT group plan agencies own and operate all their revenue vehicles used in providing public transportation. The full rolling stock condition assessment tables can be found in the appendix. Table 5 provides a general summary of the condition assessment.

**Table 5: Rolling Stock Performance**

Asset Category	Total Number	Number Exceeding ULB	Percentage Exceeding ULB
AO - Automobile	2	1	50%
CU - Cutaway Bus	183	17	9%
MV - Minivan	93	12	13%
Other	4	1	25%
RT - Rubber-Tire Vintage Trolley	9	0	0%
VN - Van	163	67	41%
Total	454	98	22%

For this TAM plan, the default useful life benchmark age provided by the FTA is used to determine whether a vehicle has exceeded its useful life. However, ARDOT group plan agencies conduct yearly assessments of vehicles to maintain a comprehensive understanding of general fleet conditions. Table 6 shows the results of the most recent round of assessments.

**Table 6: Rolling Stock Average TERM Scores**

Asset Type	Average TERM Score
AO - Automobile	3.95
CU - Cutaway Bus	3.89
MV - Minivan	3.82
Other	4.55
RT - Rubber-Tire Vintage Trolley	4.39
VN - Van	3.58

## Equipment Condition Assessment

The TAM plan equipment condition assessment consists of assigning a TERM physical condition rating to all equipment that is either a non-revenue service vehicle or a non-vehicle equipment asset with an acquisition value of \$50,000 or more that ARDOT group plan agencies own and have a direct capital responsibility. At the time of this writing, all equipment included in the TAM plan are owned by the ARDOT group plan agencies. The full equipment condition assessment table can be found in the appendix. Table 7 provides a general summary of the condition assessment.

**Table 7: Equipment Performance**

Asset Category	Total Number	Number Exceeding ULB	Percentage Exceeding ULB
AO – Automobile	2	0	0%
MT – Maintenance Truck	11	3	27%
All	13	0	0%

As with rolling stock vehicles, ARDOT conducts yearly assessments, although those assessments are not included in determining the ULB of non-revenue vehicles. The results of the most recent assessment are shown in Table 8.

**Table 8: Equipment Average Condition Scores**

Asset Type	Average Condition Score
AO – Automobile	5.00
MT – Maintenance Truck	4.51
All	4.5

## Facilities Condition Assessment

The TAM plan facilities condition assessment consists of assigning a physical condition rating (based on the FTA TERM scale) to all facility assets for which ARDOT group plan agencies own and have a direct capital responsibility. A condition assessment ranking is not conducted in the TAM plan for facility assets for which ARDOT group plan agencies do not own the asset, the facility asset is owned by a third party, and/or where ARDOT group plan agencies do not have a direct capital responsibility for the facility asset. However, for the purposes of NTD reporting, all ARDOT group-plan-agencies-owned and third-party owned facility assets are included in the facility asset inventory. Only ARDOT group plan agencies' owned facility assets with a direct capital responsibility are assigned a facility asset condition rating. At the time of this report, ARDOT group plan agencies own, operate, and have a direct capital responsibility for administration, maintenance, and passenger facilities. The facilities condition assessment results can be found in table 9.

**Table 9: Facilities Performance**

Asset Class	Total Number	% Exceeding TERM 3
Facility - Admin/Maintenance	12	8.3%
Facility - Parking	3	0%

## Decision Support Tools

This section details the process and tools used to manage the lifecycle planning of capital public transportation assets. ARDOT group plan agencies' staff within the maintenance, finance/grants, compliance, operations and safety, and executive departments utilizes a variety of management practices, policies, and technology to manage, maintain, and plan throughout the life cycle of an asset. Figure 6 shows the typical ARDOT group plan agencies' decision support and capital asset investment planning process. The decision-making process is ongoing and cyclical. Therefore, steps may not happen in the order listed.

*Figure 5: Decision-Making Process*

<b>ARDOT Decision Support and Capital Asset Investment Planning Process</b>
Annual management meeting to review asset performance and set goals
Development or update of department policies, procedures, and SOPs
Creation or update of Transit Coordination Plan, Operations Plan, Facility and Equipment Maintenance Plan, Procurement Manual, Fleet Maintenance Plan, TAM plan, and Finance Capital Plan
Data Collection, analysis, and review
ARDOT group plan agencies update, record, and report data to ARDOT
ARDOT staff or representative updates the TAM and reports data to NTD
ARDOT group Plan agencies' department management meetings, assess assets and transit system capital investment needs based on safety deficiencies, ADA accessibility, agency capacity, consumer demand, maintenance needs, data, and available funding
Development or update of Investment Prioritization List of Projects and Programs
Contract advertising – RFP and award process
Project/program implementation and monitoring

Beyond the planning process outlines above, there are several other documents that provide additional decision support including from the ARDOT group plan agencies:

- Facility maintenance plans
- Vehicle maintenance plans
- Equipment maintenance plans
- Procurement manuals

### Key Decision Support Tools

#### AR-STTARS

ARDOT is currently working to transition to the online Arkansas Statewide Transit Tracking and Reporting System (AR-STTARS) as the primary method of data management for transit providers in the State of Arkansas. The online application will made recording information about assets and applying for funding significantly easier. As transit providers gain or dispose of their assets, AR-STTARS will provide a constant and up-to-date inventory.

#### Arkansas Transit Coordination Plan

All Section 5310 funded program or projects are federally mandated to be consistent with a coordination plan. Programs or projects with Sections 5311 and 5307 funding are expected to be included as essential partners. The goal of coordination is to allow providers to work together to create cost-effective delivery, increase service, and improve communication, among other benefits. ARDOT has created and updated the Arkansas Transit Coordination Plan (TCP) to work towards these goals. The TCP highlights ways in which ARDOT can provide support to these

agencies and foster the efficient use of resources. ARDOT considers these strategies when making decisions about funding allocation.

### Transit Needs Index

As part of the creation of the Transit Coordination Plan, ARDOT conducted a quantitative assessment to identify areas with disproportionately higher concentrations of transit-disadvantaged groups. This assessment is referred to as the Transit Needs Index (TNI). The TNI provides an additional resource for ARDOT to refer to when considering asset management, specifically the impacts of capital purchases and vehicle replacement for providers serving populations with a high need for transit.

## Investment Prioritization

When prioritizing investment, ARDOT considers the output from the various decision support tools. There are several important factors to consider, including need (from the TNI), local policy, estimated funding levels. Additionally, ARDOT also must consider the supply-chain issues caused by the COVID-19 pandemic. In previous years ARDOT has been able to provide a reliable replacement program for vehicles. However, current delays in vehicle availability have made planning an annual vehicle acquisition target difficult. Rapid inflation also makes planning an annual replacement budget difficult for ARDOT.

The condition assessments conducted for this TAM plan showed that rolling stock vehicles are in the most need of replacement, comparatively but are generally in good enough shape to provide safe reliable transit services. Given the aforementioned shortages and the importance of providing safe and reliable service to riders, funding will be prioritized for rolling stock as it becomes available. Equipment will be prioritized second. No facility investments are planned over the horizon period (2022-2026).

Given the above findings, ARDOT is prioritizing their funding assets in the following order:

1. Rolling Stock
2. Equipment
3. Facility

ARDOT prioritizes cutaway buses and vans for fleet replacement and considers other asset class vehicles on a case-by-case basis.

## Performance Targets

An important component of the TAM plan is to define targets and measures that will help ARDOT plan for future investment in transit assets to maintain a State of Good Repair. Table 10 details ARDOT's group plan's performance measure targets. Performance measure targets vary depending on the asset class. For revenue and service vehicles, the performance measure target pertains to the percent of vehicles that have met or exceeded their useful life benchmark. For facilities, the performance measure target pertains to facilities that rated 3 or below on the condition scale.

**Table 10: Performance Targets**

Asset Category		Current	2023	2024	2025	2026
Revenue Vehicles Performance and Targets						
Condition Score - % of revenue vehicles within a particular asset class that have exceeded their age ULB	AO - Automobile	50%	50%	50%	50%	50%
	CU - Cutaway Bus	9%	50%	50%	50%	50%
	MV - Minivan	13%	50%	50%	50%	50%
	Other	25%	50%	50%	50%	50%
	RT - Rubber-Tire Vintage Trolley	0%	50%	50%	50%	50%
	VN - Van	41%	50%	50%	50%	50%
Equipment Performance and Targets						
Cumulative Condition Score - % of non-revenue vehicles within a particular asset class that have exceeded their age ULB	AO - Automobile	0%	50%	50%	50%	50%
	MT- Maintenance Truck	27%	50%	50%	50%	50%
Facilities Performance and Targets						
Condition Score - % of facilities that score below 3.0 on the TERM scale	Admin/Maintenance	8.3%	25%	25%	25%	25%
	Parking	0%	25%	25%	25%	25%

## National Transit Database Reporting

ARDOT is required to report annually to the FTA's National Transit Database (NTD) the following information regarding TAM:

- Inventory of assets
- SGR performance targets for the next fiscal year
- Condition inspection assessments and performance measures of capital assets
- An annual narrative will also be included and reported to NTD that provides a description of any change in the condition of ARDOT group plan agencies' transit system or operations from the previous year and describe the progress made during the reporting year to meet the performance targets set in the previous reporting year.

Per NTD requirements, annual TAM reporting to NTD must be completed by the last business day of October of each calendar year. The ARDOT Public Transportation Administrator will complete the NTD reporting for the ARDOT group plan agencies.

As part of the NTD reporting process, ARDOT group plan agencies will maintain all supporting TAM records and documents and will make available all TAM records to the federal (FTA), state (ARDOT), and MPOs that provide funding to aid in the planning process.

## Plan Updates

In addition to the annual updates required for NTD reporting, according to the FTA TAM Rule, the TAM plan must be updated in its entirety at least every four (4) years. This document covers a horizon period of four years, from October 1, 2022, to September 31, 2026.

While PTASP is currently deferred for 5311 agencies, annual NTD reporting should still view capital, budget, and procurement planning activities through the lens of safety. This practice will better prepare the state and 5311 agencies to develop their PTASPs if and when they are required. With the implementation of this plan, this document will serve as a baseline measure of asset performance management. As more data is collected, targets and benchmarks will be adjusted accurately to reflect the condition of the system.

## Appendix

**Table 11: Rolling Stock Inventory**

Agency	Asset Class	Make / Model	Year	Vehicle Age	Mileage	Agency Vehicle Number
